Contemporary Psychoanalysis and Modern Jewish Philosophy Michael Oppenheim, 2016-10-04

Relational psychoanalysis and modern Jewish philosophy have much to say about the dynamics of human relationships but there has been no detailed thorough and constructive examination that brings together these two incisive discourses Contemporary Psychoanalysis and Modern Jewish Philosophy Two Languages of Love explores the critical similarities and differences between the two disciplines casting new light on both the analytic and philosophical understandings of how relationships develop flourish and fail For psychoanalysts such as Hans Loewald Stephen Mitchell and Jessica Benjamin love is seen as a fundamental life force a key to human motivation and the transformative core of Freud's therapeutic talking cure The Jewish philosophers Franz Rosenzweig Martin Buber and Emmanuel Levinas envision love as having both a human and divine dimension expressed through the dual commandments to love God and the neighbor The two languages are brought to life through chapters that investigate the relationship between self love and love of the other the dynamics of intersubjectivity the methods and possibilities of human transformation the magical powers of language the goal of achieving a meaningful life the significance of responsibility for others and the challenge that death poses to life's fullness This multidisciplinary study drawing on psychology philosophy religion and feminism provides an important contribution to contemporary scientific and humanistic interest in the social and relational dimensions of human living The book will appeal especially to clinicians theorists and scholars of psychoanalysis philosophy of religion and Jewish studies as well as advanced students studying in these fields

Savege Scharff, 1992-01-01 In this landmark work on object relations Dr Jill Savage Scharff addresses the psychological processes of projective and introjective identification and countertransference She carefully traces the debates about projective identification_ the neurotic versus psychotic arguments and the intrapsychic versus interpersonal views She holds that disagreements stem from unrecognized shifts in meaning of the term identification and unacknowledged differences of opinion as to where the identification takes place For her projective identification is an umbrella term for phenomena that can affect the self the object inside the self and the external object Dr Scharff brings fresh insight to the neglected concept of introjective identification and a new understanding of the therapeutic action of projective and introjective identification The book's unique distinction is in the author's integration of object relations theory and practice particularly with regard to the handling of countertransference The clinical material is written in the vivid and personally candid style that is a hallmark of her work Dr Scharff demonstrates how to understand and utilize projective and introjective identification making this work indispensable for every dynamically oriented therapist **Little Madnesses** Annette Kuhn, 2013-02-21 Little madnesses are

our most deeply felt enthusiasms investments and attachments in the sphere of culture The term was coined by the child psychoanalyst Donald Winnicott whose work on transitional phenomena grew out of his naming of the transitional object and extended into preliminary explorations of the crucial role played by cultural experience in a life that feels satisfying In our socially and culturally sanctioned little madnesses everyone can find relief from the burden of having to maintain a clear boundary between inner and outer worlds fantasy and reality because it is in the space between them that we can find the enthusiasms and passions that excite our creative imaginations This idea offers intriguing pathways towards understanding how we can engage effectively with the world at a public social level without setting aside our inner lives our emotions and our most deeply felt attachments In Little Madnesses writers artists scholars and experts in a range of fields and disciplines explore the idea of transitional phenomena and consider its potential to extend and deepen our understanding of cultural experience in mental and social life focusing on the importance of space place and boundaries in cultural experience on how we can negotiate media use and cultural identity and on the aesthetic and creative aspects of cultural experience Topics covered include cult films computer use installation art trips to the cinema museums and galleries the agony and ecstasy of making art and the significance of life stage in cultural experience The Complete Systemic Supervisor Thomas C.
