

# FORD 7000 TRACTOR OPERATOR'S MANUAL SUPPLEMENT

## DUAL POWER TRANSMISSION AND TWO SPEED (540 AND 1000) P.T.O.

### GENERAL

This supplement is to be used in conjunction with your Ford 7000 Tractor Operator's Manual, SE 3328. It contains information on the optional Dual Power transmission and the two-speed power take-off, which is standard equipment on your new tractor. Read this supplement and your Ford 7000 Operator's Manual thoroughly before operating your new tractor and keep them both in a convenient location for later reference.

### DUAL POWER TRANSMISSION

Basically, the Dual Power transmission is the same as the 8-speed transmission described in your tractor operator's manual except that it has a hydraulically operated planetary gear set within the transmission housing for increasing pull-power on-the-go in all gear ratios. The Dual Power control lever, Figure 1, is used to select a normal drive (direct drive) or a power drive condition for each gear ratio giving the transmission 16 forward

speeds, and 4 reverse speeds. Moving the Dual Power control lever rearward "downshifts" the transmission to a power drive condition in each of the eight forward and two gear ratios.

Moving the dual power control lever forward returns the transmission to a normal or direct drive condition. The lever can be moved at any engine speed and in any gear to increase or decrease pulling power to meet changes in load or soil conditions.

**CAUTION:** Always engage the parking brake before getting off the tractor. With the Dual Power transmission the tractor is free to roll when the engine is not running, even though the transmission may be "in gear".

The tractor can be operated continuously with the lever in either position except during stationary P.T.O. operation. When operating stationary equipment, the lever must be in the power drive position.

**CAUTION:** Do not operate stationary P.T.O. equipment with the Dual Power control lever in normal drive (lever forward) position. Doing so will cause damage to the transmission due to overheating.

### TOWING DUAL POWER TRACTORS

To tow or push your Dual Power transmission tractor, place the high-low shift lever in neutral and the Dual Power control lever in the normal drive (lever forward) position. Do not exceed 20 mph (32 kph) and do not tow or push your tractor to start it.

If the tractor is to be moved any great distance, arrange for transport on a flat bed truck.
