explores America's approach to small wars since Vietnam providing a fascinating analysis of the basic goals, missions, conduct and consequences of modern American conflict. Going beyond a simple comparison of Vietnam to the current wars in Afghanistan and Iraq, Gambone thoroughly tracks the continuous evolution of U.S. intervention between these events, revealing a dramatic shift in the role of the American military to covert operations that require fluidity, creativity, and ingenuity. He examines in detail the many different forms of military intervention that America has taken in the last forty years, including actions in Central America in the 1980s, the first Gulf War, airstrikes in Kosovo in the 1990s, and the war on terror, as well as the Iran-Contra affair, the drug war in Colombia, and the role of private military contractors such as Blackwater. After the Cold War, Gambone shows American military missions served a wide variety of tasks: peacekeeping, humanitarian assistance, counterterrorism, that significantly departed from conventional missions, a trend that continued and expanded after 9/11. By exploring the history and assessing the effectiveness of the small wars fought since Vietnam, Gambone reveals the importance of these smaller actions in modern military planning and operations and clearly traces the development of American warfare from the massive military machine of World War II into a complex hybrid of traditional and innovative techniques.

**MICHAEL GAMBONE**, a professor of history at Kutztown University in Pennsylvania, is the author of *The Greatest Generation Comes Home: The Veteran in American Society* and editor of *Documents of American Diplomacy: From the American Revolution to the Present*. **American Book Publishing Record**, 1992. *Amédée Gordini* Roy P. Smith, 2022. This is the story of a man, a team, and their life and times, as well as a complete record of all their achievements and failures. It logs the financial and personal cost of racing in the prewar and postwar periods. It tells of how the mighty car company Renault became involved with them in the late 1950s and how Amédée Gordini became known throughout the world as one of the greatest engine tuners of his time.
