Essentials of Medical Transcription Cindy Destafano, Fran M. Federman, 2000 This modular based text builds competence for entry level medical transcription through scenario drills and a building block format It was conceived as a result of classroom experiences with student frustration Simulations provide students the opportunity to gain confidence and competence before they enter the workplace A free CD ROM is included with the text It provides realistic experiences through actual transcription exercises and personalized feedback from an automated error analysis chart and production for pay summary sheet Students experience the real world accountability of earning a paycheck *Essentials of Medical Transcription* Cindy Destafano, Fran M. Federman, 2003 This innovative hands on text guides readers through progressively more difficult scenario drills and office simulations helping them gain confidence as they master valuable transcription skills Using a building block format the first unit presents fundamental skills and knowledge that are

essential to medical transcription practice and the second unit lets readers take on the role of a medical transcriptionist working at an outpatient health care center. Students gain real world feedback on their transcription skills with interactive exercises on CD ROM with a Production for Pay Summary feature that calculates their adjusted earnings per hour for each document they complete. An Error Analysis chart categorizes and tracks undetected errors by noting the occurrence of repeated types of mistakes so students can track their own progress and learn more effectively. The modular building block approach presents segments of information followed immediately by exercises that reinforce material so students can continually progress to new topics. Competency based programmed learning approach makes it easy to clearly identify and measure the student's progress. Real world practice scenarios place the student in a simulated employee role providing a sense of on the job training for a fictitious health care center with its own rules and procedures. An Error Analysis chart for each document categorizes and tracks undetected errors by noting the occurrence of repeated types of mistakes differentiating between medical language errors and English language errors so students can identify problem areas and improve performance. Production for Pay Summary feature replaces the traditional evaluation process recording how quickly the document was created subtracting credit for errors and calculating the student's adjusted earnings per hour for that document just like earning a paycheck. A Microsoft Word compatible CD ROM offers pre tests and post tests proofreading exercises and actual transcription exercises plus an office simulation program that offers additional transcription practice with a self correcting feature that gives automatic feedback on the student's accuracy. *Outlines and Highlights for Essentials of Medical Transcription* Cram101 Textbook Reviews, 2011-05-01.
