Pflegenotstand in Deutschland. Mit welchen Methoden lässt sich der Mangel an Pflegefachkräften bewältigen? Sophia Mester, 2021-04-28 Akademische Arbeit aus dem Jahr 2020 im Fachbereich Pflegewissenschaft Pflegenotstand Note 1,0
Verwaltungs und Wirtschafts Akademie Wiesbaden e.V. Sprache Deutsch Abstract Die vorliegende Arbeit beschäftigt sich damit, welche Methoden entwickelt werden, um den Pflegenotstand in Deutschland zu bewältigen. Die Untersuchung ist wichtig, damit die Qualität und Quantität der Pflege eingehalten werden können. Einerseits hat jeder Mensch das Recht darauf, gut gepflegt zu werden. Ein pflegebedürftiger Mensch sollte sich durch den Pflegenden wohl und sicher fühlen können. Eine gute Pflegefachkraft wendet aktuelles Fachwissen unter Berücksichtigung der Lebenssituation der pflegebedürftigen Person an. Kompetenz und Empathie sind zwei grundlegende Faktoren, um eine gute Pflege zu garantieren. Außerdem ist das Engagement aller Beteiligten sehr wichtig. Diese Aspekte können nur unter einem respektvollen Austausch und gut koordinierter Mitarbeiter eingehalten werden. Andererseits ist es wichtig, die Gesundheit der Pflegefachkräfte zu schützen. Denn, um eine gute Pflege zu gewährleisten, muss die Gesundheit der Pflegenden in bester Ordnung sein. Bevor die Ursachen des Pflegenotstandes dargestellt werden, werden zunächst die theoretischen Grundlagen beleuchtet. *Pflegepionierinnen in Deutschland* Ingeborg Löser-Priester, 2020-12-14 Erste Bemühungen einer Akademisierung der Krankenpflege in Deutschland gingen bereits Anfang des 20. Jahrhunderts von verschiedenen Protagonistinnen der frühen modernen Frauenbewegung aus. Wurden aber bald durch den Ersten Weltkrieg auf Jahrzehnte hin abgedrängt. Erst nach Ende des Zweiten Weltkrieges konnte die Entwicklung der Pflegewissenschaft vor allem durch die Initiative einzelner Pionierinnen weiter vorangetrieben werden. Ingeborg Löser-Priester lässt in diesem Buch einige der Pionierinnen wie Ruth Schreck und Sabine Bartholomeyczik selbst zu Wort kommen und von ihrem beruflichen Werdegang, von Herausforderungen und Erfahrungen beim Aufbau und der Institutionalisierung der Pflegewissenschaft berichten. Das Ergebnis ist ein herausragender authentischer Einblick in die Anfänge einer akademischen Disziplin, die aus der heutigen Hochschullandschaft nicht mehr wegzudenken ist. **Care and Compassion in Capitalism** Cagri Yalkin, Mustafa F. Özbilgin, 2024-11-13 Addressing a gap in the examination of market-centric and individual-focused aspects of care, this volume brings together interdisciplinary insights from across the social sciences to enrich the debate in the field of business and management around the treatment of care, compassion, and capitalism.

Ethik und Berufsverständnis der Pflegeberufe Torsten Kruse, Harald Wagner, 2013-03-12 In Grenzfällen wird die Medizin und somit auch das Pflegepersonal stets von neuem auf den Prüfstand gestellt, insbesondere auf der Intensivstation bei der Betreuung Sterbender auf der Aids Station in der Gynäkologie Erlanger Baby bei der Erarbeitung von Pflegestandards in Klinik und Altenheim. Das Autorenteam setzt sich zusammen aus Schwestern, Pflegern, Ärzten, Theologen und Soziologen. Anhand von Beispielen geben sie Einblick in die Fachdiskussion zwischen Ethik und Medizin und verknüpfen dies mit dem arbeitsorganisatorischen Hintergrund pflegerischer Tätigkeit. Damit wird die Pflege ernst genommen im Spannungsfeld von

Transformation Processes in Europe and Beyond Florian Weber, Olaf Kühne, Julia Dittel, 2024-07-05 Europe and the world in all their diversity and complexity have always been and continue to be in a state of change Recent geopolitical environmental social and economic developments demonstrate a world in constant flux These ever changing framework conditions require corresponding transformations in many different structures This anthology takes these observations as a starting point to illuminate theoretical perspectives methodological approaches and empirical insights related to recent transformation processes in Europe and beyond with a special focus in this respect on the USA In view of their comprehensive nature transformation processes cannot be analysed from a single perspective a uniform approach or theory would fail to address their complexity and contingency In this sense horizontal geographies serves as our theoretical framework The concept refers to comprehensive synthesizing regional analyses which collect structure and reflect on knowledge with diverse spatial social and cultural contexts The interdisciplinary and international authorship does justice to the idea of horizontal multi perspective geographies and considers a wide range of transformation processes in Europe and beyond

