Geriatrics for Specialists Andrew G. Lee, Jane F. Potter, G. Michael Harper, 2021-08-31 This book aims to be a single point of reference for advances in the care of geriatric populations across medical and surgical specialties The aging population is a unique demographic with its own health challenges Geriatricians are specifically trained to address these challenges but few medical students or residents enter geriatrics even as the demand for geriatric expertise increases The practices of many medical and surgical specialists are dominated by older patients who may themselves see many specialists but rarely visit geriatricians This updated edition elucidates the most common medical conditions seen in aging patients and translates approaches to those conditions for physicians across specialties Divided into three sections that assemble crosscutting issues medical specialties and surgical and related specialties this book serves as a guide for clinicians of all backgrounds who will work with older patients as the demographic ages further This second edition of Geriatrics for Specialists expands the number of specialist chapters to reflect growth in

research in aging and clinical care for older people in dermatology plastic surgery and behavioral neurology All original chapters from the first edition are extensively revised and updated to reflect the rapid growth of new knowledge in the field

The Care of the Uninsured in America Nancy J. Johnson,Lane P. Johnson,2009-10-27 As Dr Cullen s chapter on information technology points out what is required is not just a new electronic system that follows the patients but a new language that creates and defines a system that can appropriately care for the patient What we design for the complexities of caring for the medically underserved can serve as model for caring for everyone in this country Many innovative bold and wonderful solutions have been developed as local regional models As communities and states we can learn from and support each other But the local models are not by and large self sustaining Ultimately so tions to the lack of medical insurance in this country will require a national persp tive and federal funding That is part of the work we all must do and Dr Dalen s chapter points out some of the possibilities and pitfalls other countries have experienced When I wonder how the system we have hasn t already collapsed from its own weight I just need to look at the people working within it Healthcare is a service industry and we have been blessed with professionals who understand and live the concept of service in their daily lives who go the extra mile for the patient despite the vagaries the barriers and the sometimes mean spiritedness of the organi tional infrastructure
