German Artillery Of World War Two:

German Artillery in World War II, 1939-1945 Joachim Engelmann, 1995 Never before in German military history did the German Artillery possess such variety and magnitude as in the World War II era From North Cape to Tobruk Biscaya to Lapland Den Helder to the Caucasus there were more than 1000 light and about 340 heavy artillery units as well as the light and heavy field howitzer units assault gun units brigades and batteries observation units railroad batteries mountain artillery units light gun units and launcher regiments The German Artillery included 655 000 men in 1943 or 22 percent of all the soldiers who went into action Thirty nine German gun types and forty captured gun types from ten different European countries were utilized by these units The German Artillery took on special significance in the spring of 1943 when the fighting strength of the exhausted infantry began to decrease and armored vehicles became less and less effective in their battle against overwhelming Soviet power During this period the Artillery again and again provided the backbone of the German resistance and defense This volume of photographs presents a look into the operations action and everyday life of the German artillery a frequently over looked aspect of Wehrmacht history

German Field Artillery of World War II Steven J. Zaloga, 2023-12-21 An illustrated study of the big guns of Hitler's army the Wehrmacht's field artillery its capabilities and its role in German fighting units of World War II Often overshadowed in military history by the tanks and aircraft of Blitzkrieg Germany's artillery was key to its methods of waging war throughout World War II Field artillery remained the primary killer on the battlefield often responsible for three quarters of combat casualties inflicted Redressing the balance this book surveys the major Wehrmacht guns of the war and the basic organizational structure of the German field artillery Its primary focus is on the divisional field guns especially the 180 5cm field howitzer and the 15cm sFH 18 field howitzer that formed the backbone of German artillery A brief survey is also made of the infantry guns used at the regimental level and of corps level heavy artillery The issue of the use of Beutewaffen captured war booty field guns is also looked at as is the Nebelwerfer and schwere Wurfgerät rocket artillery With archive photos and meticulously detailed new illustrations this book provides a concise study of the German Army's big guns of World War II how they were organized and how they were used both on the Eastern and Western fronts

German Artillery of World War Two Ian V. Hogg, 2013-10-12 The best reference there is to this day about the guns and ammunition used by the German armed forces in WW2 Military Modelling The complete story of German artillery during World War Two this illustrated volume is divided into sections according to the weapon classes Infantry Mountain and Field Artillery Heavy Field Artillery Heavy Artillery Railway Artillery Anti Aircraft Artillery Anti Tank Artillery Coastal Artillery and Recoilless Artillery German Artillery of World War Two also contains details of the general organization of the German artillery arm together with development histories of the weapons and their ammunition In addition the book contains a series of comprehensive data tables and appendices including a glossary of technical terms The first edition of this book published over twenty years ago is highly sought after by collectors

and enthusiasts today This new edition brings an enduring classic to a new generation of readers A classic on modern artillery by Ian V Hogg this volume is well established and must be regarded as a standard reference work on the subject Gun Mart This is both a valuable reference book and an absorbing read British Army Review *German Field Artillery of World War II* Steven J. Zaloga, 2023-12-19 An illustrated study of the big guns of Hitler's army the Wehrmacht's field artillery its capabilities and its role in German fighting units of World War II Often overshadowed in military history by the tanks and aircraft of Blitzkrieg Germany's artillery was key to its methods of waging war throughout World War II Field artillery remained the primary killer on the battlefield often responsible for three quarters of combat casualties inflicted Redressing the balance this book surveys the major Wehrmacht guns of the war and the basic organizational structure of the German field artillery Its primary focus is on the divisional field guns especially the LFH 18 10 5cm field howitzer and the 15cm sFH 18 field howitzer that formed the backbone of German artillery A brief survey is also made of the infantry guns used at the regimental level and of corps level heavy artillery The issue of the use of Beutewaffen captured war booty field guns is also looked at as is the Nebelwerfer and schwere Wurfgerät rocket artillery With archive photos and meticulously detailed new illustrations this book provides a concise study of the German Army's big guns of World War II how they were organized and how they were used both on the Eastern and Western fronts *World War II German Super-Heavy Siege Guns* Marc Romanych, Martin Rupp, 2020-07-23 As the outbreak of World War II approached Nazi Germany ordered artillery manufacturers Krupp and Rheinmetall-Borsig to build several super heavy siege guns vital to smash through French and Belgian fortresses that stood in the way of the Blitzkrieg These secret weapons were much larger than the siege artillery of World War I and included the largest artillery piece of the war the massive 80cm railway gun schwere Gustav Heavy Gustav However these complex and massive artillery pieces required years to build and test and as war drew near the German High Command hastily brought several WWI era heavy artillery pieces back into service and then purchased and later confiscated a large number of Czech Skoda mortars The new super siege guns began entering service in time for the invasion of Russia notably participating in the attack on the fortress of Brest Litovsk The highpoint for the siege artillery was the siege of Sevastopol in the summer of 1942 which saw the largest concentration of siege guns in the war Afterwards when Germany was on the defensive in the second half of 1943 the utility of the guns was greatly diminished and they were employed in a piecemeal and sporadic fashion on both the Eastern and Western Fronts In total the German Army used some 50 siege guns during World War II far more than the thirty five it had during World War I Supported by contemporary photographs and detailed artwork of the guns and their components this is an essential guide to these guns exploring their history development and deployment in stunning detail *German Self-Propelled Artillery Guns of the Second World War* Craig Moore, 2019-03-19 One of the few books that explores the design and deployment of German artillery self propelled guns SPGs to support tanks and infantry during the Second World War A great reference book for military modellers historians

