*The Federalist Papers and the New Institutionalism* Bernard Grofman, Donald A. Wittman, 1989 The Madisonian approach to institutional design as set forth in The Federalist Papers is examined from the point of view of leading theorists of the public choice school who see themselves as the political heirs of that earlier legacy Bernard Grofman taught a course on representation in which the readings included both the Federalist

Papers and Buchanan and Tullock's Calculus of Consent. In teaching that course and as he writes forcing himself to reread the Federalist carefully for the first time since his own graduate student days his admiration for its authors already high grew

The New Institutional Economics and Development M.K. Nabli, Jeffrey B. Nugent, 2014-11-28 The New Institutional Economics NIE and its two main branches namely the theory of transaction cost and contractual choice on the one hand and that of collective action on the other broaden the analytical framework of mainstream economics. In doing so the NIE attempts to explain the institutional phenomena which although almost universally recognised as important have previously eluded the group of economists. This book is concerned with the NIE and its possible application to Development Economics. It has two specific objectives. The first is to show the relevance and assess the applicability of the principles and insights of the NIE to the analysis of the problems of the LDCs. The second is to provide another set of applications and empirical investigations of the NIE. By combining the relevant theoretical background with applications the book is self contained and presented in such a way as to be accessible to each of the following types of reader: 1 development economists and practitioners 2 readers interested in institutions and the NIE 3 regional specialists in North Africa and in countries such as Tunisia and 4 those interested in political economy. *Beyond Dissent: Essays in Institutional Economics* Philip A. It includes articles from Douglas North political scientist Robert Bates and John Tye. Informal Credit Markets And The New Institutional Economics Sagrario L. Floro, 2019-03-07 The conventional wisdom about credit markets has been radically altered in recent years through the introduction of elements of moral hazard adverse selection of risk and quality price relationships. Important empirical studies have been published which are leading to vastly different policy implications. This analysis has not been explicitly extended to informal credit markets so far although it is widely recognized that credit transacted outside the banking circuit is quantitatively huge and qualitatively critical especially in developing countries. This book combines the new theoretical approach to credit markets with certain precepts of the New Institutional Economics in order to analyze informal credit markets. While the formal financial institutions in developing countries carry out credit transactions within the limits set by the market environment and by government policies informal institutions evolve by a particular selection of modes of economic behavior which are responses to intrinsic

imperfections of the market The informal sector enhances trust by making existing ties an integral component of credit contracts the contractual component of informal credit capitalizes on the personalistic social and economic relationships between the transacting parties

New Institutional Economics as Situational Logic Piet de Vries, 2023-08-04 Drawing on phenomenological and realist approaches this book surveys the theoretical evolution of new institutional economics For all its popularity and explanatory power new institutional economics is not a homogenous field but encompasses a range of different theoretical approaches starting from Coase and the introduction of transaction costs In particular the concept of rationality is a rich source of dispute leading to a bifurcation between insider and outsider perspectives The insider view refers to studying conscious human beings the economic actor who seek their self interest and find themselves in their mundane situation The self interest of the economic actor bestows him with logic It makes the logic of the situation the method of economics as Karl Popper establishes Thus the book argues for the positioning of new institutional economics as situational logic that is an economic theory that formulates and studies single exit situations that face the economic actor Ultimately this book presents a critical appraisal of new institutional economics theories based on a substantiated methodological perspective that effectively navigates the theorist between realism and rigor This book will be of interest to readers of new institutional economics economic theory and the philosophy of economics and social sciences
