Geopolitics Deep Oceans John Hannigan:

The Geopolitics of Deep Oceans John Hannigan, 2016-01-11 Long regarded as an empty and inhospitable environment the deep ocean is rapidly emerging as an ecological hot spot with a remarkable diversity of biological life Yet the worlds oceans are currently on a dangerous trajectory of decline threatened by acidification oil and gas drilling overfishing and in the long term deep sea mining bioprospecting and geo engineering In *The Geopolitics of Deep Oceans* noted environmental sociologist John Hannigan examines the past present and future of our planets final frontier The author argues that our understanding of the deep its definition boundaries value ownership health and future state depends on whether we see it first and foremost as a resource cornucopia a political chessboard a shared commons or a unique and threatened ecology He concludes by locating a new storyline that imagines the oceans as a canary in the mineshaft for gauging the impact of global climate change *The Geopolitics of Deep Oceans* is a unique introduction to the geography law politics and sociology of the sub surface ocean It will appeal to anyone seriously concerned about the present state and future fate of the largest single habitat for life on our planet

Rethinking Environmental Sociology John Hannigan, 2025-01-09 This unique and innovative book explores the sociology of environmental morality John Hannigan presents a unique framework by which we can understand the ongoing moralisation of environmental issues re interpreting the development of environmental sociology as a transition from moral learning to moral outrage

Global Blue Economy Md. Nazrul Islam, Steven M. Bartell, 2022-11-28 A global blue economy is an economic arena that depends on the benefits and values realized from the coastal and marine environments This book explains the sustainable blue economy as a marine based economy that provides social and economic benefits for current and future generations It restores protects and maintains the diversity productivity and resilience of marine ecosystems and is based on clean technologies renewable energy and circular material flows

Human Rights and Ocean Governance Mara Ntona, 2023-12-12 This book argues for the utility of human rights in the practice of ocean governance Maritime spatial planning MSP has become the dominant marine management paradigm with MSP frameworks already at various stages of elaboration and implementation in more than half of all coastal states However as experience with MSP accrues a central systemic shortcoming has become apparent insofar as the normative frameworks that underpin MSP tend to be grounded in a rationalistic and economistic worldview The result is a post political neoliberal approach to the implementation of MSP which favours technocratic fixes to complex societal problems over efforts to address underlying issues of power and inequality Building upon the new field of critical MSP studies this book offers a much neglected legal contribution More specifically it analyses the extent to which law and particularly human rights law can be utilised to meaningfully challenge the unjust patterns of human ocean interaction that MSP preserves or creates and so provide a vehicle for the formulation and realisation of transformative blue futures The book looks to human rights as norms that are uniquely capable of bringing into relief the values cause and effect relationships and uncertainties that prevailing

capitalist industrial framings of the ocean tend to downplay or worse disregard And so from a more pragmatic viewpoint the book argues that the policy and advocacy tools associated with human rights can be used within MSP processes to foster patterns of human ocean interaction which are more conducive to social and environmental justice This book will be of interest to legal and planning scholars geographers and others concerned with ocean governance and the blue turn in the social sciences and humanities more generally

Rise of the Spectacular John Hannigan, 2021-08-29 In this prequel to Fantasy City Pleasure and Profit in the Postmodern Metropolis 1998 his acclaimed book about the post industrial city as a site of theming branding and simulated spaces sociologist John Hannigan travels back in time to the 1950s Unfairly stereotyped as the tranquillized decade America at mid century hosted an escalating proliferation and conjunction of spectacular events spaces and technologies Spectacularization was collectively defined by five features It reflected and legitimated a dramatic increase in scale from the local regional to the national It was mediated by the increasingly popular medium of television It exploited middle class tension between comfortable conformity and desire for safe adventure It celebrated technological progress boosterism and military power It was orchestrated and marketed by a constellation sometimes a coalition of entrepreneurs and dream merchants most prominently Walt Disney In this wide ranging odyssey across mid century America Hannigan visits leisure parks Cypress Gardens parades Tournament of Roses mega events Squaw Valley Olympics Century 21 Exposition architectural styles desert modernism innovations underwater photography circular film projection and everyday wonders chemistry sets Collectively these fashioned the spectacular gaze a prism through which Americans in the 1950s were acculturated to and conscripted into a vision of a progressive technology based future Rise of the Spectacular will appeal to architects landscape designers geographers sociologists historians and leisure tourism researchers as well as non academic readers who are by a fascinating era in history

