International Relations Theory and Philosophical Political Insights Into Conflict Management Pietrzak, Piotr, 2025-02-21

Conflict management in the context of international relations is critical for maintaining global peace and stability. By understanding the underlying causes of conflicts between nations and developing effective diplomatic strategies, countries can prevent disputes from escalating into violence or war. This also aids in creating frameworks for negotiation, mediation, and peacebuilding, helping to resolve tensions in a constructive and sustainable manner. *International Relations Theory and Philosophical Political Insights Into Conflict Management* supplements existing international relations theory with more interdisciplinary tools that bridge the division between the main conceptual, methodological, and analytical differences among rival paradigms, approaches, theories, traditions, and schools of thought. It utilizes existing tools and methods in more effective ways to address modern conflicts of regional and global importance. Covering topics such as conflict management, international relations, and warfare, this book is an excellent resource for scholars, researchers, policymakers, diplomats, peacebuilding organizations, security professionals, business leaders, educators, academicians, and graduate and postgraduate students.

International Relations Stephanie Lawson, 2023-05-09. International relations emerged as a distinct academic discipline in the early twentieth century, but its philosophic foundations draw on centuries of thinking about human nature, power, and authority, justice and injustice, the idea of sovereignty, and the implications for relations within and between political communities. The historic sources of these ideas appear to draw largely on European or Western experiences, but as this book shows, influences have emanated from much further afield, while contemporary thought is becoming more open to insights from non-Western sources. In this fully updated and expanded fourth edition of her popular text, Stephanie Lawson retains a broad world historical and contextual approach to the central themes and theoretical perspectives in IR while also addressing the most pressing issues facing the world today. Topics covered include the emergence of states and empires, theories ranging from classical realism and liberalism to postcolonial and green theory, twentieth-century international history, security and insecurity, global governance and world order, international political economy, and the prospects for a post-international world in an era that has seen both deepening globalization and accompanying challenges to the sovereign state, as well as the reassertion of nationalist ideas around the world. With a range of additional pedagogical features to assist learning and class discussion, this lively and accessible text is an ideal primer for beginner and intermediate students alike.

Global Political Justice Terry Macdonald, Miriam Ronzoni, 2017-07-05. Scholarly debate on the subject of global justice has been overwhelmingly focused so far on the socio-economic aspects of justice. Much less attention has been given to those political aspects of global justice concerned with arrangements for public decision making and the collective exercise and control of power. This gap is not adequately filled by literatures on global democracy, either, since these do not incorporate sufficient analysis of whether the democratic institutions that deliver political justice within states can achieve the same

result when dealing with the very different forms of power and political agency that structure the domain of global politics. This collection brings together scholars from across the disciplines of political theory, normative ethics and International Relations to undertake a fresh examination of some fundamental theoretical questions about the nature and significance of global political justice. Contributors tackle several dimensions of this complex theoretical topic, exploring questions about the relationship of global political justice to other normative standards like legitimacy, democracy and socio-economic justice; the nature of global public power and the prospects for global political community; the justice and continued significance of traditional ordering principles of sovereignty and territoriality and the relevance of standards of political justice like political equality to the regulation of international violence and principles of just war. This book was originally published as a special issue of *Critical Review of International Social and Political Philosophy*. **Peacebuilding in the United Nations** Fernando Cavalcante, 2019-05-06. This book traces the trajectory and different meanings of the concept of peacebuilding in the United Nations since the early 1990s. It analyses how that concept gained life in a particular context and the implications of this process for the Organisation's support to societies affected by armed conflict in general and for peace operations in particular. Departing from tenets about the influence of ideas in world politics and engaging with the critique of the liberal peace scholarship, the book provides a theoretically informed narrative of how peacebuilding acquired different meanings while remaining largely motivated, justified, legitimated and informed by a proactive and top-down agenda of promoting liberal democratic institutions, norms and values as a remedy to the challenges faced by societies affected by armed conflict. The book will appeal to scholars, policymakers and practitioners in peacebuilding and post-conflict development.

