Multilateralism in the Indo-Pacific Swaran Singh, Reena Marwah, 2022-08-05 This book focuses on emerging new multilateralism in the Indo Pacific and offers a useful analysis of various existing and evolving formulations and alignments in the region. The book problematises the evolution, relevance and changing contours of emerging economic and security architectures and connects these to various unilateral and multilateral initiatives that undergird the overall transformation in these economic and strategic multilaterals in this region. The chapters offer a comprehensive overview of organisations and institutions and the contributors provide their historical background and contemporary focus with implications for the future. Consequently, the book provides a balanced assessment of evolving trends elucidated by both its theoretical debates and empirical analyses. It assesses the outline and influence of non-traditional threats that have received only stand-alone and not integrated examination involving issues as climate change, piracy, smuggling and terrorist activity triggering a whole gamut of humanitarian and disaster relief strategies. Comprehensive in analysis and approach, the book will be of interest to scholars of Political Science, Foreign Policy, Security Studies, International Relations, International Political Economy and Area Studies including Asian, East Asian or Indo-Pacific Studies. [The Public Relations Strategic Toolkit](#) Alison Theaker, Heather Yaxley, 2017-10-12

The Public Relations Strategic Toolkit presents guidance to instruct and educate students and professionals of public relations and corporate communications. Alison Theaker and Heather Yaxley cover every aspect of critical practice including definitions of public relations, key theoretical concepts and both original and established methodological approaches. Case studies and interviews are featured to provide real-world context and advice for professional development. The new edition is fully revised with brand new case studies and updated content which reflect significant developments in theory and contemporary practice. It puts particular emphasis on the use of technology including automation and social media in current public relations, planning corporate communications and stakeholder engagement. The book is divided into four parts covering the profession, public relations, planning corporate communication and stakeholder engagement. Features include definitions of key terms, contemporary case studies, interviews with practitioners, handy checklists, practical activities and assignments. By combining theory and practice with an invaluable insight from experts in the field, this guide will introduce readers to all the professional skills needed for a career in public relations.

Global Financial Networked Governance Peter Knaack, 2022-12-30 Global Financial Networked Governance provides a careful analysis of the Financial Stability Board (FSB) and the standard setters under its umbrella to show how such government networks harness the power of public reputation to herd their members into compliance. The FSB's track record in coordinating global financial regulatory reform is uneven. Some items on its agenda have seen the rapid evolution of globally coordinated regulatory standards and their implementation by all member states, sometimes even ahead of the stipulated timelines. In contrast, other initiatives have stalled at different stages of the policymaking process, global

coordination is lacking deadlines have been missed and it is currently unclear when the post crisis financial reform project will come to completion if ever In this book the author asks the question why has the FSB succeeded in some areas of its global financial regulatory coordination work and not in others The book traces the global policymaking process in three major issue areas banking regulation Basel III over the counter OTC derivatives and ending too big to fail Through a combination of careful process tracing and rigorous testing against alternative explanations it challenges the existing literature by revealing that the institutional pathway of policymaking is the main predictor of FSB progress It shows that government networks on their own have succeeded in implementing globally coherent safety standards In contrast legislation and legislators in key G20 countries have limited the power and effectiveness of the FSB The author analyzes the causes and effects of this phenomenon and suggests a novel institutional solution to the effectiveness legitimacy dilemma that global governance forums face combining the advantages of functional specialization and electoral accountability This book will be of great interest to graduate students academics working at the intersection of economics political science and international law students of the FSB in particular and policymakers in global economic governance
