Women's Human Rights and Migration Sital Kalantry, 2017-05-26 Some of the most hotly contested international women's rights issues today arise from the movement of peoples from one country to another and the practices they purportedly bring with them In *Women's Human Rights and Migration* Sital Kalantry focuses on immigrants of Asian descent living in the United States who are believed to abort female fetuses because they do not want a female child While sex selective abortion is a human rights concern in India should we for that reason assume that the practice undermines women's equality in the United States Although some pro choice feminists believe that these prohibitions on sex selective abortion promote women's equality other feminists fiercely oppose such laws characterizing them as a Trojan horse in the larger pursuit to overturn the reproductive rights guaranteed by *Roe v Wade* Nearly half of state legislatures in the United States have proposed laws restricting sex selective abortion since 2009 and nine have adopted them Kalantry argues that traditional feminist legal theories and international human rights law fail to provide adequate guidance in examining the human rights implications of the reproductive practices of immigrant women evidenced by the fact that both supporters and opponents ground their claims in women's equality She advocates instead for a context based approach that is open to the possibility that sex selective abortion practices will have significantly different human rights implications when they emerge in different national contexts The product of extensive empirical and interdisciplinary research Kalantry's book investigates the actual occurrence of sex selective abortion among Asian Americans the social and cultural contexts in which women in the United States and India practice sex selective abortion and the consequences of the laws in each country for women's equality *Women's Human Rights and Migration* develops a transnational feminist legal approach to examining and legislating contested acts that result from migration

Managing Family Justice in Diverse Societies Mavis Maclean, John Eekelaar, 2013-02-15 The aim of this book is to explore what response the law has or should have to different family practices arising from cultural and religious beliefs The issue has become increasingly debated as western countries have become more culturally diverse Although discussion has frequently focused on the role Islamic family law should have in these countries this book seeks to set that discussion within a wider context that includes consideration both of theoretical issues and also of empirical data about the interaction between specific family practices and state law in a variety of jurisdictions ranging from England and Wales to Bangladesh Botswana Spain Poland France Israel Iran and South Africa The contributors to the 17 chapters approach the subject matter from a variety of perspectives illustrating its complex and often sensitive nature The book does not set out to propose any single definitive strategy that should be adopted but provides material on which researchers advocates and policy makers

can draw in furthering their understanding of and seeking solutions to the problems raised by this significant social development Interdisciplinary Perspectives on Human Dignity and Human Rights Hoda Mahmoudi, Michael L. In recent years the Danish cartoons affair the Charlie Hebdo murders and the terrorist attacks in Brussels and Paris have resulted in increasingly strident anti Islamic speeches by politicians This raises questions about the limits to freedom of expression and whether this freedom can and should be restricted to protect the religious feelings of believers This book uses the case law of the European Court of Human Rights to provide a comprehensive analysis of the questions whether legal prohibitions of religious hate speech violate the right to

freedom of expression and whether such laws should be used to prosecute politicians and others who contribute to current debates when they use anti Islam rhetoric A well known politician who uses such rhetoric is Dutch politician Geert Wilders He has been prosecuted twice for hate speech and was acquitted in the first case and recently convicted in the second These prosecutions are used to illustrate the issues involved in drawing the line between freedom of expression and religious hate speech The author argues that freedom of expression of politicians and those contributing to the public debate should not be restricted except in two very limited circumstances when they incite to hatred or violence and there is an imminent danger that violence will follow or where it stops people from holding or manifesting their religion Based on this the author concludes that the European Court of Human Rights should decide if it is asked to do so that Wilders conviction for hate speech violates his freedom of expression

