**The Oxford Handbook of Ecocriticism** Greg Garrard, 2014 The Oxford Handbook of Ecocriticism provides a broad survey of the longstanding relationship between literature and the environment The moment for such an offering is opportune in many respects multiple environmental crises are increasingly inescapable at both transnational and local levels the role of the humanities in addition to technology and politics is increasingly recognized as central for exploring and finding solutions and the subject of ecocriticism has reached a kind of critical mass both within its Anglo American heartlands and beyond From its origins in the study of American Nature Writing and British Romanticism ecocriticism has developed along numerous theoretical historical cultural and geographical axes the most contemporary and exciting of which will be represented in the Handbook The contributors include eminent founders of the field including Cheryll Glotfelty and Jonathan Bate a number of key second wave ecocritics and the best up and coming scholars Topics covered include Green Shakespeare the Bard's subversive uses of the pastoral John Clare's sacred relationship with the land Thoreau's profound political passion the natural landscape as symbol of postcolonial resistance in works by Lessing Naipaul and Coetzee the relation between feminism and environmentalism language and the concept of biosemiotics and concerns over pollution and toxicity in films like Erin Brockovitch Michael Clayton and Al Gore's An Inconvenient Truth

**A Biosemiotic Ontology** Felice Cimatti, 2018-11-14 Giorgio Prodi 1928-1987 was an important Italian scientist who developed an original philosophy based on two basic assumptions 1 life is mainly a semiotic phenomenon 2 matter is somewhat a semiotic phenomenon Prodi applies Peirce's cenopythagorean categories to all phenomena of life and matter Firstness Secondness and Thirdness They are interconnected meaning that the very ontology of the world according to Prodi is somewhat semiotic In fact when one describes matter as made of Firstness and Secondness this means that matter intrinsically implies semiotics with Thirdness also being present in the world At the very heart of Prodi's theory lies a metaphysical hypothesis which is an ambitious theoretical gesture that places Prodi in an awkward position with respect to the customary philosophical tradition In fact his own ontology is neither dualistic nor monistic Such a conclusion is unusual and weird but much less unusual in present time than it was when it was first introduced The actual resurgence of various realisms make Prodi's semiotic realism much more interesting than when he first proposed his philosophical approach What is uncommon in Prodi's perspective is that he never separated semiotics from the materiality of the world Prodi does not agree with the standard structuralist view of semiosis as an artificial and unnatural activity On the contrary Prodi believed semiosis that is the interconnection between Firstness Secondness and Thirdness lies at the very bottom of life On one hand Prodi maintains a strong realist stance on the other a realism that includes semiosis as natural phenomena This last view is very unusual because all forms more or less of realism exclude semiosis from nature but they frequently reduce semiosis to non semiotic elements According to Prodi semiosis is a

completely natural phenomenon      **Biosemiotic Medicine** Farzad Goli, 2016-08-02 This book presents an interpretation of pharmaceutical surgical and psychotherapeutic interventions based on a univalent metalanguage biosemiotics It proposes that a metalanguage for the physical mental social and cultural aspects of health and medicine could bring all parts and aspects of human life together and thus shape a picture of the human being as a whole made up from the heterogeneous images of the vast variety of sciences and technologies in medicine discourse The book adopts a biosemiotics clinical model of thinking because similar to the ancient principle of alchemy *tam ethice quam physice* everything in this model is physical as much as it is mental Signs in the forms of vibrations molecules cells words images reflections and rites conform cultural mental physical and social phenomena The book decodes healing dealing with health illness and therapy by emphasizing the first person experience as well as objective events It allows readers to follow the energy information flows through and between embodied minds and to see how they form physiological functions such as our emotions and narratives      The Democratization of Artificial Intelligence Andreas Sudmann, 2020-03-03 After a long time of neglect Artificial Intelligence is once again at the center of most of our political economic and socio cultural debates Recent advances in the field of Artificial Neural Networks have led to a renaissance of dystopian and utopian speculations on an AI rendered future Algorithmic technologies are deployed for identifying potential terrorists through vast surveillance networks for producing sentencing guidelines and recidivism risk profiles in criminal justice systems for demographic and psychographic targeting of bodies for advertising or propaganda and more generally for automating the analysis of language text and images Against this background the aim of this book is to discuss the heterogeneous conditions implications and effects of modern AI and Internet technologies in terms of their political dimension What does it mean to critically investigate efforts of net politics in the age of machine learning algorithms      **Bloomsbury Semiotics Volume 2: Semiotics in the Natural and Technical Sciences** Jamin Pelkey, Stéphanie Walsh Matthews, 2023-01-12 Bloomsbury Semiotics offers a state of the art overview of the entire field of semiotics by revealing its influence on a wide range of disciplinary perspectives With four volumes spanning theory method and practice across the disciplines this definitive reference work emphasizes and strengthens common bonds shared across intellectual cultures and facilitates the discovery and recovery of meaning across fields It comprises Volume 1 History and Semiosis Volume 2 Semiotics in the Natural and Technical Sciences Volume 3 Semiotics in the Arts and Social Sciences Volume 4 Semiotic Movements Written by leading international experts the chapters provide comprehensive overviews of the history and status of semiotic inquiry across a diverse range of traditions and disciplines Together they highlight key contemporary developments and debates along with ongoing research priorities Providing the most comprehensive and united overview of the field Bloomsbury Semiotics enables anyone from students to seasoned practitioners to better understand and benefit from semiotic insight and how it relates to their own area of study or research Volume 2 Semiotics in the Natural and Technical Sciences presents the state of the art in semiotic approaches to disciplines

