**Lobbying in the 21st Century Transparency, Integrity and Access** OECD,2021-05-20 Lobbying as a way to influence and inform governments has been part of democracy for at least two centuries and remains a legitimate tool for influencing public policies However it carries risks of undue influence *More* Philip Coggan,2020-03-24 A sweeping history that tracks the development of trade and industry across the world from Ancient Rome to today From the development of international trade fairs in the twelfth century to the innovations made in China India and the Arab world it turns out that historical economies were much more sophisticated than we might imagine tied together by webs of credit and financial instruments much like our modern economy Here Philip Coggan takes us from the ancient mountains of North Wales through Grand Central station and the great civilizations of Mesopotamia to the factories of Malaysia showing how changes in agriculture finance technology work and demographics have driven the progress of human civilization It's the story of how trade became broader and deeper over thousands of years how governments have influenced economies for good or ill and how societies have repeatedly tried to tame and harness finance *More* shows how at every step of our long journey it was the connection between people that resulted in more trade more specialization more freedom and ultimately more prosperity **London After Recession** Iain MacRury,2016-05-06 The City has long been the main generator of London's wealth and needless to say the impact of the Economic Crisis in the recent years on the City has greatly affected the wider urban and surrounding region not to say country as a whole This book examines the impact of the recession and discusses London's future trajectory as an entrepreneurial city and capital of the United Kingdom While recognising the enduring capacity of London to reinvent itself from being the centre of a vast Empire to becoming a global centre for financial and business services contributors evaluate different dimensions of the city's current and future development through analyses derived from sociological economic cultural and urban studies perspectives **10000** Lex Buttonwood Bartleby Wincott Award Business Journalist of the Year Awards Paper Promises Spear AI **Overheated** Kate Aronoff,2021-04-20 This damning account of the forces that have hijacked progress on climate change shares a bold vision of what it will take politically and economically to face the existential threat of global warming head on In the past few years it has become impossible for most to deny the effects of climate change and that the planet is warming and to acknowledge that we must act But a new kind of denialism is taking root in the halls of power shaped by a quarter century of neoliberal policies that threatens to doom us before we've grasped the full extent of the crisis As Kate Aronoff argues since the 1980s and 1990s economists pro business Democrats and Republicans in the US and global organizations like the UN and the World Economic Forum have all made concessions to the oil and gas industry that they have no intention of reversing What's more they believe that climate change can be solved through the market capitalism can be a force for good and all of us corporations included are fighting the good fight together These assumptions Aronoff makes abundantly clear will not save the planet

Drawing on years of reporting and rigorous economic analysis Aronoff lays out a robust vision for what will detailing how to constrain the fossil fuel industry transform the economy into a sustainable democratic one mobilize political support create effective public private partnerships enact climate reparations and adapt to inevitable warming in a way that is just and equitable Our future Overheated makes clear will require a radical reimagining of our politics and our economies but if done right it will save the world