Neptune's Laboratory Antony Adler, 2019-11-19 We have long been fascinated with the oceans and sought to pierce the profundity of their depths But the history of marine science also tells us a lot about ourselves Antony Adler explores the ways in which scientists politicians and the public have invoked ocean environments in imagining the fate of humanity and of the planet

Elisabeth Mann Borgese and the Law of the Sea Tirza Meyer, 2022-03-21 In the late twentieth century as the United Nations struggled to come up with a new legal system for the oceans one woman saw the opportunity to promote radical new ideas of justice and internationalism Ocean governance expert Elisabeth Mann Borgese 1918 2002 spent decades working with the United Nations Law of the Sea Convention Throughout this sprawling series of global conferences she navigated allegiances and enmities intrigues and setbacks fighting determinedly to develop a just ocean order Featuring extensive research and new interviews with Mann Borgese's colleagues and family this book explores timeless questions of justice and international collaboration and asks whether the extraordinary drive and vision of a single person can influence the course of international law

Voluminous States Franck Billé, 2020-07-24 From the Arctic to the South China Sea states are vying to secure sovereign rights over vast maritime stretches undersea continental plates shifting ice flows airspace and the subsoil Conceiving of sovereign space as volume rather than area the contributors to Voluminous States explore how such a conception reveals and underscores the three dimensional nature of modern territorial governance In case studies ranging from the United States Europe and the Himalayas to Hong Kong Korea and Bangladesh the contributors outline how states are using airspace surveillance maritime patrols and subterranean monitoring to gain and exercise sovereignty over three dimensional space Whether examining how militaries are digging tunnels to create new theaters of operations the impacts of climate change on borders or the relation between borders and nonhuman ecologies they demonstrate that a three dimensional approach to studying borders is imperative for gaining a fuller understanding of sovereignty Contributors Debora Battaglia Franck Billé Wayne Chambliss Jason Cons Hilary Cunningham Scharper Klaus Dodds Elizabeth Cullen Dunn Gastón Gordillo Sarah Green Tina Harris Caroline Humphrey Marcel LaFlamme Lisa Sang Mi Min Aihwa Ong Clancy Wilmott Jerry Zee

A Blue New Deal Chris Armstrong, 2022-02-22 An urgent account of the state of our oceans today and what we must do to protect them The ocean sustains life on our planet from absorbing carbon to regulating temperatures and as we exhaust the resources to be found on land it is becoming central to the global market But today we are facing two urgent challenges at sea massive environmental destruction and spiraling inequality in the ocean economy Chris Armstrong reveals how existing governing institutions are failing to respond to the most pressing problems of our time arguing that we must do better Armstrong examines these crises from the fate of people whose lands will be submerged by sea level rise to the exploitation of people working in fishing to the rights of marine animals and makes the case for a powerful World Ocean Authority capable of tackling them A Blue New Deal presents a radical manifesto for putting equality democracy and sustainability at the heart of ocean politics

Brazil in the Geopolitics of Amazonia and Antarctica Fábio Albergaria de Queiroz, Guilherme Lopes da Cunha, Ana Flávia Barros-Platiau, 2023-08-22 The book presents a comprehensive and original

analysis from a Brazilian perspective of both traditional and emerging topics related to the so called El Dorados of the 21st century Amazonia and Antarctica By gathering distinguished scholars the resulting set of high level findings stemming from multiple epistemological standpoints provides important and innovative insights into the wide ranging geopolitical impacts of issues concerning these unique strategic ecosystems to the contemporary international environment The result is a sophisticated response to the following questions what were are and will be the contributions of Brazilian geopolitical thinking on these two themes Additionally from this intellectual exercise how do we interpret the role of Antarctica and Amazonia in shaping the current asymmetrical transnational architecture of power

Oceanic Histories David Armitage, Alison Bashford, Sujit Sivasundaram, 2018 Freshly presents world history through its oceans and seas in uniquely wide ranging original chapters by leading experts in their fields