The Nursing Process as a Strategy for a (De-)Professionalization in Nursing Jette Lange, 2024-05-06 The nursing process generally is understood as key element of professional nursing care in Germany This study follows this argument back to the introduction of the nursing process in the 1970s and 1980s At that time the German healthcare system underwent dramatic changes and economic reorganization which can be understood as the emergence of the neoliberal rationale in Germany The argument of cost explosion was used to restructure hospitals into enterprises that were to operate based on the logic of the market Its cybernetic logic made the nursing process an ideal instrument to restructure nursing care Perspectives of governmentality and critical accounting reveal the nursing process as an accounting tool which has made nursing calculable And while German nurses valued its potential for professionalization the findings suggest that a newly constituted accountable nursing vocation can instead be considered as de professionalizing

Fachkräftemangel in der Pflege: Darstellung eines Imagekonzepts, Personalbindungsstrategien und Maßnahmen zur

Nachwuchsrekrutierung Janina Nanninga, 2014-08 Das Buch behandelt das Thema des Fachkräftemangels in der Pflege. Greifen die Handlungsstrategien auf den Personalmangel oder bekämpfen sie lediglich die Symptome? Oder laufen wir in eine pflegerische Versorgungskatastrophe? Und was ist der Grund für den Personalmangel in der Pflege? Diese Fragen werden versucht zu beantworten. Um den möglichen Fachkräftemangel erläutern zu können, muss zunächst der Begriff der Pflegefachkraft von der Pflegehilfskraft abgegrenzt werden. Der Schwerpunkt wird auf das Krankenhaus gelegt. Durch die Darstellung der Rahmenbedingungen und der veränderten Beschäftigungsstruktur wird die Ausgangslage festgehalten. Sie bildet die Basis, auf der die neuen Handlungsstrategien aufbauen. In Kap. 4 erfolgt die Darstellung der möglichen Ursachen des Fachkräftemangels im Krankenhaus. Nach der Vorstellung der bestehenden Handlungsstrategien und einer abschließenden Reflexion erfolgt in Kap. 7 der Schwerpunkt der Arbeit durch die Darstellung eines Konzepts zur Imageverbesserung diverser Strategien zur Bindung des vorhandenen Fachpersonals und Vorschläge zur effektiven Nachwuchsrückgewinnung.

The Graying of the World Laura Katz Olson, 1994 This unique book studies America's frail older population relative to the elderly in ten other nations. It contains a cross-national assessment of approaches to long-term care for the elderly and explains the nature and extent of current and future problems related to caring for the functionally impaired elderly. By studying and analyzing the ongoing struggles of other nations in their attempts to cope with growing populations of frail elderly, readers in the U.S. can expand the parameters of their own national debate on the subject. The Graying of the World shows the political, economic, and social context in which decisions on elder care are based and evaluates how successful various countries' programs have been. Chapters outline alternative approaches taken by disparate types of national systems, highlighting unique and creative solutions to provide useful information on new and alternative ways to respond to personal and public issues related to elder care. The elderly and their care in Finland, France, Germany, Great Britain, Israel, Japan, People's Republic of China, Sweden, and Yugoslavia are discussed, as are the elderly in Canada and the United States. Chapters cover the following topics for each country: the increasing number of frail elderly and their costly health needs; the current and future role of the state in elder care; the current and future role of the family in elder care; types of support services offered for the elderly, including in-home care, community-based care, and institutional care; the relationship of a nation's political economy to its attitude and policy on long-term care; innovative approaches to elder care. Practitioners, decision makers, and the concerned general public will all find The Graying of the World an interesting and informative book that expands the discussion of health care options available for the elderly. As such, the book is also a helpful text for undergraduate and beginning graduate students of gerontology, public policy, and comparative politics, as well as for social service practitioners. It provokes much needed conversation on developing a healthcare plan for the future that meets the needs of a large elderly population.

Arbeits- und Lebensalltag evangelischer Krankenpflege Susanne Kreutzer, 2014 English summary The occupation of nursing in Germany has an image that still today is shaped by Christian traditions of care. Numerous long

standing concepts of nursing from terminal care to outpatient community nursing and holistic care are currently the subject of much debate Using the example of protestant deaconesses the volume illustrates how these concepts are put into practice The activities of the nurses their experiences and the sense of purpose they give to their everyday work and life context are analysed The book also sheds light on the conflicts that arise from the application of rational principles to the care of individual patients An understanding of nursing seen within an historical context thus serves to reveal the contradictions in the current modernisation of care German description Christliche Pflege traditionen prägen das Berufsbild Krankenpflege in Deutschland bis heute Zahlreiche alte Pflegekonzepte Sterbebegleitung ambulante Gemeindepflege und ganzheitliche Pflege werden gegenwärtig diskutiert Das Buch zeigt am Beispiel protestantischer Diakonissen wie diese Konzepte in die Praxis umgesetzt wurden Die Schwestern werden als handelnde Akteurinnen mit ihren Erfahrungen und Sinnstiftungen im alltäglichen Arbeits und Lebenskontext analysiert Das Buch beleuchtet auch die Konflikte die die Übertragung zweckrationaler Handlungsprinzipien auf personenbezogene Tätigkeiten nach sich zieht Das historische Pflegeverständnis dient damit als Instanz um die Widersprüche im Zuge der aktuellen Modernisierung der Pflege sichtbar zu machen
