Excerpt from *George Westinghouse His Life and Achievements* Although George Westinghouse was in the broadest sense a public servant my own acquaintance with him was only social As he left behind him no diaries no files of personal correspondence and scarcely any other sources of supply on which the biographer of a political or military celebrity depends for much interesting material I have been obliged to rely in the main on the memories of the friends of Mr Westinghouse local tradition and gossip in neighborhoods where he had lived the records of courts and minutes of public meetings corporate reports and partnership account books old volumes of newspapers and magazines miscellaneous scrapbooks and the like One day let us hope we may have from the pen of some well known expert in technology an adequate summary of what the whole world s industrial advancement owes to the work of the eminent inventor The mission of the present volume is simply human It will have been accomplished if it conveys to the young man of today a sense that his career will depend for success less on the splendor of its start than on the spirit in which he pursues it far less on capital than on courage on worry than on watchfulness on pull than on persistence About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www](http://www.forgottenbooks.com)

*George Westinghouse* William R. Huber, 2022-02-14 While most know Thomas Edison for his invention of the light bulb, his counterpart George Westinghouse is too often overlooked. Westinghouse, however, became known as one of the most prolific inventors and businessmen of the Industrial Revolution. This biography reveals the man whose teachers suspected was mentally disabled and who quit college after one semester yet founded more than 60 different companies employing 50,000 people and received 361 U.S. patents. He later fought the Battle of the Currents (AC vs DC) with Thomas Edison and won. Westinghouse, with his engineers, provided power and light for the 1893 World's Columbian Exposition in Chicago. They harnessed the massive power of Niagara Falls and sent it over wires to light Buffalo and eventually the Northeast. His electric engines powered trains, and his air brakes stopped them. His scientific contributions forever changed the world.
