Geography Paper 1 2013 June Memo:

The Drone Memos Jameel Jaffer, 2010-01-12 A trenchant summation and analysis of the legal rationales behind the US drone policy of targeted killing of suspected terrorists including US citizens Publishers Weekly starred review In the long response to 9 11 the US government initiated a deeply controversial policy of targeted killing the extrajudicial execution of suspected terrorists and militants typically via drones A remarkable effort was made to legitimize this practice one that most human rights experts agree is illegal and that the United States has historically condemned In The Drone Memos civil rights lawyer Jameel Jaffer presents and assesses the legal memos and policy documents that enabled the Obama administration to put this program into action In a lucid and provocative introduction Jaffer who led the ACLU legal team that secured the release of many of the documents evaluates the drone memos in light of domestic and international law He connects the documents legal abstractions to the real world violence they allow and makes the case that we are trading core principles of democracy and human rights for the illusion of security A careful study of a secretive counterterrorism infrastructure capable of sustaining endless orderless war this book is profoundly necessary Katrina vanden Heuvel editor and publisher of The Nation

Title Announcement Bulletin ,1956 *Decolonization and Conflict* Martin Thomas,Gareth Curless,2017-06-15 Insurgency based irregular warfare typifies armed conflict in the post Cold War age For some years now western and other governments have struggled to contend with ideologically driven guerrilla movements religiously inspired militias and systematic targeting of civilian populations Numerous conflicts of this type are rooted in experiences of empire breakdown Yet few multi empire studies of decolonisation s violence exist *Decolonization and Conflict* brings together expertise on a variety of different cases to offer new perspectives on the colonial conflicts that engulfed Europe s empires after 1945 The contributors analyse multiple forms of colonial counter insurgency from the military engagement of anti colonial movements to the forced removal of civilian populations and the application of new doctrines of psychological warfare Contributors to the collection also show how insurgencies their propaganda and methods of action were inherently transnational and inter connected The resulting study is a vital contribution to our understanding of contested decolonization It emphasises the global connections at work and reveals the contemporary resonances of both anti colonial insurgencies and the means devised to counter them It is essential reading for students and scholars of empire decolonization and asymmetric warfare

Islam and the Liberal State Stephen H. Jones,2020-11-26 National identity and liberal democracy are recurrent themes in debates about Muslim minorities in the West Britain is no exception with politicians responding to claims about Muslims lack of integration by mandating the promotion of fundamental British values including democracy and individual liberty This book engages with both these themes addressing the lack of understanding about the character of British Islam and its relationship to the liberal state It charts a gradual but decisive shift in British institutions concerned with Islamic education Islamic law and Muslim representation since Muslims settled in the UK in large numbers in the 1950s Based on empirical research including interviews undertaken over a ten year period with Muslims and

analysis of public events organized by Islamic institutions Stephen Jones challenges claims about the isolation of British Islamic organizations and shows that they have decisively shaped themselves around British public and institutional norms He argues that this amounts to the building of a distinctive British Islam Using this narrative the book makes the case for a variety of liberalism that is open to the expression of religious arguments in public and to associations between religious groups and the state It also offers a powerful challenge to claims about the insularity of British Islamic institutions by showing how the national orientation of Islam called for by British policymakers is in fact already happening Antarctica David Day,2013-05-03 Since the first sailing ships spied the Antarctic coastline in 1820 the frozen continent has captured the world's imagination David Day's brilliant biography of Antarctica describes in fascinating detail every aspect of this vast land's history two centuries of exploration scientific investigation and contentious geopolitics Drawing from archives from around the world Day provides a sweeping large scale history of Antarctica Focusing on the dynamic personalities drawn to this unconquered land the book offers an engaging collective biography of explorers and scientists battling the elements in the most hostile place on earth We see intrepid sea captains picking their way past icebergs and pushing to the edge of the shifting pack ice sanguinary sealers and whalers drawn south to exploit the Penguin El Dorado famed nineteenth century explorers like Scott and Amundson in their highly publicized race to the South Pole and aviators like Clarence Ellsworth and Richard Byrd flying over great stretches of undiscovered land Yet Antarctica is also the story of nations seeking to incorporate the Antarctic into their national narratives and to claim its frozen wastes as their own As Day shows in a place as remote as Antarctica claiming land was not just about seeing a place for the first time or raising a flag over it it was about mapping and naming and more generally knowing its geographic and natural features And ultimately after a little known decision by FDR to colonize Antarctica claiming territory meant establishing full time bases on the White Continent The end of the Second World War would see one last scramble for polar territory but the onset of the International Geophysical Year in 1957 would launch a cooperative effort to establish scientific bases across the continent And with the Antarctic Treaty science was in the ascendant and cooperation rather than competition was the new watchword on the ice Tracing history from the first sighting of land up to the present day Antarctica is a fascinating exploration of this deeply alluring land and man's struggle to claim it **Globalization, International Spillovers and Sectoral Changes** Charlie Karlsson,Andreas P. Cornett,Tina Wallin,2018-02-23 As a consequence of globalization news ideas and knowledge are moving quickly across national borders and generating international spillovers So too however are economic and financial crises Combining a variety of methods concepts and interdisciplinary approaches this book provides an in depth examination of these structural changes and their impact Assessing the implications of globalization for businesses and sectors chapters focus on the interdependencies between different economic and political layers and explore topics such as human capital creativity innovation networks and collaboration Horses, Power and Place Neil Ward,2023-12-05 Horses Power and Place explores

the evolution of humanity's relationship with horses from early domestication through to the use of the horse as a draught animal, an agricultural, industrial and military asset and an animal of sport and leisure. Taking a historical approach and using Britain as a case study, this is the first book-length exploration of the horse in the more than human geography of a nation. It traces the role and implications of horse-based mobility for the evolution of settlement structure, urban morphology and the rural landscape. It maps the growth and various uses of horses to the point of peak horse in the early twentieth century, before considering the contemporary place of the horse in twenty-first century economy and society. It assesses the role of the horse in the formation of places within Britain and in the formation of the nation. The book reflects on the implications of this historical and contemporary equine geography for animal geographies and animal studies. It argues for the study of animals in general in how places are made, not just by humans. Written in a clear and accessible style, this book will be essential reading for students and scholars of animal geography and animal studies more widely.

