Natural Materials for Food Packaging Application Jyotishkumar Parameswaranpillai, Aswathy Jayakumar, E. K. Radhakrishnan, Suchart Siengchin, Sabarish Radoor, 2023-07-11 Natural Materials for Food Packaging Application Analyze the future of biodegradable food packaging with this cutting edge overview Packaging plays an essential role in the production of food and its movement through the global supply chain Food packaging has been a significant site of innovation recently allowing consumers better access to natural and organic foods extended shelf lives and more However food packaging has become an

increasingly serious environmental hazard with the result that biodegradable food packaging has become a vital and growing area of research. *Natural Materials for Food Packaging Application* provides a thorough and detailed introduction to natural packaging and its applications in food transportation. Treating both recent innovations and prospective future developments, it provides readers with extensive insights into the current state of research in this field. The result is a volume designed to meet the aspirational needs of a sustainable food industry. *Natural Materials for Food Packaging Application* readers will also find detailed treatment of biodegradable packaging materials including thermo plastic starch, polybutylene succinate and more. Discussion of subjects including chitosan based food packaging films, clay based packaging films and more. An authorial team with vast expertise in the field of biological polymer production. *Natural Materials for Food Packaging Applications* is a useful reference for chemists, materials scientists and food scientists as well as for any industry professionals working in food distribution and the food supply chain.

Natural Compounds as Antimicrobial Agents Carlos M. Franco, Beatriz Vázquez Belda, 2020-12-02. The world is full of plants and animals that have their own defenses producing various substances in their daily fight against bacteria, fungi or other agents. These products are alternatives to conventional antimicrobials that have a poor reputation with consumers. Many of these compounds are well known; however, the multiple types of structures together with the variable responses depending on the type of biocontrol needed in a wide range of applications such as clinical, agricultural, general hygiene and food necessitates the continuous search for specific applications and the continuous study of how to use these substances. The present book provides a summary of reviews and original research works that explore the multiple alternatives for the use of these compounds.

Essential Oils in Food Processing: Chemistry, Safety and Applications Seyed Mohammed Bagher Hashemi, Amin Mousavi Khaneghah, Anderson de Souza Sant'Ana, 2017-10-06. A guide to the use of essential oils in food including information on their composition, extraction methods and their antioxidant and antimicrobial applications.