and tank wargamers interested in German SPGs A comprehensive guide to German SPGs between 1939 and 1945 in one volume for the very first time including previously unpublished information on the little known Hummel Wespe proving that at least twelve units were built Authentic camouflage suggestions for military modellers A single towed artillery gun required a team of six horses and nine men During the Second World War German engineers mounted an artillery gun on top of a tank chassis this new technology reduced the amount of valuable war resources as self propelled guns only required a four or five man crew They could also be made ready to fire more rapidly German Self Propelled Artillery Guns of the Second World War covers the development and use of this new weapon between 1939 and 1945 One type was successfully deployed in the invasion of France in 1940 and more were used on the Eastern Front against Soviet forces from 1941 until the end of the war The Desert Fox Ewin Rommel demanded artillery guns that could keep up with his panzers in North Africa He was sent 15 cm howitzers mounted on top of Panzer II tank chassis and captured French Army Lorraine 37L tracked armoured supply vehicles Rommel s forces in northern France were equipped with a variety of new self propelled guns which were used against the Allies on the beaches of Normandy during D Day in 1944 Includes 81 colour photographs **German Heavy Field Artillery in World War II** Joachim Engelmann,1995 German heavy artillery as used on all fronts and with a variety of sizes and capabilities **World War Two in Europe** David T. illustrated history of Germany's World War II artillery its units and operations Photos include both the towed and self propelled weapon types Also included are detailed unit organizational charts and line schematics of artillery rounds *The Second World Wars* Victor Davis Hanson, 2017-10-17 A breathtakingly magisterial account of World War II by America's preeminent military historian Wall Street Journal World War II was the most lethal conflict in human history Never before had a war been fought on so many diverse landscapes and in so many different ways from rocket attacks in London to jungle fighting in Burma to armor strikes in Libya *The Second World Wars* examines how combat unfolded in the air at sea and on land to show how distinct conflicts among disparate combatants coalesced into one interconnected global war Drawing on 3 000 years of military history bestselling author Victor Davis Hanson argues that despite its novel industrial barbarity neither the war's origins nor its geography were unusual Nor was its ultimate outcome surprising The Axis powers were well prepared to win limited border conflicts but once they blundered into global war they had no hope of victory An authoritative new history of astonishing breadth *The Second World Wars* offers a stunning reinterpretation of history's deadliest conflict

The Encyclopedia of Weapons of World War II Chris Bishop, 2002 The encyclopedia of weapons of world war II is the most detailed and authoritative compendium of the weapons of mankind's greatest conflict ever published It is a must for the military enthusiast and all those interested in World War II *German Self-Propelled Artillery in WW II - Bison* Joachim Engelmann, 1997-01-07 This book covers the design and use of the self propelled armored vehicle Wespe in WWII

