**Decline and Prosper!** Vegard Skirbekk, 2022-04-01 Globally, women are having half as many children as they had just fifty years ago. Why have birth rates fallen and how will low fertility affect our shared future? In *Decline and Prosper*, demographic expert Vegard Skirbekk offers readers an accessible, comprehensive and evidence-based overview of human reproduction. Readers learn about the evolution of childbearing across different populations and how fertility is related to changes in our reproductive capacity, contraception, education, religion, partnering, policies, economics, assisted reproduction and catastrophes. Readers will explore the future of family size and its impact on human welfare, women's empowerment and the environment. Skirbekk argues that low fertility is, on the whole, a good thing while recognizing the challenges of population aging and coincidental childlessness. A balanced integrative examination of one of the most important issues of our time, *Decline and Prosper* drives home the fact that we must ultimately adapt to a world with fewer children. The book will be invaluable to anyone who is interested in the far-reaching effects of global fertility, including researchers and students of demography, social statistics, medical sociology, family and childhood studies, human geography, sociology of culture, social and public policy.

**Personal Data Collection Risks in a Post-Vaccine World** Colette Mazzucelli, James Felton Keith, C. Ann Hollifield, 2023-01-10 In the early twenty-first century, the international relations literature still posits realism as a dominant paradigm in the Western School. This volume introduces alternative frames of reference that address the deficiencies of liberalism with its lack of sufficient attention to ethnic diversity. By drawing on constructivism with its focus on framing, particularly the influence in instrumentalist terms of narratives shaped by the media, this volume explores that influence by analysing case studies in historical context. In 2020, the world's present yet unequal experiences of the triptych: personal data, global pandemic and social protests lead us to introduce personal data. Image I: the mesh region; Image II: and the distributed ecosystem; Image III: to capture the dynamic transformative nature of the changing relationship between structure and agency.