Emerging Powers in International Politics Mathilde Chatin, Giulio Gallarotti, 2019-05-16. The rise of large and rapidly growing nations is having a significant impact on the global order as their expanding influence reshapes the structure of power in the international system. These emerging powers are increasingly asserting themselves as major actors on the global scene. Leading this cadre of emerging powers are five nations referred to as the BRICS: Brazil, Russia, India, China and South Africa. This book takes inventory of both the individual and collective soft power of this rising bloc of nations. Having embraced the potential of this newly emphasized type of power as a means of generating international influence, these nations have dedicated substantial effort and resources to implementing a soft power offensive. This book was originally published as a special issue of the *Journal of Political Power*. *Decentering International Relations* Doctor Meghana Nayak, Professor Eric Selbin, 2010-08-26. *Decentering International Relations* seeks to actively confront, resist and rewrite International Relations (IR), a heavily politicized field that is deeply centered in the North West and privileges certain perspectives, pedagogies and practices. Is it possible to break the chain of signifiers that always leads IR studies back to the US and its European allies? Through engagement with a variety of theories ranging beyond the usual mainstream versus critical alternative binary and conversations with scholars, activists and students, the authors invite the reader to participate.

in an accessible yet provocative experiment to decentre the North West when we learn study and do IR In particular they examine how the pressing issues of human rights globalization peace and security and indigeneity are simultaneously normative inventions meant to sustain particular power structures and sites for insurgent and subversive attempts to live IR at the margins Selbin and Nayak have written a remarkable and provocative re envisioning of a globally important subject

Political Economy of Power Sharing in Developing Countries Akietuwo Piribie Opuene Hart, 2025-08-07 Political Economy of Power Sharing in Developing Countries is an in depth examination of factors that trigger the clamor for power sharing zoning and rotation in mostly developing countries These provocations include geographical ethnic and religious identity factors that can influence the political process in varying degrees from country to country The impact goes a long way in determining the stability and instability of the political process in various countries The reasons for these differences and the impacts are a combination of the endogenous variables in the first instance which are the primary prompters Other elements which are the exogenous factors are secondary prompters When these converge they produce a peculiar impact in a given society based on the characteristic variables and the resulting outcome The new paradigm shifts in the agitation in developing countries is demonstrated by an elitist instrument of marginalization and self aggrandizement The masses are hoodwinked sensitized and manipulated through primal sentiment to support the elites in acquiring political power which in turn enables the acquisition of economic power

China's Role and Interests in the Greater Mekong Subregion Shengmin Cui, 2018 Differentiated cooperation and GMS cooperation provide a theoretical model and practical example to coordinate the relationship and to promote economic and political cooperation between large and small states for the purpose of economic political and social development on the national regional and international stages

Populist and Pro-Violence State Religion Ihsan Yilmaz, Ismail Albayrak, 2022-01-19 This book explores state religion relations under a populist authoritarian ruling party in Turkey In doing so it investigates how the ruling Justice and Development Party AKP instrumentalizes state controlled religion to further defend legitimize and propagate its authoritarian populist political agenda in a

constitutionally secular nation state To exemplify this the authors examine the Friday sermons delivered weekly in every mosque in Turkey by the Turkish State s Directorate of Religious Affairs Diyanet By analyzing all sermons delivered between 2010 2021 the book shows how the Diyanet has enthusiastically adopted AKP s increasingly Islamist authoritarian civilisationist militarist and pro violence populism since 2010 and how it has tried to socially engineer beliefs in line with this ideology

Currency Wars with China and Japan in Western Newsmagazines Damien Ng,2022-02-27 This book explores China s currency wars with its trading partners in four Western newsmagazines Time The Economist L Express and Der Spiegel Based on both quantitative and qualitative approaches the interdisciplinary approach adopted in the research draws on two analytical frameworks from the realm of critical discourse analysis van Leeuwen s socio semantic inventory of social actor representation and van Dijk s concepts of macro rules as the overarching approaches to understand the changing dynamics of international relations and the global economy through Western media The sample in this study consists of 160 texts half of which are focused on China and the other half on Japan across a period of 12 months in 2010 China and in 1987 Japan Through the comparison of Western representation between China and Japan the similarities and differences in their coverage have been revealed as even more striking with regards to global politics and the international economy The findings obtained from the empirical research have revealed that China was not only reported more unfavourably than Japan in terms of depth but also across a broader range of areas spanning economics politics and military affairs It has also emerged that all the four Western newsmagazines tended to centre their coverage on the US and China in 2010 and the US and Japan in 1987 although they did not speak in one collective voice with regard to their coverage of China and Japan

Coming in Koen Sloodmaeckers,2023-03-07 LGBT rights have become increasingly salient within the EU enlargement process as a litmus test for Europeanness But the promotion of these norms has provided a basis for political contestation This book interrogates the normative dimensions of the EU enlargement process with special reference to LGBT politics Reconceptualising Europeanisation it argues that EU enlargement is a process of negotiated transformation in which EU policies and norms are re defined translated and transformed Empirically it analyses the promotion of and resistance to LGBT equality norms in Serbia s EU integration process but it looks beyond policies to the impact of the negotiated transitions on lived experiences Overall the book raises important questions about the political and social consequences of Europeanisation At its heart is one crucial question what do we consider progress

