Drawing on linguistics, educational psychology, and educational measurement, this book offers a fresh perspective on word learning and describes powerful, precise assessment strategies. Guidelines are presented for selecting which words to teach, evaluating the depth and richness of students' word knowledge, and their ability to apply it in complex contexts, designing effective instructional practices, and using technology to create adaptive and scalable assessments. Applying a disciplinary literacy approach, Fang describes the verbal and visual resources, expert strategies, inquiry skills, and habits of mind that students must learn in order to read carefully, critically, purposefully, and with an informed skepticism across genres and content areas. He also shows how teachers can promote language learning and reading literacy development at the same time that they engage students in content area learning. With informative synthesis and research-based recommendations in every chapter, this text prepares teachers to help students develop discipline-specific as well as discipline-relevant discursive insights, literacy strategies, and ways of thinking, reasoning, and inquiring that are essential to productive learning across academic subjects. It also provides teacher educators with approaches and strategies for helping teacher candidates develop expertise in academic reading instruction. In so doing, the book demystifies academic reading, revealing what it takes for students to read increasingly complex academic texts with confidence and understanding, and for teachers to develop expertise that promotes disciplinary literacy. This state-of-the-art text is ideal for courses on reading literacy methods and academic literacy and is eminently relevant to all educators who want their students to become thoughtful readers and powerful learners. **Literacy Triangle** LeAnn Nickelson, Melissa Dickson, 2022-06-28 Accelerate learning with high-impact strategies.