Capitalism and the Sea Liam Campling, Alejandro Colás, 2021-01-05 Winner of the IPEG 2022 Book Prize The global ocean has through the centuries served as a trade route strategic space fish bank and supply chain for the modern capitalist economy While sea beds are drilled for their fossil fuels and minerals and coastlines developed for real estate and leisure the oceans continue to absorb the toxic discharges of our carbon civilization warming expanding and acidifying the blue water part of the planet in ways that will bring unpredictable but irreversible consequences for the rest of the biosphere In this bold and radical new book Campling and Colás analyse these and other sea related phenomena through a historical and geographical lens In successive chapters dealing with the political economy ecology and geopolitics of the sea the authors argue that the earth's geographical separation into land and sea has significant consequences for capitalist development The distinctive features of this mode of production continuously seek to transcend the land sea binary in an incessant quest for profit engendering new alignments of sovereignty exploitation and appropriation in the capture and coding of maritime spaces and resources

Widening the Scope of Environmental Policies in North America Gustavo Sosa-Nunez, 2017-08-22 This edited volume provides a variety of insights into the context in which ocean and wetlands policy is placed at the sub continental level The governments of Mexico Canada and United States of America have recognized the importance of conserving protecting and enhancing the environment in their territories As a result they have developed an institutional structure aimed at furthering environmental cooperation However marine environment has played a secondary role characterized by scientific cooperation that does not develop into regional policies This project analyzes how ocean and wetlands preservation is omitted from the North American Agreement on Environmental Cooperation meaning that collaborative efforts under perform or remain largely sidelined from mainstream issues As contributors come from a mix of the social and natural sciences politics international relations law studies sociology oceanology and oceanography this book presents diverse viewpoints on how to address wetlands protection deep ocean research collaboration and the marine context of the Sustainable Development Goals

Toxic and Intoxicating Oil Patricia Widener, 2021-03-12 When oil and gas exploration was expanding across Aotearoa New Zealand Patricia Widener was there

interviewing affected residents and environmental and climate activists and attending community meetings and anti drilling rallies Exploration was occurring on an unprecedented scale when oil disasters dwelled in recent memory socioecological worries were high campaigns for climate action were becoming global and transitioning toward a low carbon society seemed possible Yet unlike other communities who have experienced either an oil spill or hydraulic fracturing or offshore exploration or climate fears or disputes over unresolved Indigenous claims New Zealanders were facing each one almost simultaneously Collectively these grievances created the foundation for an organized civil society to construct and then magnify a comprehensive critical oil narrative in dialogue practice and aspiration Community advocates and socioecological activists mobilized for their health and well being for their neighborhoods and beaches for Planet Earth and Planet Ocean and for terrestrial and aquatic species and ecosystems They rallied against toxic climate altering pollution the extraction of fossil fuels a myriad of historic and contemporary inequities and for local just and sustainable communities ecologies economies and or energy sources In this allied ethnography quotes are used extensively to convey the tenor of some of the country s most passionate and committed people By analyzing the intersections of a social movement and the political economy of oil Widener reveals a nuanced story of oil resistance and promotion at a time when many anti drilling activists believed

themselves to be on the front lines of the industry s inevitable decline **Global Literary Studies** Diana Roig-Sanz,Neus Rotger,2022-12-05 While the very existence of global literary studies as an institutionalised field is not yet fully established the global turn in various disciplines in the humanities and the social sciences has been gaining traction in recent years This book aims to contribute to the field of global literary studies with a more inclusive and decentralising approach Specifically it responds to a double demand the need for expanding openness to other ways of seeing the global literary space by including multiple literary and cultural traditions and other interdisciplinary perspectives in the discussion and the need for conceptual models and different case studies that will help develop a global approach in four key avenues of research global translation flows and translation policies the post 1989 novel as a global form global literary environments and a global perspective on film and cinema history Gathering contributions from international scholars with expertise in various areas of research the volume is structured around five target concepts space scale time connectivity and agency We also take gender and LGBTQ perspectives as well as a digital approach The New Border Wars Klaus Dodds,2021-09-28 An enlightening look at

