Archaeology of the Red Sea Najeeb M.A. Rasul, Ian C.F. Stewart, 2018-12-05 This book gathers invited contributions from active researchers to provide an up to date overview of the geological setting of the Red Sea It discusses aspects ranging from historical information to modern research in the Red Sea and presents findings from rapidly advancing emerging fields This semi enclosed young ocean basin provides a unique opportunity to study the development of passive continental margins in order to examine the current status of that region In addition to studies on the Sea itself it includes those from related fields on the littoral zone The book is of interest to geoscientists and non specialists alike *Morgantina Studies, Volume VI* Shelley C. Stone, 2015-01-25 Excavation of the ancient city of Morgantina in southeastern Sicily since 1955 has recovered an extraordinary quantity and variety of pottery both locally made and imported This volume presents the fine ware pottery dating between the second half of the fourth century BCE when Morgantina was a thriving inland center closely tied to the

Hellenistic east through Syracuse and the first half of the first century CE when Morgantina had been reduced to a dwindling Roman provincial town that would soon be abandoned Bearing gloss and often paint or relief these fine ceramics were mostly tableware and together they provide a well defined picture of the evolving material culture of an important urban site over several centuries And since virtually all these vessels come from dated deposits this volume provides wide ranging contributions to the chronology of Hellenistic and early Roman pottery An introductory chapter sketches out a comprehensive history of the city discusses the many well dated archaeological deposits that contained the excavated pottery and defines the major fabrics of the ceramics found at the site The bulk of the volume consists of a scholarly presentation of more than 1 500 pottery vessels analyzing their shapes fabrics chronology decoration and techniques of fabrication This rich ceramic material includes significant bodies of Republican black gloss and red gloss vases Sicilian polychrome ware and Eastern Sigillata A as well as early Italian terra sigillata with numerous examples imported from Arezzo and other Italian centers along with regional versions from Campania and elsewhere on Sicily The relief ware includes important groups of third century BCE medallion cups and hemispherical moldmade cups of the second and first centuries BCE Morgantina was also an active center of pottery production and the debris from several workshops has been recovered enabling Shelley Stone to reconstruct the working techniques and materials of the local craftsmen the range of ceramics they produced and how their products were influenced by pottery imported to the site from elsewhere on Sicily the Italian mainland and even more distant centers The volume also presents new information about the sources of the clay used by the Morgantina potters as revealed by X ray fluorescence analysis of selected vases

The John also called Mark Dean Furlong, 2020-05-27 In this study, Dean Furlong examines the reception of John Mark in Christian tradition, discussing his identifications with both Mark the Evangelist and Mark the founder of the Alexandrian Church and positing that some ancient writers identified John Mark with John the Evangelist.

Digressions in Deep Time Declan Lloyd, Warren Mortimer, 2024-06-18 Deep time is a term which attempts to capture temporal scales far beyond human comprehension. These are stretches of time epitomised by geological and cosmic scale processes vast enough to make the entirety of human existence appear as little more than a footnote. The past few years have seen a boom in texts dedicated to the study of deep time, extending across a broad range of disciplines which fall markedly outside of its geological roots. These studies are unified by two ideas in particular: that deep time thinking and ecocriticism should be considered in conjunction, and that literature and the arts play a vital role in fostering a deep time awareness. *Digressions in Deep Time* is the first collection of essays which considers the multifarious representations of deep time across literature and the arts, assembling the work of a wide range of prominent scholars whose research frequently engages with temporality and ecocriticism. Featured contributions include work by the Pulitzer prize-winning author John McPhee, who popularised the term deep time in the late seventies, as well as chapters by Richard Irvine, author of *An Anthropology of Deep Time*, Benjamin Morgan, author of *The Outward Mind*, and Andrew Tate, author of *Apocalyptic Fiction*.

