Routledge Revivals: Energy (1975) Denton Morrison, 2018-05-08 Originally published in 1975 Energy provides a comprehensive bibliography of energy in the context of the social sciences The book argues that energy problems are best seen in the context of social phenomena such as social attitudes social behaviours social institutions and structures and populations The authors argue that to examine energy problems outside of the context of social factors is to lack a full and detailed examination of the subject The bibliography provides a comprehensive collection of sources from a range of areas in the social sciences on the subject of energy International Handbook of Network Industries Matthias Finger, R. W. Kanneke, 2011 To learn about how economic and institutional forces have shaped the network industries and policies towards them read the first part of the book To discover their impacts on particular industries read the second part And to find out what has happened in particular countries read the third part I think anyone interested in network industries should read all of it The book's structure allows for many interesting comparisons across countries and sectors Richard Green University of Birmingham UK This is a very useful and comprehensive guide to reforms in network industries in communications energy transport and water It is organized by generic topic sector and region Its authors are acknowledged experts I am confident that this Handbook will be a widely read and valuable resource for many years Martin Cave London School of Economics UK Quite an accomplishment this Handbook provides by far the most comprehensive overview of the role of the private sector and competition in infrastructure industries with thoughtful surveys of each of the major infrastructure sectors and of the key regions and countries Jos Gemez Ib ez Harvard University US In recent decades all infrastructures have undergone significant restructuring This worldwide phenomenon is often labelled liberalization and although expectations were high with respect to lower prices greater efficiency and innovation the expected gains have not always been fully realized This extensive state of the art Handbook provides a comprehensive overview of the various experiences of liberalization across different sectors regions and disciplines The multidisciplinary approach focuses on the economic political and institutional aspects of liberalization as well as to a lesser extent on technological issues As such it constitutes a unique contribution as

this broad overview is often lost in the sector specific country focused and purely disciplinary approaches prevalent in the current literature Sectors explored include telecoms the Internet energy and transport whilst the truly global perspective incorporates unique case studies from an array of developed and developing countries including the US China India and the EU The International Handbook of Network Industries will become the definitive volume for academics researchers and students of economics political science and law interested in infrastructure regulation It will also prove a valuable guide to practitioners and policy makers involved in liberalization and competition

Chalabi, 2010-11-30 The Organisation of Petroleum Exporting Countries commonly known as OPEC has been a notoriously opaque and mysterious organization In this book Fadil J Chalabi an insider who spent many years at the heart of the organization as Iraq's permanent undersecretary for oil invites us to discover the intrigue and arguments that have shaped OPEC policy since its inception in 1960 The author interweaves his analysis with first hand experiences that give authenticity to momentous events including the infamous 1975 Vienna hostage taking when Carlos the Jackal kidnapped a number of OPEC ministers including the author From the time of Egypt under Nasser Gaddafi's Libya Saddam's Iraq and Khomeini's Iranian revolution Chalabi uses his unique position and his unparalleled insider knowledge to illuminate an organization that has at times been accused of fomenting economic turmoil political unrest and even military action Benefiting from the perspective of an insider who understands the inner workings of OPEC and its dramatic impact on world politics and economics this book is an essential read for those who wish to look beyond the myths of this highly influential and at times controversial organization Oil Empire Alison Fleig FRANK, 2009-06-30 At the beginning of the twentieth century the Austrian Empire ranked third among the world's oil producing states surpassed only by the United States and Russia and accounted for five percent of global oil production By 1918 the Central Powers did not have enough oil to maintain a modern military How and why did the promise of oil fail Galicia the province producing the oil and the Empire In a brilliantly conceived work Alison Frank traces the interaction of technology nationalist rhetoric social tensions provincial politics and entrepreneurial vision in shaping the Galician oil industry She portrays this often overlooked oil boom's transformation of the environment and its reorientation of religious and social divisions that had defined a previously agrarian population as surprising alliances among traditional foes sprang up among workers and entrepreneurs at the workplace and in the pubs and brothels of new oil towns Frank sets this complex story in a context of international finance technological exchange and Habsburg history as a sobering counterpoint to traditional modernization narratives As the oil ran out the economy the population and the environment returned largely to their former state reminding us that there is nothing ineluctable about the consequences of industrial development *The Energy Politics of Enrico Mattei in the Context of the Mediterranean Area* Pinella Di Gregorio, 2025-05-06 This book deals with Italy's relationship with the Mediterranean Sea into which the peninsula extends In an international context divided into opposing blocs Enrico Mattei engaged the National Hydrocarbons Board ENI founded in 1953 on two fronts On the international front defying the power of the Seven Sisters he presented ENI as a Third Worldist model for countries on the path towards decolonization domestically focused on the development of the Italian economy In this regard Mattei firmly believed that Sicily could play a central role connecting the two shores of the Mediterranean region As a matter of fact the constant and heartfelt reference to the Resistance as a