Conflict Areas in the Balkans Pinar Yürür, Arda Özkan, 2020-10-27 The situation in the Balkans, such as the solution to the status of Kosovo, is currently the largest international political problem in Europe, with the potential to burst into a world crisis regarding the Eastern-Western relations. On the other hand, a successful solution to the problem in the Balkans could serve as a model for solving the Muslim-Christian tensions elsewhere in the world. It is the intention of this book to contribute proposals for solutions to the problems of the Balkans. The starting principle for the solutions to be effective is that they should come in a natural way from the people below and should not be enforced by the political elites from above. Based on self-determination of nations as a starting principle, they should encourage intra-regional cooperation among the regional entities, economic, cultural, sport as a basis for political, social understanding and cooperation, secondly, accelerate their economic, political and social development, and thirdly, as a final step, enable the inclusion of the Balkan countries into the European Union.

The EU's Eastern Neighbourhood Ilkka Liikanen, James W. Scott, Tiina Sotkasiira, 2016-07-01 The collapse of the Soviet Union has had profound and long-lasting impacts on the societies of Eastern Europe, the South Caucasus and Central Asia, impacts which are not yet fully worked through. Changes in state-society relations, a comprehensive reconfiguration of political, economic and social ties, the resurgence of regional conflicts frozen during the Soviet period and new migration patterns both towards Russia and the European Union. At the same time, the EU has emerged as an important player in the region, formulating its European Neighbourhood Policy and engaging neighbouring states in a process of cross-border regional co-operation. This book explores a wide range of complex and contested questions related to borders, security and migration in the emerging European Neighbourhood, which includes countries of the Caucasus and Central Asia as well as the countries which immediately border the EU. Issues discussed include new forms of regional and cross-border co-operation, new patterns of migration and the potential role of the EU as a stabilizing external force.

America's Moment: Creating Opportunity in the Connected Age Rework

America, 2015-06-15 It is time for a new conversation Amid the biggest economic transformation in a century the challenge of our time is to make sure that all Americans benefit from the wave of digital revolutions around the world that have permeated and upended modern life Yet today's economic arguments seem stuck We need a new vision of a hopeful future and a new action agenda So many Americans are uncertain about the future How can there be so many paths to opportunity with so few people traveling them As a nation we have to understand what is required to help Americans succeed now and how to prepare our country for what comes next We have been here before A hundred years ago America experienced the greatest economic transformation and technological revolution in its history The transformation of the past twenty years as the world has moved through the information era into the digital age has turned our life and work upside down once again It is a time of tremendous change but also of tremendous possibility Rework America is a group of American leaders who know from experience the challenges we face and the potential solutions In America's Moment they suggest a practical agenda for an exciting future It is illustrated by people who are already showing the way and includes actions Americans can take today in their own communities preparing people to succeed using the reach of the Internet and data to innovate jobs and to reach new markets all over the world using technology to match employers and workers and transitioning to a no collar working world neither blue collar nor white collar Set against the history of how Americans succeeded once before in remaking their country America's Moment is about the future It describes how the same forces of change technology and a networked world can become tools that can open opportunity to everyone

The Urban Political Theresa Enright, Ugo Rossi, 2017-11-01

This book examines the political and economic trajectories of cities following the 2008 financial crisis The authors claim that in this era which they dub late neoliberalism urban spaces institutions subjectivities and organizational forms are undergoing processes of radical transformation and recomposition The volume deftly argues that the urban political horizon of late neoliberalism is ambivalent marked by many progressive mobilizations for equality and justice but also by regressive forces of austerity exploitation and domination

Kosovo and Serbia Leandrit I. Mehmeti, Branislav Radeljic, 2017-06-17

Azan on the Moon is an in depth anthropological study of people's lives along the Pamir Highway in eastern Tajikistan Constructed in the 1930s in rugged high altitude terrain the road fundamentally altered the material and social fabric of this former Soviet outpost on the border with Afghanistan and China The highway initially brought sentiments of disconnection and hardship followed by Soviet modernization and development and ultimately a sense of distinction from bordering countries and urban centers that continues to this day Based on extensive fieldwork and through an analysis of construction mobility technology media development Islam and the state Till Mostowlansky shows how ideas of modernity are both challenged and reinforced in contemporary Tajikistan In the wake of China's rise in Central Asia people along the Pamir Highway strive to reconcile a modern future with a modern past Weaving together the road a population and a region Azan on the Moon presents a rich

ethnography of global connections **The State of African Cities, 2014** United Nations Publications, 2015-09-10 The African continent is currently in the midst of simultaneously unfolding and highly significant demographic economic technological environmental urban and socio political transitions Africa s economic performance is promising with booming cities supporting growing middle classes and creating sizable consumer markets Despite significant overall growth the continent continues to suffer under very rapid urban growth accompanied by massive urban poverty and many other social problems These seem to indicate that the development trajectories followed by African nations since post independence may not be able to deliver on the aspirations of broad based human development and prosperity for all This report therefore argues for a bold re imagining of prevailing models in order to steer the ongoing transitions towards greater sustainability based on a thorough review of all available options That is especially the case since the already daunting urban challenges in Africa are now being exacerbated by the new vulnerabilities and threats associated with climate and environmental change