Water Culture in Roman Society Dylan Kelby Rogers, 2018-07-17 Water played an important part of ancient Roman life, from providing necessary drinking water, supplying bath complexes, to flowing in large-scale public fountains. The Roman culture of water was seen throughout the Roman Empire, although it was certainly not monolithic, and it could come in a variety of scales and forms based on climatic and social conditions of different areas. This article seeks to define water culture in Roman society by examining literary, epigraphic, and archaeological evidence while understanding modern trends in scholarship related to the study of Roman water. The culture of water can be demonstrated through expressions of power, aesthetics, and spectacle. Further, there was a shared experience of water in the empire that could be expressed through religion, landscape, and water's role in cultures of consumption and pleasure.

Water and Roman Urbanism Adam Rogers, 2013-04-15 *Water and Roman Urbanism: Towns, Waterscapes, Land Transformation and Experience in Roman Britain* offers a new perspective for

investigating Roman settlement and how urban spaces were created and experienced by focusing on the relationship between settlement and water and the meanings attributed to these places Rather than a descriptive approach to the urban fabric it emphasises social context and cultural meaning through interpretative frameworks of analysis Central are the cultural and experiential implications of water forming part of towns rather than economic and practical arguments and the way in which these places were used and altered over time The book emphasises a social approach and has considerable implications for our understanding of life in the Roman period as a whole *Engineering Geology and the Environment* Paul G. Marinos,1997 Archaic and Classical Greek Sicily Franco De Angelis,2016-03-01 Ancient Greek migrants in Sicily produced societies and economies that both paralleled and differed from their homeland Explanations for these similarities and differences have been hotly debated On the one hand some scholars have viewed the ancient Greeks as one in a long line of migrants who were shaped by Sicily and its inhabitants On the other hand other scholars have argued that the Greeks acted as the main source of innovation and achievement in the culture of ancient Sicily a culture that was still removed from that of mainland Greece Neither of these positions is completely satisfactory What is lacking in this debate is a basic framework for understanding ancient Sicily s social and economic history Archaic and Classical Greek Sicily represents the first ever systematic and comprehensive attempt to synthesize the historical and archaeological evidence and to deploy it to test the various historical models proposed over the past two centuries It adopts an interdisciplinary approach that combines classical and prehistoric studies texts and material culture and a variety of methods and theories to put the history of Greek Sicily on a completely new footing While Sicily and Greece had conjoined histories from the start their relationship was not one of periphery and center or of colony and state in any sense but of an interdependent and mutually enriching diaspora At the same time local conditions and peoples including Phoenician migrants also shaped the evolution of Sicilian Greek societies and economies This book reveals and explains the similarities and differences between developments in Greek Sicily and the mainland and brings greater clarity to the parts played by locals and immigrants in ancient Sicily s impressive achievements **Religion, Law and Security in Africa** M Christian Green,T Jeremy Gunn,Mark Hill,2018-05-16 Security is a key topic of our time But how do we understand it Do law and religion take different views of it In this fifth volume in the Law and Religion in Africa series radicalisation terrorism blasphemy hate speech religious freedom and just war theories rub shoulders with issues of witchcraft female genital mutilation circumcision child marriage displaced communities and additional issues besides This unique collection of topics is both challenging and inspiring providing illumination in troubled times and forming a sound foundation for future scholarship **Cities and the Shaping of Memory in the Ancient Near East** Ömür Harmanşah,2013-03-18 This book investigates the founding and building of cities in the ancient Near East The creation of new cities was imagined as an ideological project or a divine intervention in the political narratives and mythologies of Near Eastern cultures often masking the complex processes behind the social production of urban space

