Cover **PC Mag** ,1999-02-23 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology High Above Chris Forrester,2011-08-27 Frequently it is suggested that the golden age of television was during the period 1950 1960 It is true that television almost ruined Hollywood s fortunes during this period But if this was the authentic golden age then it was an age of black and white somewhat limited creativity poor reception lack of competition except in the United States and by and large public service broadcasting However if we take 1950 as a generic starting point for modern television broadcasting then we talk about a kind of prehistoric stage of the medium in which it remained for the best part of three decades The younger days of broadcasting were the 1980s the time when commercial television started on a large scale and in this youth was getting younger in terms of programming Luxembourg based SES Astra appeared on the scene at exactly this time Astra was instrumental in the dramatic developments in television that we have witnessed since then This is the story we want to tell in this book Without satellite technology and the success of satellite reception without the resulting mass market penetration of television sets and general economic prosperity we would not have the necessary base ingredients to make the great leap forward into digital into HDTV 3D television and the prospects of Ultra High Definition now in sight **Goliath** Steve Alten,2002-07-19 20 000 leagues under the sea meets 2001 a space odyssey as a victim of terrorism holds humanity hostage aboard the most lethal killing machine ever constructed Jacket **God Has an App for That** Dudley Rutherford,2012-01-03 Wouldn t it be great if there were accessible answers to our spiritual problems just like there s a Smartphone app for calculating a tip or getting directions to the dry cleaner Most of us have heard the phrase There s an app for that popularized by the creators of the iPhone Well guess what God has an app for the common conundrums faced by Christians everywhere Stressed out Struggling with prejudice God has an app for that Problem with crude language or gossip Broken hearted anxious or depressed God has an app for that too Pastor Dudley Rutherford invites readers to explore the book of James and discover God s user friendly solutions for their biggest challenges in faith and life **The End of Big** Nicco Mele,2013-04-23 How seemingly innocuous technologies are unsettling the balance of power by putting it in the hands of the masses and what a world without big will mean for all of us In *TheEnd of Big* social media pioneer political and business strategist and Harvard Kennedy School faculty

member Nicco Mele offers a fascinating sometimes frightening look at how our ability to stay connected constantly instantly and globally is dramatically changing our world Governments are being upended by individuals relying only on social media Major political parties are seeing their power eroded by grassroots forces through online fund raising Universities are scrambling to preserve their student populations in the face of less expensive more accessible online courses Print and broadcast news outlets are struggling to compete with citizen journalists and bloggers Our traditional institutions are being disrupted in revolutionary ways some for the better But as Nicco Mele argues the benefits of new technology come with unintended consequences In *The End of Big* Mele examines How fringe political forces enter the mainstream and gain traction using everyday technology with the enormous potential to undermine central power What happens when investigative journalism is replaced by ad hoc bloggers mobile video and instantaneous tweets and whether they challenge or simply enable power Why Web based micro businesses are outcompeting major corporations and what innovations will alter the way we work own things and pay for goods and services The collapse of traditional party politics and the rise of a new kind of democracy one which could produce dynamic and effective leaders or demagogues How citizen initiatives can replace local and state government functions such as safety regulations tax collection and garbage pickup and do so cheaper faster and better Mele argues that unless we exercise caution in our use of these new technologies we risk a dark and wildly unstable future one in which our freedoms and basic human values could be destroyed rather than enhanced Both hopeful and alarming *The End of Big* is a thought provoking passionately argued book that offers genuine insight into the ways we are using technology and how it is radically changing our world in ways we are only now beginning to understand

Moralizing the Corporation Boris Holzer, 2010-01-01 Each chapter in this book by itself is a worthy contribution to the existing research on the TNC in a globalised world In *spire Journal of Law Politics and Societies* The argument of this book is so powerful and convincing because it focuses on global subpolitics the corporate ir responsibility the power of its critics and the consuming citizen This shift of perspectives and its sophistication makes *Moralizing the Corporation* a must read for anyone interested in the dynamics of globalization Ulrich Beck University of Munich Germany *Moralizing the Corporation* offers a multi disciplinary analysis of the conflicts between transnational corporations and transnational advocacy groups The book is theoretically sophisticated and full of interesting and nuanced empirical findings that generate new knowledge about the relationship between politics and markets It views transnational corporations as quasi public institutions and explains their vulnerability to the non state authority of political consumers and protest groups Holzer develops theory on transnational subpolitics and corporate reflexivity and should be read by scholars and activists alike Michele Micheletti University of Stockholm Sweden This insightful book examines how transnational corporations respond to the challenges of anti corporate activism and political consumerism In prominent cases involving major corporations such as Nestl Nike and Royal Dutch Shell transnational activists have successfully mobilized public opinion and consumers against alleged corporate

misdeemeanours Campaigns and boycott calls can harm a corporation's image but as this book points out public scrutiny also gives corporations the opportunity to present themselves as responsible and accountable corporate citizens who subscribe to the very norms and values propagated by the activists Academics scholars and postgraduate students in international business management organization studies social movement studies and political sociology will find this book invaluable

Management Strategy Alfred Allen Marcus, 2005 Management Strategy Sustaining Competitive Advantage 1st edition by Alfred Marcus is a strategy book which focuses on how making winning moves is dependent upon finding profitable patterns that repeatedly meet customer demands for solutions Where many strategy books have lost sight of the purpose of strategy and fail to show how decisions actually affect business performance and ultimately outcomes Management Strategy focuses on the types of analyses the industry environment and a company s internal resources require to make effective strategic moves In eight chapters this textbook builds upon the analysis process and demonstrates how strategy impacts an organization s position in comparison to its competitors both in terms of the cost and quality of its products and the scope of businesses in which it is involved vertical and horizontal integration as well as its global versus domestic reach The outcomes that come from analyzing an organization also determine the extent to which the organization will strive to be an innovator as opposed to being a follower

William Deresiewicz, 2020-07-28 A deeply researched warning about how the digital economy threatens artists' lives and work the music writing and visual art that sustain our souls and societies from an award winning essayist and critic There are two stories you hear about earning a living as an artist in the digital age One comes from Silicon Valley There's never been a better time to be an artist it goes If you've got a laptop you've got a recording studio If you've got an iPhone you've got a movie camera And if production is cheap distribution is free it's called the Internet Everyone's an artist just tap your creativity and put your stuff out there The other comes from artists themselves Sure it goes you can put your stuff out there but who's going to pay you for it Everyone is not an artist Making art takes years of dedication and that requires a means of support If things don't change a lot of art will cease to be sustainable So which account is true Since people are still making a living as artists today how are they managing to do it William Deresiewicz a leading critic of the arts and of contemporary culture set out to answer those questions Based on interviews with artists of all kinds *The Death of the Artist* argues that we are in the midst of an epochal transformation If artists were artisans in the Renaissance bohemians in the nineteenth century and professionals in the twentieth a new paradigm is emerging in the digital age one that is changing our fundamental ideas about the nature of art and the role of the artist in society *International Forest Policies in Indonesia: International Influences, Power Changes and Domestic Responses in REDD+, One Map and Forest Certification Politics* Agung Wibowo, 2016-01-07 The political contention that considers forests to be mere economic assets to achieve state welfare has slowly changed into a more conservative view since the Ninth World Forestry Congress in Mexico in 1985 rightly acknowledged that there has been severe tropical forest destruction and environmental deterioration around the globe