ranging from mathematics and biology to neuroscience and medicine from evolutionary linguistics and animal behaviour studies to computing finance law architecture and design Each chapter casts a vision for future research priorities unanswered questions and fresh openings for semiotic participation in these and related fields      *Sign Studies and Semioethics* Susan Petrilli,2014-10-09 This book examines the issues surrounding the problematic perpetuation of dominant sign systems through the framework of semioethics Semioethics is concerned with using semiotics as a powerful tool to critique the status quo and move beyond the reproduction of the dominant order of communication The aim is to present semioethics as a method to engage semiotics in an active rethink of our ability as humans to affect change      *Handbook of Ecocriticism and Cultural Ecology* Hubert Zapf,2016-05-10 Ecocriticism has emerged as one of the most fascinating and rapidly growing fields of recent literary and cultural studies From its regional origins in late twentieth century Anglo American academia it has become a worldwide phenomenon which involves a decidedly transdisciplinary and transnational paradigm that promises to return a new sense of relevance to research and teaching in the humanities A distinctive feature of the present handbook in comparison with other survey volumes is the combination of ecocriticism with cultural ecology reflecting an emphasis on the cultural transformation of ecological processes and on the crucial role of literature art and other forms of cultural creativity for the evolution of societies towards sustainable futures In state of the art contributions by leading international scholars in the field this handbook maps some of the most important developments in contemporary ecocritical thought It introduces key theoretical concepts issues and directions of ecocriticism and cultural ecology and demonstrates their relevance for the analysis of texts and other cultural phenomena      Untying the Gordian Knot Timothy E. Eastman,2020-12-10 In Untying the Gordian Knot Process Reality and Context Timothy E Eastman proposes a new creative synthesis the Logoi framework which is radically inclusive and incorporates both actuality and potentiality to show how the fundamental notions of process logic and relations woven with triads of input output context and quantum logical distinctions can resolve a baker s dozen of age old philosophic problems Further Eastman leverages a century of advances in quantum physics and the Relational Realism interpretation pioneered by Michael Epperson and Elias Zafiris and augmented by the independent research of Ruth Kastner and Hans Primas to resolve long standing issues in understanding quantum physics Adding to this Eastman makes use of advances in information and complex systems semiotics and process philosophy to show how multiple levels of context combined with relations including potential relations both local and local global can provide a grounding for causation emergence and physical law Finally the Logoi framework goes beyond standard ways of knowing that of context independence science and context focus arts humanities to demonstrate the inevitable role of ultimate context meaning spiritual dimension as part of a transformative ecological vision which is urgently needed in these times of human and environmental crises      **Empirical Research on Semiotics and Visual Rhetoric** Danesi, Marcel,2018-02-23 The study of symbols has long been considered a necessary field to unravel concealed meanings in symbols and images These

methods have since established themselves as staples in various fields of psychology anthropology computer science and cognitive science Empirical Research on Semiotics and Visual Rhetoric is a critical academic publication that examines communication through images and symbols and the methods by which researchers and scientists analyze these images and symbols Featuring coverage on a wide range of topics such as material culture congruity theory and social media this publication is geared toward academicians researchers and students seeking current research on images symbols and how to analyze them 448 ,

*The Technique of Thought* Ian James, 2019-02-26

Interrogating the work of four contemporary French philosophers to rethink philosophy's relationship to science and science's relationship to reality *The Technique of Thought* explores the relationship between philosophy and science as articulated in the work of four contemporary French thinkers Jean Luc Nancy François Laruelle Catherine Malabou and Bernard Stiegler Situating their writings within both contemporary scientific debates and the philosophy of science Ian James elaborates a philosophical naturalism that is notably distinct from the Anglo American tradition The naturalism James proposes also diverges decisively from the ways in which continental philosophy has previously engaged with the sciences He explores the technical procedures and discursive methods used by each of the four thinkers as distinct techniques of thought that approach scientific understanding and knowledge experimentally Moving beyond debates about the constructed nature of scientific knowledge *The Technique of Thought* argues for a strong variably configured and entirely novel scientific realism By bringing together post phenomenological perspectives concerning individual or collective consciousness and first person qualitative experience with science's focus on objective and third person quantitative knowledge James tracks the emergence of a new image of the sciences and of scientific practice Stripped of aspirations toward total mastery of the universe or a

grand theory of everything this renewed scientific worldview along with the simultaneous reconfiguration of philosophy's relationship to science opens up new ways of interrogating immanent reality      **Archaeologies of waste** Daniel Sosna, Lenka Brunclíková, 2016-11-30 Waste represents a category of things which is familiar and ubiquitous but rarely reflected in archaeological and cultural studies Perception of waste changes over time and practices associated with waste vary The ambiguity of waste challenges traditional archaeological approaches that take advantage of refuse to infer past behavior Recent developments in research in the social sciences and humanities indicate that waste offers many more dimensions for exploration This interdisciplinary book brings together scholars who demonstrate the potential of research into waste for understanding humans non humans and their interrelations In 12 chapters the authors cover topics ranging from the relationship between waste and identity in early agricultural settlements to the perception of contemporary nuclear waste Although archaeological approaches dominate the contributions there are also chapters that represent the results of anthropological and historical research The book is structured into three main sections that explore the relationship between waste and three domains of interest value social differentiation and space Archaeologies of Waste will interest archaeologists anthropologists historians and other readers intrigued by the potential of things which were left behind to shed light on social life
