Reviving America: How Repealing Obamacare, Replacing the Tax Code and Reforming The Fed will Restore Hope and Prosperity Steve Forbes, Elizabeth Ames, 2015-12-04 Conservative icon Steve Forbes returns with his most powerful and provocative ideas yet The United States has been through one of the most tumultuous decades in recent history Polls show people on both sides of the ideological divide believe that the country has gone off track If something isn't done quickly Americans face a bleak future continuing decline and disarray in a world that grows ever more dangerous Steve Forbes two time candidate for the GOP presidential nomination and Forbes Media Chairman explains how today's malaise has been caused by years of Obama's destructive policies a broken tax system and the Federal Reserve's Soviet style controls over credit and money The problems are challenging But Forbes tells us that with the right policies the country can bounce back faster than people think In this compelling and much needed book he sets forth a three part plan to revive America Patient Driven Healthcare The problem with healthcare Forbes says is that Big Government health insurance companies and employers are in control not you the patient The key to getting high quality affordable healthcare is increasing competition and choice and putting patients in charge Enact a Flat Tax Today's complex corrupt tax code must be scrapped The best answer is a simple Flat Tax Forbes shows how this very bold reform would free America from the IRS and unleash an unprecedented wave of prosperity A Sound Dollar as Good as Gold With its ever fluctuating fiat dollar the Federal Reserve has blocked a real recovery and is the prime cause of today's stagnant crisis ridden economy The answer Take the dollar out of the hands of the Washington politicians by returning to a monetary system with the value of the dollar linked to gold A clear and vital guide Reviving America shows how the United States can recover the optimism and entrepreneurial dynamism that made it the greatest nation in history These are 21st century solutions not the failed ideas of the recent past Forbes offers specific ideas and plans not generalities and bromides and is challenging policy makers to do the same Steve Forbes is the coauthor of Money the New York Times bestseller Power Ambition Glory and the Wall Street Journal bestseller How Capitalism Will Save Us Forbes is the Chairman and Editor in Chief of Forbes Media which published Forbes magazine with a circulation of nearly 1 million readers Combined with Forbes Asia and Forbes Europe and the company's licensee editions the magazine reaches close to 6 million global readers Forbes.com reaches almost 70 million unique monthly visitors Elizabeth Ames has co-authored three previous books with Steve Forbes Money How The Destruction of the Dollar Threatens The Global Economy And What We Can Do About It Freedom Manifesto Why Free Markets Are Moral and Big Government Isn't and the Wall Street Journal bestseller How Capitalism Will Save Us Why Free People and Free Markets Are The Best Answer In Today's Economy

The Cloud Revolution Mark P. Mills, 2021-11-02 The conventional wisdom on how technology will change the future is wrong Mark Mills lays out a radically different and optimistic vision for what's really coming The mainstream forecasts fall into three camps One considers today as the new normal where ordering a ride or food

on a smartphone or trading in bitcoins is as good as it's going to get. Another foresees a dystopian era of widespread digitally driven job and business destruction. A third believes that the only technological revolution that matters will be found with renewable energy and electric cars. But according to Mills, a convergence of technologies will instead drive an economic boom over the coming decade, one that historians will characterize as the Roaring 2020s. It will come not from any single big invention but from the confluence of radical advances in three primary technology domains: microprocessors, materials, and machines. Microprocessors are increasingly embedded in everything. Materials from which everything is built are emerging with novel, almost magical capabilities. And machines, which make and move all manner of stuff, are undergoing a complementary transformation. Accelerating and enabling all of this is the Cloud, history's biggest infrastructure, which is itself based on the building blocks of next-generation microprocessors and artificial intelligence. We've seen this pattern before. The technological revolution that drove the great economic expansion of the twentieth century can be traced to a similar confluence, one that was first visible in the 1920s: a new information infrastructure (telephony), new machines (cars and power plants), and new materials (plastics and pharmaceuticals). Single inventions don't drive great long-cycle booms. It always takes convergent revolutions in technology's three core spheres: information, materials, and machines. Over history, that's only happened a few times. We have wrung much magic from the technologies that fueled the last long boom. But the great convergence now underway will ignite the 2020s. And this time, unlike any previous historical epoch, we have the Cloud amplifying everything. The next long boom starts now.
