Geriatric Palliative Care:

Geriatric Palliative Care Suzanne Goldhirsch, 2014-04-11 The growing geriatric population in the United States has created an increasing need for palliative medicine services across the range of medical and surgical specialties Yet palliative medicine lacks the resources to carry such a workload itself Geriatric Palliative Care addresses this need by encouraging individual specialties to own the management of elderly with the same vigor as they own other key management competencies within their specialty This clinically focused and highly practical handbook which compliments the more comprehensive text Geriatric Palliative Care by Sean Morrison and Diane Meier Oxford University Press 2003 encourages this process of learning and ownership across many medical specialties Designed to be readable and easily accessible to a range of health care providers Geriatric Palliative Care outlines specific strategies for caring for specific palliative care issues common in elderly patients The handbook also provides evidence based advice for helping patients relatives and staff cope with such issues as polypharmacy dementia and consent multiple pathologies home care elderly caregivers and supporting the elderly in the place where they would like to be Geriatric Palliative Care, An Issue of Clinics in Geriatric Medicine Madeline Leong, 2015-06-14 This issue of Clinics in Geriatric Medicine is devoted to Palliative Care Guest Editors Thomas Smith MD and Madeline Leong MD have assembled a group of expert authors to review the following topics Palliative Care in the Era of Healthcare Redesign Communications to Patients Communications by Professionals International Palliative Care Public Health and Palliative Care Culturally Relevant Palliative Care Spirituality Religion and Healing in Palliative Care Alternative Complementary and Mainstream Therapies in Palliative Care Symptom Management in the Older Adult Interaction of Palliative Care and Primary Care Palliative Care in the Ambulatory Geriatric Practice Choosing Cancer Therapy Based on Geriatric Assessment and Emergency Medicine and Palliative Care **Palliative Care, An Issue of Clinics in Geriatric Medicine, E-Book** Kimberly A Curseen, 2023-07-01 In this issue of Clinics in Geriatric Medicine guest editor Dr Kimberly A Curseen brings her considerable expertise to the topic of Palliative Care Top experts in the field cover key topics such as palliative care in the ambulatory geriatric end stage heart failure the intersection of palliative care and primary care public health and palliative care advanced care planning in the geriatric population and more Contains 13 relevant practice oriented topics including diversity equity and inclusion in geriatrics palliative care considerations providing palliative care to LGBTQ older adults palliative care for seriously ill older veterans entheogenic medications psychedelic cannabis integrative medicine for older adults palliative care for the geriatric cancer patient and more Provides in depth clinical reviews on palliative care in geriatric medicine offering actionable insights for clinical practice Presents the latest information on this timely focused topic under the leadership of experienced editors in the field Authors synthesize and distill the latest research and practice guidelines to create clinically significant topic based reviews **Geriatric Palliative Care** R. Sean Morrison, Diane E. Meier, 2003-05-08 Geriatric Palliative Care covers a broad spectrum of issues characterizing care

near the end of life for older adults Beginning with the social and cultural context of old age and frailty this volume details specific aspects of palliative care relevant to particular disorders e g cancer strokes dementia etc as well as individual symptoms e g pain fatigue anxiety etc Communication between care givers and patients in a variety of settings is also discussed The theme of this book is that palliative care is the best approach to the care of chronically ill and frail elderly because of its focus on quality of life support for functional independence and the centrality of the patient s values and experiences in determining the goals of medical care Indeed Geriatric Palliative Care provides a comprehensive medical reference for all clinicians who care for older adults Challenges in Long-term Geriatric and Palliative Care Jochanan E.

Naschitz,2020 Practice guidelines for management of conditions prevalent in long term geriatric care are based by and large on expert consensus and rarely on controlled studies Though enforced by tradition some of the rules often applied in clinical practice fall short of scientific foundation In lacking high grade scientific evidence geriatric practice might benefit from an evidence balanced approach A step forward in this direction is by corroboration of observational data In this book we brought our share of observational data input from our experience in geriatric care to be merged with the profession s collective information base Seventy five case histories illustrate a variety of conditions met at the bedside some of them challenging the clinician s expertise and judgement We hope that illustrating clinical practice in the real world might be a suitable addition for physicians **Palliative Care, an Issue of Clinics in Geriatric Medicine: Volume 39-3** Kimberly A.

Ingleton,2011-05-12 Ageing populations mean that palliative and end of life care for older people must assume greater priority Indeed there is an urgent need to improve the experiences of older people at the end of life given that they have been identified as the disadvantaged dying To date models of care are underpinned by the ideals of specialist palliative care which were developed to meet the needs of predominantly middle aged and young old people and evidence suggests these may not be adequate for the older population group This book identifies ways forward for improving the end of life experiences of

older people by taking an interdisciplinary and international approach Providing a synergy between the currently disparate literature of gerontology and palliative care a wide range of leading international experts contribute to discussions regarding priority areas in relation to ageing and end of life care Some authors take a theoretical focus others a very practical approach rooted in their clinical and research experience The issues covered are diverse as are the countries in which discussions are contextualised Those working in both palliative care and gerontology will find the issues and advice discussed in this book hugely topical and of real practical value

Advanced Age Geriatric Care Nages Nagaratnam, Kujan Nagaratnam, Gary Cheuk, 2018-11-26 As the Baby Boomers age concerns over healthcare systems abilities to accommodate geriatric patients grow increasingly challenging This is especially true with the population deemed to be the oldest of the old specifically those over the age of 85 Unlike any other time in history this demographic is the fastest growing segment of most developed countries In the United States the oldest old is projected to double from 4.3 million to 9.6 million by 2030 The increased life expectancy of the population since the early 1900s has been built on the improvement of living conditions diet public health and advancement in medical care With this we have seen a steady decline in the age specific prevalence of vascular and heart diseases stroke and even dementia Older persons are healthier today than their counterparts decades ago More importantly than in any other age group the care of the oldest old must be individualized management decisions should be made taking into consideration the older persons expressed wishes quality of life function and mental capacity The inevitable consequence is that there will be an increase in the prevalence of older persons with chronic diseases multiple co existing pathologies and neuro degenerative diseases The oldest of the aging population are often excluded from drug trials and their treatments are largely based on findings extrapolated from that of the younger old Furthermore among the oldest old physiologically they are more diverse than other segments of the population Their demographic characteristics are unparalleled and different compared to that of the younger old Several studies have drawn attention to the differing attitudes among health professionals towards elderly people and many show prejudice because they are old As a result the use of age as a criteria in determining the appropriateness of treatment is of very limited validity yet there are limited resources that guide physicians through these challenges This book creates a greater awareness of these challenges and offers practical guidelines for working within the infrastructures vital to this demographic This book is designed for geriatricians primary

care physicians junior medical officers specialty geriatrics nurses and gerontologists It is divided into 3 sections General Considerations Chronic diseases and Geriatric Syndromes Each chapter provides a summary of important and essential information under the heading of Key Points Case studies are included in some of the chapters to highlight the principles of management **Primary Care Geriatrics** Richard J.
