Dr Eduard Benes Tijdgenoot Der Toekomst:

Neutrality in Twentieth-Century Europe Rebecka Lettevall, Geert Somsen, Sven Widmalm, 2012-08-21 Whether in science or in international politics neutrality has sometimes been promoted not only as a viable political alternative but as a lofty ideal in politics by nations proclaiming their peacefulness in science as an underpinning of epistemology in journalism and other intellectual pursuits as a foundation of a professional ethos Time and again scientists and other intellectuals have claimed their endeavors to be neutral elevated above the world of partisan conflict and power politics This volume studies the resonances between neutrality in science and culture and neutrality in politics By analyzing the activities of scientists intellectuals and politicians sometimes overlapping categories of mostly neutral nations in the First World War and after it traces how an ideology of neutralism was developed that soon was embraced by international organizations This book explores how the notion of neutrality has been used and how a neutralist discourse developed in history None of the contributions take claims of neutrality at face value some even show how they were made to advance partisan interests The concept was typically clustered with notions such as peace internationalism objectivity rationality and civilization But its meaning was changeable varying with professional ideological or national context As such *Neutrality in Twentieth Century Europe* presents a different perspective on the century than the story of the great belligerent powers and one in which science culture and politics are inextricably mixed Dr. Eduard Beneš W.
