Flesh and Blood George C. Denniston,Frederick Mansfield Hodges,Marilyn Fayre Milos,2013-03-09 Who owns your sex organs Different cultures today and in different epochs have given a variety of answers to this question It may seem self evident that every individual owns and has sovereignty over his or her own body parts such as the head legs nose stomach pancreas and other body parts The sex organs however seem to be an exception Even though they are as much an integral part of the individual as a leg or a liver the sex organs are unique in that many cultures have established laws and taboos over the use and even the mere display of the sex organs Thus certain cultures have placed constraints over the individual s ownership of his or her sex organs and actively regulate and restrict the individual s access and use of those organs In other cultures the question of ownership of the sex organs is more decisively answered In any culture where circumcision to any degree of either the male or female is practiced permitted encouraged or even merely

tolerated it is clear that the individual is not considered to own his own sex organs In the United States today the medical establishment has created an is considered acceptable and desirable that anyone for environment where it any reason can authorize or execute the amputation of the foreskin from a male child s penis *Frontiers in Clinical Drug Research - Anti-Allergy Agents* Atta-ur-Rahman,2018-07-11 *Frontiers in Clinical Drug Research Anti Allergy Agents* is a book series comprising of a selection of updated review articles relevant to the recent development of pharmacological agents used for the treatment of allergies The scope of the reviews includes clinical trials of anti inflammatory and anti allergic drugs drug delivery strategies used to treat specific allergies such as inflammation asthma and dermatological allergies lifestyle dependent modes of therapies and the immunological or metabolic mechanisms that are of interest to researchers as targets for new drugs The third volume of this series brings 5 reviews which cover the following topics H1 receptor selectivity chronic spontaneous urticaria therapy smooth muscle cell Ca² signaling pathway targeting for asthma therapy allergic rhinitis and endosomal toll like receptors *Frontiers in Clinical Drug Research Anti Allergy Agents* will be of interest to immunologists and drug discovery researchers interested in anti allergic drug therapy as the series provides relevant cutting edge reviews written by experts in this rapidly expanding field
