Essentials of Intellectual Property Rights Handong Wu, 2025-04-21 While undertaking economic social and judicial transformations unprecedented both in speed and scope China is finding its ways to establish an IPRs regime with its own characteristics Could China maintain its distinctive IPRs regime while honoring the international IPRs conventions Have rights of IP holders been duly protected in China How would China further enhance its IPRs legislation and enforcement in the near future Handong Wu China's leading IPRs scholar offers his insights from a nongovernmental perspective in hopes of providing readers both general and academic a vivid reflection of the IPRs system in China Unleashing the Startup Unicorn

Vivek Kale, 2024-01-30 It is well known that high tech startups need to innovate to survive yet the failure rate for innovation is shockingly high Nearly three out of four new products or services i e their startups miss their revenue and profit goals or fail entirely It's a misconception that high tech startups fail only because of the failing products or finances The failures could also be because of erroneous choice of technology platforms development teams or methodology or even the project execution Accordingly this book takes a holistic view of a startup's aesthetics that enables it to become attractive for all stakeholders especially investors in all aspects of its operations at all stages of its lifecycle This book Looks at aspects of venture capital financing and what investors look for in a contemporary startup Shows how only an overarching aspiration for a startup to become a Unicorn is sufficient to explain the typical characteristics of legendary Silicon Valley Unicorns like Google Facebook LinkedIn and Twitter Covers major application areas of current future interest namely intelligent systems intelligent assistants wireless sensor networks Internet of Things IoT and blockchain systems Introduces the contemporary skills set in demand for Startups To succinctly cover all aspects of a contemporary startup Unleashing the Startup Unicorn is organized to reflect the natural grouping of competencies that are essential for entrepreneurial ventures from conception to successful exit To understand and analyze these competencies the book uses an extended 9S model inspired by the pioneering McKinsey 7S model *The Cambridge Handbook of Technical Standardization Law* Jorge L.

Contreras, 2017-12-14 Technical standards are ubiquitous in the modern networked economy They allow products made and sold by different vendors to interoperate with little to no consumer effort and enable new market entrants to innovate on top of established technology platforms This groundbreaking volume edited by Jorge L Contreras assesses and analyzes the legal aspects of technical standards and standardization Bringing together more than thirty leading international scholars

advocates and policymakers it focuses on two of the most contentious and critical areas pertaining to standards today in key jurisdictions around the world antitrust competition law and patent law A subsequent volume will focus on international trade copyright and administrative law This comprehensive detailed examination sheds new light on the standards that shape the global technology marketplace and will serve as an indispensable tool for scholars practitioners judges and policymakers everywhere

The Intellectual Property Debate Meir Perez Pugatch, 2006-01-01 a lovely little book which is full of telling points Read it and you won't be disappointed Jeremy Phillips IPKat.com Meir Pugatch has done an excellent job by assembling an international and diverse cast of contributing authors who have offered new insights into a broad span of the most pressing IP related issues a collection of high quality articles by eminent authorities on IPR is very useful for scholars in the academic fields of law practitioners and government officials interested in the field of international trade and intellectual property policy intellectual property law technology transfer and valuation and international business Madhu Sahni Journal of Intellectual Property Rights Intellectual property IP has become one of the most influential and controversial issues in today's knowledge based society This challenging book exposes the reader to key issues at the heart of the public debate now taking place in the field of IP It considers IP at the macro level where it affects many issues These include international trade policy ownership of breakthrough technologies foreign direct investment innovation climates public private partnerships competition rules and public health where it is strongly embedded in contemporary business decision making Meir Pugatch has assembled an international and diverse cast of contributing authors who offer new insights into a broad span of the most pressing IP related issues They shed light on the increasing dominance of IP in the design and execution of basic and applied research the evaluation of intangible assets and the protection and management of knowledge assets underscoring its importance in relation to national economic development strategies and business strategies of knowledge based industries and companies The Intellectual Property Debate will appeal to scholars practitioners and government officials interested in the fields of international trade and intellectual property policy intellectual property law technology transfer and valuation and international business

The Law, Economics and Politics of International Standardisation Panagiotis Delimatsis, 2015-12-11 In an era of increased reliance on private regulatory bodies and globalised economic activity standardisation is the field where politics technical expertise and strategic behaviour meet and interact International standard setting bodies exemplify the rise of transnational governance and the challenges that it brings about relating to institutional choice legitimacy procedural and substantive fairness or transparency This book takes a more empirical based approach focusing on the mechanics of international standard setting It constitutes a multidisciplinary inquiry into the foundations of international standard setting an empirically under researched yet important area of international informal lawmaking Contributors expertly examine the peculiarities of international standardisation in selected issue areas and legal orders and shed light on the attributes of international standard setters allowing comparisons among standard setting bodies