Germany at War David T. Zabecki, 2014-10-28 Written by experts for use by nonexperts this monumental work probes Germany's Genius for War and the unmistakable pattern of tactical and operational innovation and excellence evident throughout the nation's military history Despite having the best military forces in the world some of the most advanced weapons available and unparalleled tactical proficiency Germany still lost both World Wars This landmark four volume encyclopedia explores how and why that happened at the same time examining Germany as a military power from the start of the Thirty Years War in 1618 to the present day Coverage includes the Federal Republic of Germany its predecessor states and the kingdoms and principalities that combined to form Imperial Germany in 1871 The Seven Years War is discussed as are the Napoleonic Wars the Wars of German Unification including the Franco Prussian War World War I World War II and the Cold War In all more than 1 000 entries illuminate battles organizations leaders armies weapons and other aspects of war and military life The most comprehensive overview of German military history ever to appear in English this work will enable students and others interested in military history to better understand the sociopolitical history of Germany the complex role conflict has played in the nation throughout its history and why Germany continues to be an important player on the European continent *Operation Barbarossa: the Complete Organisational and Statistical Analysis, and Military Simulation Volume IIA* Nigel Askey, 2013-11-01 *Operation Barbarossa Volume IIA* concerns the Wehrmacht All the significant German weapon systems and combat squads used in the campaign are analysed using the quantitative methodology detailed in

Volume I along with the contextual history An assessment of each weapon system s inherent combat power is provided as well as attributes such as the relative anti tank anti personnel and anti aircraft values Volume IIA then focuses on the detailed Kriegstarkenachweisungen KStN or TOE for German land units including those in the West as well as the unit s actual organisation and equipment All significant units in the German Army Heer Waffen SS Luftwaffe and security forces are included ranging from the largest panzer divisions down to small anti aircraft companies military police units Landesschützen battalions and rail road and construction companies In all cases the data is presented in detailed tables using the weapon systems and combat squads previously analysed The Last German Victory Aaron Bates,2021-12-22 Operation Market Garden the Allied airborne invasion of German occupied Holland in September 1944 is one of the most famous and controversial Allied failures of the Second World War Many books have been written on the subject seeking to explain the defeat Historians have generally focused on the mistakes made by senior commanders as they organized the operation The choice of landing zones has been criticized as has the structure of the airlift plan But little attention has been paid to the influence that combat doctrine and training had upon the relative performance of the forces involved And it is this aspect that Aaron Bates emphasizes in this perceptive closely argued and absorbing re evaluation of the battle As he describes each phase of the fighting he shows how German training which gave their units a high degree of independence of action better equipped them to cope with the confusion created by the surprise Allied attack In contrast the British forces were hampered by their rigid and centralized approach which made it more difficult for them to adapt to the chaotic situation Aaron Bates s thought provoking study sheds fresh light on the course of the fighting around Arnhem and should lead to a deeper understanding of one of the most remarkable episodes in the final stage of the Second World War in western Europe

Montgomery and Colossal Cracks Stephen Hart,2000-05-30 A reinterpretation of the British Army s conduct in the crucial 1944 45 Northwest Europe campaign this work examines systematically the Colossal Cracks operational technique employed by Montgomery s Anglo Canadian 21st Army Group and demonstrates the key significance that morale and casualty concerns exerted on this technique To ensure a full understanding of the campaign one needs to look not only at Montgomery s methods but at those of his army commanders Dempsey and Crerar thus this study addresses the scant attention to date paid to these two figures Hart suggests that Montgomery and his two senior subordinates handled this formation more effectively than some scholars have suggested In fact Colossal Cracks the concentration of massive force at a point of German weakness represented the most appropriate weapon the 1944 British Army could develop under the circumstances Previous studies have been characterized by an overemphasis on Montgomery s role in the campaign rather than a systematic examination of overall British methods They have ignored the difficulties that the 1944 British Army faced given its manpower shortage and they have underestimated the appropriateness of Monty s methods to the campaign war aims that Britain pursued namely the desire that Britain s modest military forces secure a high profile within a larger Allied

effort The cautious firepower laden approach used by the 21st Army Group was both crude and a double edged sword however despite these weaknesses Colossal Cracks represented an appropriate technique given the nature of British war aims and the relative capabilities of the forces involved It proved to be just enough to defeat the Germans and keep alive British hopes that her war aims might be achieved
