**Ford 429/460 Engines** Charles Morris, 2019-03-21 Ford was unique in that it had two very different big block engine designs during the height of the muscle car era The original FE engine design was pioneered in the late 1950s primarily as a more powerful replacement for the dated Y block design What began as torquey engines meant to move heavyweight sedans morphed into screaming high performance mills that won Le Mans and drag racing championships throughout the 1960s By the late 1960s the FE design was dated so Ford replaced it with the 385 series also known as the Lima design in displacements of 429 and 460 ci which was similar to the canted valve Cleveland design being pioneered at the same time It didn't share the FE pedigree of racing success mostly due to timing but the new design was better in almost every way it exists via Ford Motorsports offerings to this day Beginning in 1971 the 429 found its way between the fenders of Mustangs and Torinos in high compression 4 barrel versions called the Cobra Jet and Super Cobra Jet and they were some of the most powerful passenger car engines Ford had ever built If the muscle car era had not died out shortly after the release of these powerful engines without a doubt the 429 performance variants would be ranked with the legendary big blocks of all time In this revised edition of *How to Rebuild Big Block Ford Engines* now titled *Ford 429 460 Engines* How to Rebuild Ford expert Charles Morris covers all the procedures processes and techniques for rebuilding your 385 Series big block Step by step text provides details for determining whether your engine actually needs a rebuild preparation and removal disassembly inspection cleaning machining and parts selection reassembly start up and tuning Also included is a chapter in building the special Boss 429 engines as well as a bonus chapter on the Ford 351 Cleveland Ford's little brother to the big block
