Spectral and Shape Analysis in Medical Imaging Martin Reuter, Christian Wachinger, Hervé Lombaert, 2016-12-10 This book constitutes the refereed post conference proceedings of the First International Workshop on Spectral and Shape Analysis in Medical Imaging SeSAMI 2016 held in conjunction with MICCAI 2016 in Athens Greece in October 2016 The 10 submitted full papers presented in this volume were carefully reviewed The papers reflect the following topics spectral methods longitudinal methods and shape methods **Topics in the Geometric Theory of Linear Systems** Robert Hermann, 1984 **Technical Translations**, 1963-10 IEEE Transactions on Information Theory, 1960 **Pulse Code Modulation Techniques** Bill Waggener, William N. Waggener, 1995 *Pulse Code Modulation Techniques* brings together the theory and practice of PCM at the physical layer where the bits meet the silicon so to speak The key topics of symbol encoding detection and synchronization are discussed in detail both from a theoretical and a practical standpoint Topics which have been largely absent in text books such as multiplexing formatting and format synchronization are also considered Although PCM evolved as a communication technology it has become an important technology in data recording In a sense magnetic or optical media are just specialized communication media and the key technologies discussed in this book are just as important to recording applications as to communications PCM codes used for magnetic recording applications are discussed along with traditional communication codes The design analysis and implementation of a PCM system requires knowledge of very specific techniques associated with detection synchronization and coding The techniques have evolved from both ad hoc methods and complex theory One of the goals of this book is to bridge the gap between theory and practice in the key techniques Matched filters are not only discussed theoretically but means for implementing them are also considered The same is true with symbol synchronization *IRE Transactions on Information Theory*, 1958
