Surveillance and Space Francisco Klauser, 2016-12-05 The digital age is also a surveillance age Today computerized systems protect and manage our everyday life the increasing number of surveillance cameras in public places the computerized loyalty systems of the retail sector geo localized smart phone applications or smart traffic and navigation systems Surveillance is nothing fundamentally new and yet more and more questions are being asked Who monitors whom and how and why How do surveillance techniques affect socio spatial practices and relationships How do they shape the fabrics of our cities our mobilities the spaces of the everyday And what are the implications in terms of border control and the exercise of political power Surveillance and Space responds to these modern questions by exploring the complex and varied interactions between surveillance and space In doing so the book also advances a programmatic reflection on the very possibility of a political geography of surveillance Urban Sustainability and Justice Vanesa Castán Broto, Linda Westman, 2019-12-15 Urban Sustainability and Justice presents an innovative yet practical approach to incorporate equity and social justice into sustainable development in urban areas in line with the commitments of the UN s Sustainable Development Goals and the New Urban Agenda This work proposes a feminist reading of just sustainability principles to reclaim sustainability as a progressive discourse which informs action on the ground This work will help the committed activist whether they are on the ground working in a community in a non governmental organization NGO in a business at a university in any sphere in government to connect their work to international efforts to deliver environmental justice in cities

around the world Drawing on a comparative international analysis of sustainability initiatives in over 200 cities Cast n Broto and Westman find limited evidence of the implementation of just sustainability principles in practice but they argue that there is considerable potential to develop a justice oriented sustainability agenda Highlighting current successes while also assessing prospects for the future the authors show that just sustainability is not merely an aspirational discourse but a frame of reference to support radical action on the ground Planning in the USA Roger W. Mackinnon,Ryan Burns,Victoria Fast,2022-12-21 In the contemporary moment smart cities have become the dominant paradigm for urban planning and administration which involves weaving the urban fabric with digital technologies Recently however the promises of smart cities have been gradually supplanted by recognition of their inherent inequalities and scholars are increasingly working to envision alternative smart cities Informed by these pressing challenges Digital In Justice in the Smart City foregrounds discussions of how we should think of and work towards urban digital justice in the smart city It provides a deep exploration of the sources of injustice that percolate throughout a range of sociotechnical assemblages and it questions whether working towards more just sustainable liveable and egalitarian cities requires that we look beyond the limitations of smartness altogether The book grapples with how geographies impact smart city visions and roll outs on the one hand and how unjust geographies are produced in smart pursuits on the other Ultimately Digital In Justice in the Smart