Contemporary Europe William Outhwaite,2016-10-04 Europe is one of the most dynamic and interesting areas of the world pioneering in the European Union a new form of governance for half a billion people represented in the world s first directly elected transnational parliament This book situates the European Union in a broader European global historical and geographical context providing a readable presentation of the most important facts and drawing on the theoretical approaches which have transformed the study of contemporary Europe over the past two decades The European Union is still on the road to what

has been called an unknown destination and this book presents its economic political legal and social trajectory from the middle of the last century to the present Contemporary Europe covers some of these issues in an interdisciplinary framework aiming to situate the development of the European Union in a broader context of pan European and global processes Europe has been cut down to size but it does not have to become a global backwater and the study of contemporary Europe's institutional reality does not have to be boring The book counters this misperception conveying the essential facts and theories of contemporary European reality in a clear and approachable analysis It will serve as a readable introduction both to the academic field of European studies and to contemporary Europe itself *Authoritarian Populism and the Rural World*

Ian Scoones, Marc Edelman, Saturnino M. Borrás Jr., Lyda Fernanda Forero, Ruth Hall, Wendy Wolford, Ben White, 2021-06-29 The rise of authoritarian nationalist forms of populism and the implications for rural actors and settings is one of the most crucial foci for critical agrarian studies today with many consequences for political action *Authoritarian Populism and the Rural World* reflects on the rural origins and consequences of the emergence of authoritarian and populist leaders across the world as well as on the rise of multi class mobilisation and resistance alongside wider counter movements and alternative practices which together confront authoritarianism and nationalist populism The book includes 20 chapters written by contributors to the Emancipatory Rural Politics Initiative ERPI a global network of academics and activists committed to both reflective analysis and political engagement Debates about populism nationalism authoritarianism and more have exploded recently but relatively little of this has focused on the rural dimensions Yet wherever one looks the rural aspects are key not just in electoral calculus but in understanding underlying drivers of authoritarianism and populism and potential counter movements to these Whether because of land grabs voracious extractivism infrastructural neglect or lack of services rural peoples' disillusionment with the status quo has had deeply troubling consequences and occasionally hopeful ones as the chapters in this book show The chapters in this book were originally published in *The Journal of Peasant Studies* **Water,**

Food and Poverty in River Basins Myles Fisher, Simon Cook, 2013-09-13 Conventional wisdom says that the world is heading for a major water crisis By 2050 global population will increase from 7 billion to a staggering 9.5 billion and the demands this will place on food and water systems will inevitably push river basins over the edge The findings from this book present a different picture While it is convenient to visualize an inevitable global water and food crisis in which increasing demands result in increasing poverty food insecurity and conflict the reality is far more nuanced and revolves around the politics of equitable and sustainable development of resources The first part of this book provides detailed insight into conditions of water flows within nine river basins In the second part authors summarize and re-analyze the outcome of the nine basins providing a coherent global picture of water productivity and development They assess the impacts of variations of these attributes on development and approaches for poverty alleviation and explore the institutional factors that support or obstruct change How people will manage river systems while protecting vital ecosystem functions will make the

difference between catastrophe and survival As Prof Asit Biswas points out the world is facing a water crisis not because of physical scarcity of water but because of poor management practices in nearly all countries of the world The book is based on the four years 2006 2010 of extensive research into the state of ten of the world s major river basins carried out under the CGIAR Challenge Program for Water and Food s Basin Focal Project This book was published as a special issue of Water International

Resilience in EU and International Institutions Elena Korosteleva, Trine Flockhart, 2020-12-17 This book explores the concept and practice of resilience that has generated much debate among both scholars and practitioners The contributions propose a new understanding of resilience both as a quality and a way of thinking taking it to the level of the person and the local to argue that a more sustainable way to govern the world today is bottom up and inside out While carrying a seemingly unifying message of self reliance adaptation and survival in the face of adversity resilience curiously continues to appear as all things to all people making it hard for the EU and international institutions to make full use of its arresting potential Engendering resilience today in the highly volatile and uncertain world hit by crises pandemic and diminishing control becomes a priority as never before This book develops a more comprehensive view of resilience by looking at it both as a quality of the system and a way of thinking inherent to the local that cannot be engineered from the outside It is argued in this volume that in some cases the level of the person especially the person s sense of what constitutes a good life may be the most appropriate focus for understanding change and strategic adaptation in response to it This understanding widens the scope of discussion from what makes an entity system or person more adaptable to how one can best govern today to establish a stable equilibrium between the global and the local the external and the internal and become more responsive to the challenges and changes of today s highly uncertain world The chapters in this book were originally published in the journal Contemporary Security Policy