contemporary border tensions from the Gaza Strip to the space race by one of the world s leading experts in geopolitics Border expert Klaus Dodds journeys into the geopolitical clashes of tomorrow in an eye opening tour of border walls both literal and figurative In the Himalayas the Mediterranean and elsewhere the tension inherent to trying to divide the world into separate parcels has not gone away And with climate change shifting our natural borders from mountains to glaciers to rivers the question of how we live in a world that s becoming warmer and wetter and growing in population looms large With wide ranging insight and provocative analysis Dodds shows why we are more likely to see more walls barriers and

securitization in our daily lives The New Border Wars examines just what borders truly mean in the modern world How are they built what do they signify for citizens and governments and how do they help us understand our political past and most importantly our diplomatic future *The World's Oceans* Rainer F. Buschmann, Lance Nolde, 2025-01-23 Discover the science cultural history and environmental importance of our planet's oceans The second edition of this award winning encyclopedia has been updated throughout and includes more than 20 additional entries and highlights timely concerns including overfishing and microplastics while also providing expanded coverage of the role oceans play in modern society from cruise ships to the America's Cup competition Part I of the book features a collection of 10 thematic essays covering the five oceans of the world and broad areas of study such as the shipping industry and the changing nature of ocean boundaries Part II includes more than 115 encyclopedia entries exploring topics ranging from the Bermuda Triangle to maritime law from tsunamis to ocean acidification Sidebars throughout offer fascinating facts that complement the main text The oceans of the world are the lifeblood of our planet They act as a climate regulator absorbing heat and influencing weather patterns The oceans teem with a vast and mostly unexplored diversity of life providing us with food and medicine Historically oceans have been the highways of exploration and trade connecting continents and fostering cultural exchange From ancient Polynesian voyagers to modern shipping lanes societies have relied on the oceans for transportation and resources Yet despite their vastness and importance the world's oceans face numerous threats including the effects of climate change pollution and exploitation of their bounty **The Ocean Reader** Eric Paul Roorda, 2020-01-17 From prehistoric times to the present the Ocean has been used as a highway for trade a source of food and resources and a space for recreation and military conquest as well as an inspiration for religion culture and the arts The Ocean Reader charts humans relationship to the Ocean which has often been seen as a changeless space without a history It collects familiar forgotten and previously unpublished texts from all corners of the world Spanning antiquity to the present the volume's selections cover myriad topics including the slave trade explorers from China and the Middle East shipwrecks and castaways Caribbean and Somali pirates battles and U boats narratives of the Ocean's origins and the devastating effects of climate change Containing gems of maritime writing ranging from myth memoir poetry and scientific research to journalism song lyrics and scholarly writing The Ocean Reader is the essential guide for all those wanting to understand the complex and long history of the Ocean that covers over 70 percent of the planet *The Great Ages of Discovery* Stephen J. Pyne, 2021-02-23 For more than 600 years Western civilization has relied on exploration to learn about a wider world and universe The Great Ages of Discovery details the different eras of Western exploration in terms of its locations its intellectual contexts the characteristic moral conflicts that underwrote encounters and the grand gestures that distill an age into its essence Historian and MacArthur Fellow Stephen J Pyne identifies three great ages of discovery in his fascinating new book The first age of discovery ranged from the early 15th to the early 18th century sketched out the contours of the globe aligned with the Renaissance and had for its grandest

expression the circumnavigation of the world ocean The second age launched in the latter half of the 18th century spanning into the early 20th century carrying the Enlightenment along with it pairing especially with settler societies and had as its prize achievement the crossing of a continent The third age began after World War II and pivoting from Antarctica pushed into the deep oceans and interplanetary space Its grand gesture is Voyager s passage across the solar system Each age had in common a galvanic rivalry Spain and Portugal in the first age Britain and France followed by others in the second and the USSR and USA in the third With a deep and passionate knowledge of the history of Western exploration Pyne takes us on a journey across hundreds of years of geographic trekking The Great Ages of Discovery is an interpretive companion to what became Western civilization s quest narrative with the triumphs and tragedies that grand journey brought the legacies of which are still very much with us