During the Early Iron Age c 1200 850 BCE Assyrian and Syro Hittite rulers developed a highly performative official discourse that revolved around constructing cities cultivating landscapes building watercourses erecting monuments and initiating public festivals This volume combs through archaeological epigraphic visual architectural and environmental evidence to tell the story of a region from the perspective of its spatial practices landscape history and architectural technologies It argues that the cultural processes of the making of urban spaces shape collective memory and identity as well as sites of political performance and state spectacle *Karst Aquifers - Characterization and Engineering* Zoran Stevanović, 2015-02-25 This practical training guidebook makes an important contribution to karst hydrogeology It presents supporting material for academic courses worldwide that include this and similar topics It is an excellent sourcebook for students and other attendees of the International Karst School Characterization and Engineering of Karst Aquifers which opened in Trebinje Bosnia Herzegovina in 2014 and which will be organized every year in early summer As opposed to more theoretical works this is a catalog of possible engineering interventions in karst and their implications Although the majority of readers will be professionals with geology hydrogeology backgrounds the language is not purely technical making it accessible to a wider audience This means that the methodology case studies and experiences presented will also benefit water managers working in karst environments *The Routledge Handbook of Teaching Landscape* Karsten Jørgensen, Nilgöl Karadeniz, Elke Mertens, Richard Stiles, 2019-03-04 Written in collaboration with the European Council of Landscape Architecture Schools ECLAS and LE NOTRE The Routledge Handbook of Teaching Landscape provides a wide ranging overview of teaching landscape subjects from geology to landscape design reflecting different perspectives and practices at university level landscape curricula Focusing on the didactics of landscape education this fully illustrated handbook presents and discusses pedagogy teaching traditions experimental teaching methods and new teaching principles The book is structured into three parts reading the landscape representing the landscape and transforming the landscape Contributions from leading experts in the field such as Simon Bell Marc Treib J rg Rekittke and Susan Herrington explore landscape analysis history and theory design visualisation creativity and art planning studio teaching field trips and site engineering Aimed at engaging academic researchers and instructors across disciplines such as landscape architecture geography ecology planning and archaeology this book is a must have guide to landscape pedagogy as it stands today **The Archaeology of Mediterranean Landscapes** Kevin Walsh, 2014 Reviews the palaeoenvironmental evidence and its incorporation with landscape archaeology across the Mediterranean from the Early Neolithic to the end of the Roman period **Water** Giulio Boccaletti, 2022-10-18 Spanning millennia and continents a revealing history that tackles the most important story of our time our relationship with water in a world of looming scarcity Kelly McEvers NPR Host Far more than a biography of its nominal subject The book stands as a compelling history of civilization itself The Wall Street Journal Book Review Writing with authority and brio Giulio Boccaletti honorary research associate at the Smith School of Enterprise and the Environment University of Oxford

shrewdly combines environmental and social history beginning with the earliest civilizations of sedentary farmers on the banks of the Nile the Tigris and the Euphrates Rivers Even as he describes how these societies were made possible by sea level changes from the last glacial melt he incisively examines how this type of farming led to irrigation and multiple cropping which in turn led to a population explosion and labor specialization We see with clarity how irrigation's structure informed social structure inventions such as the calendar sprung from agricultural necessity how in ancient Greece the communal ownership of wells laid the groundwork for democracy how the Greek and Roman experiences with water security resulted in systems of taxation and how the modern world as we know it began with a legal framework for the development of water infrastructure Extraordinary for its monumental scope and piercing insightfulness *Water A Biography* richly enlarges our understanding of our relationship to and fundamental reliance on the most elemental substance on earth

Diachronic Climatic Impacts on Water Resources Andreas N. Angelakis, Arie S. Issar, 2013-06-29 Since the beginning of man's existence on Earth the adequacy of available water has been as important as any other factor for man's survival and prosperity The volume comprises comprehensive reviews on Paleoenvironments of arid land climate water man interactions water resources in the Minoan era ancient Greek examples of avoiding water shortages climatic changes in the eastern Mediterranean region since 5000 B C climatic evolution in ancient civilizations based on fossil studies impact of climatic changes on groundwater and Mediterranean wetlands The book is written for civil and agricultural engineers hydrologists geologists environmental scientists and researchers It is also useful as a reference to consulting engineers agriculturists environmentalists and students
