Milton Friedman John Cunningham Wood, Ronald N. Woods, 1990 Presents a selection of the critical literature commenting on the life and work of Milton Friedman and so gives students of economics and economic thought immediate access to Friedman's work and shows how his work has been received and modified *Milton Friedman* Robert A. Cord, J. Daniel Hammond, 2016-05-20 Milton Friedman is widely regarded as one of the most influential economists of the twentieth century Although he made many important contributions to both economic theory and policy most clearly demonstrated by his development of and support for monetarism he was also active in various spheres of public policy where he more often than not pursued his championing of the free market and liberty This volume assesses the importance of the full range of Friedman's ideas from his work on methodology in economics his highly innovative consumption theory and his extensive research on monetary economics to his views on contentious social and political issues such as education conscription and drugs It also presents personal recollections of Friedman by some of those who knew him both as students and colleagues and offers new evidence on Friedman's interactions with other noted economists including George Stigler and Lionel Robbins The volume provides readers with an up to date account of Friedman's work and continuing influence and will help to inform and stimulate further research across a variety of areas including macroeconomics the history of economic thought as well as the development and different uses of public policy With contributions from a stellar cast this book will be invaluable to academics and students alike **Southern Economic Journal** , 1989 Contains section Book reviews *The Alternative* Nick Romeo, 2024-01-16 Winners Take All meets Nickel and Dimed in this provocative debunking of accepted wisdom providing the pathway to a sustainable survivable economy Confronted by the terrifying trends of the early twenty first century widening inequality environmental destruction and the immiseration of millions of workers around the world many economists and business leaders still preach dogmas that lack evidence and create political catastrophe Private markets are always more efficient than public ones investment capital flows efficiently to necessary projects massive inequality is the unavoidable side effect of economic growth people are selfish and will only behave well with the right incentives But a growing number of people academic economists business owners policy entrepreneurs and ordinary people are rejecting these myths and reshaping economies around the world to reflect ethical and social values Though they differ in approach all share a vision of the economy as a place of moral action and accountability Journalist Nick Romeo has spent years covering the world's most innovative economic and policy ideas for The New Yorker Romeo takes us on an extraordinary journey through the unforgettable stories and successes of people working to build economies that are more equal just and livable Combining original in depth reporting with expert analysis Romeo explores The successful business owners organizing their companies as purpose trusts as Patagonia recently did to fulfill a higher mission such as sharing profits with workers or protecting the environment The growing deployment of new models by venture capital funds to promote wealth creation for

the poorest Americans and address climate change How Oslo's climate budgeting program is achieving the emission reduction targets the rest of the world continues to miss creating a model that will soon be emulated by governments around the world How Portugal strengthens democratic culture by letting citizens make crucial budget decisions The way worker ownership and cooperatives foster innovation share wealth and improve the quality of jobs offering an increasingly popular model superior to the traditional corporation The public sector marketplace that offers decent work and real protections to gig workers in California The job guarantee program in southern Austria that offers high quality meaningful jobs to every citizen Many books have exposed what's not working in our current system Romeo reveals something even more essential the structure of a system that could actually work for everyone Margaret Thatcher was wrong there is an alternative This is what it looks like

**Phelps** Howard R. Vane, Chris Mulhearn, 2009 This groundbreaking series brings together a critical selection of key papers by the Nobel Memorial Laureates in Economics that have helped shape the development and present state of economics The editors have organised this comprehensive series by theme and each volume focuses on those Laureates working in the same broad area of study The careful selection of papers within each volume is set in context by an insightful introduction to the Laureates careers and main published works This landmark series will be an essential reference for scholars throughout the world [Apostles of Development](#) David C. Engerman, 2025-05-30

The battle against global poverty that began after World War II was a major undertaking engaging economists engineers and organizations Featuring front and centre were six remarkable economists Amartya Sen Manmohan Singh Mahbub ul Haq Jagdish Bhagwati Rehman Sobhan and Lal Jayawardena all born as colonial subjects in the British Empire and studied at Cambridge University They represented a new figure on the world scene the Third World development expert and played a crucial role in global debates about poverty and development [Apostles of Development](#) examines their different economic doctrines and the ongoing debate surrounding economic theory in poor countries compared to rich ones The lives of these apostles reveal how development did not begin with textbooks but with real world attempts to solve very specific and pressing problems Finally the book emphasizes that development was a Global South project first and foremost aiming to improve the conditions of the world's poorest countries It challenges the conventional wisdom that sees development only as a tool of rich countries to dominate or as proof of their humanitarian spirit It argues that development succeeds not when it follows ideological prescriptions but when it looks for what works The fading of grand visions shaped by ideological concerns has been one of the lasting effects of the end of the Cold War The book argues that the best way forward is determined modesty focusing on practical matters such as addressing

gross inequality and insisting that development means more than just economic growth Given the salience of questions of economic inequality and the constant visibility of the promises and problems of economic development in the world today this is a timely and important read

**Who's who in Finance and Industry** ,2001 **The Man Who Knew** Sebastian Mallaby,2017-12-05 Exceptional

Deeply researched and elegantly written As a description of the politics and pressures under which modern independent central banking has to operate the book is incomparable Financial Times The definitive biography of the most important economic statesman of our time from the bestselling author of The Power Law and More Money Than God Sebastian Mallaby's magisterial biography of Alan Greenspan the product of over five years of research based on untrammelled access to his subject and his closest professional and personal intimates brings into vivid focus the mysterious point where the government and the economy meet To understand Greenspan's story is to see the economic and political landscape of our time and the presidency from Reagan to George W Bush in a whole new light As the most influential economic statesman of his age Greenspan spent a lifetime grappling with a momentous shift the transformation of finance from the fixed and regulated system of the post war era to the free for all of the past quarter century The story of Greenspan is also the story of the making of modern finance for good and for ill Greenspan's life is a quintessential American success story raised by a single mother in the Jewish migr community of Washington Heights he was a math prodigy who found a niche as a stats crunching consultant A master at explaining the economic weather to captains of industry he translated that skill into advising Richard Nixon in his 1968 campaign This led to a perch on the White House Council of Economic Advisers and then to a dazzling array of business and government roles from which the path to the Fed was relatively clear A fire breathing libertarian and disciple of Ayn Rand in his youth who once called the Fed's creation a historic mistake Mallaby shows how Greenspan reinvented himself as a pragmatist once in power In his analysis and in his core mission of keeping inflation in check he was a maestro indeed and hailed as such At his retirement in 2006 he was lauded as the age's necessary man the veritable God in the machine the global economy's avatar His memoirs sold for record sums to publishers around the world But then came 2008 Mallaby's story lands with both feet on the great crash which did so much to damage Alan Greenspan's reputation Mallaby argues that the conventional wisdom is off base Greenspan wasn't a na ve ideologue who believed greater regulation was unnecessary He had pressed for greater regulation of some key areas of finance over the years and had gotten nowhere To argue that he didn't know the risks in irrational markets is to miss the point He knew more than almost anyone the question is why he didn't act and whether anyone else could or would have A close reading of Greenspan's life provides fascinating answers to these questions answers whose lessons we would do well to heed Because perhaps Mallaby's greatest lesson is that economic statesmanship like political statesmanship is the art of the possible The Man Who Knew is a searching reckoning with what exactly comprised the art and the possible in the career of Alan Greenspan