book is about the role of the Christian Right in the US foreign policy decision making process It reveals that the Christian Right has long been fascinated with some international issues in general and US foreign policy in particular The interest of the movement in international issues increased markedly during the George W Bush administration 2000 2009 During this period the movement successfully widened its activism from domestic social conservative issues to foreign policy issues by participating in articulating and lobbying for its religious version of American foreign policy In assessing the role of the Christian Right in US foreign policy making this dissertation examines aspects of US foreign policy namely Israel international religious freedom and global humanitarianism Based on these three aspects the Christian Right is seen as skilled in framing and defining issues The Christian Right seems effective in selecting and prioritizing international issues that have a reasonable chance of being picked up on by foreign policy decision makers especially in Congress Moreover the Christian Right has shown its maturity in seeking engagement and cooperation with other organizations regardless of whether they are secular or religious to advance its international goals Finally in pursuing and conveying its international agenda the Christian Right has adopted a more moderate and mundane approach Instead of using its traditional religious rhetoric the Christian Right has successfully projected its foreign policy preferences into the conventional realist discourse of

American foreign policy that was largely based on the objective of national interest and national security

Creating Consent in Ba'thist Syria Esther Meininghaus, 2016-03-31 The challenge of maintaining dictatorial regimes through control co option and coercion while upholding a facade of legitimacy is something that has concerned leaders throughout the Middle East and beyond Nowhere is this more evident than in the Syria ruled by the Asads both Hafiz and his son Bashar Drawing on the example of the General Union of Syrian Women founded in 1967 Esther Meininghaus offers new insights into how the Syrian Ba thist regimes attempted to move beyond mere satisfaction with the compliance of the citizenry and to consolidate their rule amongst the local population Meininghaus argues that this was partially achieved through providing welfare services delivered by the Union as one of the state led mass organisations In this way she suggests these regimes did not only aim to undermine opposition and to create the illusion of consent but they factually catered to local needs and depended on consent Based on archival material interviews and statistics Creating Consent in Ba thist Syria will shed new light on mass organisations as a crucial institution of Ba thist state building and more broadly the construction of the Asad regimes

The Politics of Personal Law in South Asia Partha S. Ghosh, 2018-05-11 The viability of the Uniform Civil Code UCC has always been a bone of contention in socially and politically plural South Asia It is entangled within the polemics of identity politics minority rights women s rights national integration uniform citizenry and of late global Islamic politics and universal human rights While champions of each category view the issue from their own perspectives making the debate extremely complex this book takes up the challenge of providing a holistic political analysis As most of the South Asian states today subscribe to a decentralised view and share a common history this study is an excellent comparative analysis of the applicability of the UCC In this work India figures prominently being the most plural and vibrant democracy as well as accounting for almost three fourths of the region s population This provides the backdrop for an analysis of the other states in the region This second edition will be indispensable for scholars researchers and students of law political science and South Asian Studies

Movements for Human Rights David L. Brunsma, Keri Iyall Smith, Brian Gran, 2016-09-07 How do people work together to advance human rights Do people form groups to prevent human rights from being enforced Why In what ways do circumstances matter to the work of individuals collectively working to shape human rights practices Human society is made of individuals within contexts tectonic plates not of the earth s crust but of groups and individuals who scrape and shift as we bump along competing for scarce resources and getting along These movements large and small are the products of actions individuals take in communities within families and legal structures These individuals are able to live longer yet continue to remain vulnerable to dangers arising from the environment substances struggles for power and a failure to understand that in most ways we are the same as our neighbors Yet it is because we live together in layers of diverse communities that we want our ability to speak to be unhindered by others use spirituality to help us understand ourselves and others possess a space and objects that are ours alone and join with groups that share our values and interests

including circumstances where we do not know who our fellow neighbor is For this reason sociologists have identified the importance of movements and change in human societies When we collaborate in groups individuals can change the contours of their daily lives Within this book you will find the building blocks for human rights in our communities To understand why sometimes we enjoy human rights and other times we experience vulnerability and risk sociologists seek to understand the individual within her context Bringing together prominent sociologists to grapple with these questions Movements for Human Rights Locally and Globally offers insights into the ways that people move for and against human rights
