## **Geopolitika:**

**Geopolitical Imagination** Mikhail Suslov, 2020-11-02 In his timely book Mikhail Suslov discusses contemporary Russian geopolitical culture and argues that a better knowledge of geopolitical concepts and fantasies is instrumental for understanding Russia's policies. Specifically, he analyzes such concepts as Eurasianism, Holy Russia, Russian civilization, Russia as a continent, Novorossia, and others. He demonstrates that these concepts reached unprecedented ascendancy in the Russian public debates, tending to overshadow other political and domestic discussions. Suslov argues that the geopolitical imagination structured by these concepts defines the identity of post-Soviet Russia, while this complex of geopolitical representations engages at the same time with the broader international criticism of the Western liberal world order and aligns itself with the conservative defense of cultural authenticity across the globe. Geopolitical ideologies and utopias discussed in the book give the post-Soviet political mainstream the intellectual instruments to think about Russia's exclusion, imaginary or otherwise, from the processes of a global world which is reshaping itself after the end of the Cold War. They provide tools to construct the self-perception of Russia as a sovereign great power, a self-sufficient civilization, and as one of the poles in a multipolar world, and they help to establish the Messianic vision of Russia as the beacon of order, tradition, and morality in a sea of chaos and corruption.

**Understanding Central Europe** Marcin Moskalewicz, Wojciech Przybylski, 2017-11-20 Central Europe is a vague and ambiguous term, more to do with outlook and a state of mind than with a firmly defined geographical region. In the immediate aftermath of the collapse of the Iron Curtain, Central Europeans considered themselves to be culturally part of the West, which had been politically handicapped by the Eastern Soviet bloc. More recently, and with European Union membership, Central Europeans are increasingly thinking of themselves as politically part of the West but culturally part of the East. This book, with contributions from a large number of scholars from the region, explores the concept of Central Europe and a number of other political concepts from an openly Central European perspective. It considers a wide range of issues, including politics, nationalism, democracy, and the impact of culture, art, and history. Overall, the book casts a great deal of light on the complex nature of Central Europe.

**Global Geostrategy** Brian Blouet, 2020-09-23 This is a new examination of Halford Mackinder's seminal global geostrategic work from the perspective of geography, diplomatic history, political science, international relations, imperial history, and the space age. Mackinder was a man ahead of his time. He foresaw many of the key strategic issues that came to dominate the twentieth century. Until the disintegration of the Soviet Union, western defence strategists feared that one power or alliance might come to dominate Eurasia. Admiral Mahan discussed this issue in *The Problem of Asia* (1900), but Mackinder made the most authoritative statement in *The Geographical Pivot of History* (1904). He argued that in the closed Heart Land of Euroasia was a strategically placed region with great resources that, if controlled by one force, could be the basis of a World Empire. James Kurth in *Foreign Affairs* has commented that it has taken two World Wars and the Cold War to prevent Mackinder's prophecy.

becoming reality In World War I and World War II Germany achieved huge territorial gains at the expense of the Russian empire and the Soviet Union In the former conflict the Russian empire was defeated by Germany but the western powers insisted that the territorial gains made by Germany at the treaty of Brest Litovsk be given up In World War II Britain and the US gave material support to Stalin's totalitarian regime to prevent Nazi Germany gaining control of the territory and resources that might have been a basis for world domination The west highly conscious of Mackinder's dictum 1919 that Who rules East Europe commands the Heartland quickly adopted policies to contain the Soviet Union History has therefore proved Mackinder's work to be of vital importance to generations of strategic thinking and he remains a key influence in the new millennium This book will be of great interest to all students and scholars of strategic studies and military history and of geopolitics in particular