with a view to identifying best practices and improve our understanding about standardisation processes **Patents** Marc Baudry, Béatrice Dumont, 2017-11-29 The patent system is criticized today by some practitioners and economists In fact there is a partial disconnection between patent demographics and productivity gains but also the development of actors who do not innovate and who develop business models that their detractors equate with a capture of annuities or a dangerous commodification of patents This book provides a less Manichaean view of the position of patents in the system of contemporary innovation It first recalls that these criticisms are not new before arguing that if these criticisms have been revived it is because of a partial shift from an integrated innovation system to a much more fragmented and open system This shift accompanied the promotion of a more competitive economy The authors show that this movement is coherent with a more intensive use of patents but also one that is more focused on their signal function than on their function of direct monetary incentive to innovation **The Law and Economics of Intellectual Property in the Digital Age** Niva Elkin-Koren, Eli Salzberger, 2012-11-27 This book explores the economic analysis of intellectual property law with a special emphasis on the Law and Economics of informational goods in light of the past decade's technological revolution In recent years there has been massive growth in the Law and Economics literature focusing on intellectual property on both normative and positive levels of analysis The economic approach to intellectual property is often described as a monolithic coherent approach that may differ only as it is applied to a particular case Yet the growing literature of Law and Economics in intellectual property does not speak in one voice The economic discourse used in legal scholarship and in policy making encompasses several strands each reflecting a fundamentally different approach to the economics of informational works and each grounded in a different ideology or methodological paradigm This book delineates the various economic approaches taken and analyzes their tenets It maps the fundamental concepts and the theoretical foundation of current economic analysis of intellectual property law in order to fully understand the ramifications of using economic analysis of law in policy making In so doing one begins to appreciate the limitations of the current frameworks in confronting the challenges of the information revolution The book addresses the fundamental adjustments in the methodology and underlying assumptions that must be employed in order for the economic approach to remain a useful analytical framework for addressing IPR in the information age The Essentials of Knowledge Management John S. Edwards, 2016-04-29 This book reviews the field of Knowledge Management taking a holistic approach that includes both soft and hard aspects It provides a broad perspective on the field rather than one based on a single viewpoints from Computer Science or Organizational Learning offering a comprehensive and integrated conception of Knowledge Management The chapters represent the best Knowledge Management articles published in the 21st century in Knowledge Management Research Practice and the European Journal of Information Systems with contributors including Ikujiro Nonaka Frada Burstein and David Schwartz Most of the chapters contribute significantly to practise as well as theory The OR Essentials series presents a unique cross section of high quality

research work fundamental to understanding contemporary issues and research across a range of Operational Research topics It brings together some of the best research papers from the highly respected journals of the Operational Research Society also published by Palgrave Macmillan

Intellectual Property, Competition Law and Economics in Asia R Ian McEwin, 2011-10-07 This book results from a conference held in Singapore in September 2009 that brought together distinguished lawyers and economists to examine the differences and similarities in the intersection between intellectual property and competition laws in Asia The prime focus was how best to balance these laws to improve economic welfare Countries in Asia have different levels of development and experience with intellectual property and competition laws Japan has the longest experience and now vigorously enforces both competition and intellectual property laws Most other countries in Asia have only recently introduced intellectual property laws due to the Trade Related Aspects of Intellectual Property Rights TRIPS Agreement and competition laws sometimes due to the World Bank International Monetary Fund or free trade agreements It would be naïve to think that laws even if similar on the surface have the same goals or can be enforced similarly Countries have differing degrees of acceptance of these laws different economic circumstances and differing legal and political institutions To set the scene Judge Doug Ginsburg Greg Sidak David Teece and Bill Kovacic look at the intersection of intellectual property and competition laws in the United States Next are country chapters on Asia each jointly authored by a lawyer and an economist The country chapters outline the institutional background to the intersection in each country discuss the policy underpinnings theoretically as well as describing actual policy initiatives analyse the case law in the area and make policy prescriptions

Licensing Standard Essential Patents Igor Nikolic, 2021-11-18 What is the licensing framework of standard essential patents SEPs for connectivity standards such as 5G and Wi Fi How will the framework change with the Internet of Things IoT This book provides comprehensive answers to these questions For over two decades connectivity standards have been the subject of litigation and controversy around the globe Now with the introduction of 5G and the emergence of the world of connected objects or the IoT the licensing framework for SEPs is becoming even more contentious In order to bring clarity to the debate this book analyses and explains key components of a fair reasonable and non discriminatory FRAND licence for SEPs clarifies the economic policy and market background of SEP disputes examines the interrelated application of contract patent and competition laws and describes the approaches by courts and regulators in the EU US and the UK Importantly the book also assesses how the experience from the smartphone and ICT industries can be applied in a new environment of the IoT and considers what needs to be changed in the future SEP licensing landscape The book provides a holistic coverage of SEP licensing issues in an attempt to reduce uncertainty within this highly complex and technical area and will be useful to practitioners policy makers SMEs and large technology companies in the IoT as well as academics interested in the field

Patenting of Pharmaceuticals and Development in Sub-Saharan Africa POKU ADUSEI, 2012-10-25 This book critically investigates the patent protection of medication in light of

the threats posed by HIV AIDS malaria and tuberculosis epidemics to the citizens of countries in Sub Saharan Africa hereinafter SSA or Africa The book outlines the systemic problems associated with the prevailing globalized patent regime and the regime s inability to promote access to life saving medication at affordable prices in SSA It argues that for pharmaceutical patents to retain their relevance in SSA countries human development concepts must be integrated into global patent law and policy making An integrative approach implies developing additional public health and human development exceptions limitations to the exercise of patent rights with the goal of scaling up access to medication that can treat epidemics in SSA By drawing on multiple perspectives of laws institutions practices and politics the book suggests that SSA countries adopt an evidence based approach to implementing global patent standards in domestic jurisdictions This evidence based approach would include mechanisms like local need assessments and the use of empirical data to shape domestic patent law making endeavors The approach also implies revising patent rules and policies with a pro poor and pro health emphasis so that medication will be more affordable and accessible to the citizens of SSA countries It also suggests considering the opinions of individuals and pro access institutions in enacting crucial pieces of health related statutes in SSA countries The approach in this book is sensitive to the public health needs of the citizens affected by epidemics and to the imperative of building local manufacturing facilities for pharmaceutical research and development in SSA
