

1. Design Brief

1.1 Paragraph 1

I am a draughtsman and I have chosen to improve the drive wheel which is a part out of the jaws of life. The drive wheel transmits force, transforming torque into tractive force. A drive wheel specifically a polyurethane wheel has long-lasting and cost-effective solutions, has good wear and tear resistance, and is suitable for a wide range of applications. The inserts and cores for the polyurethane parts are made from a wide variety of metals and plastics including UHMW PE, ABS, aluminium, and steel. Another design similar to polyurethane is the drive roller, which is a cylindrically-shaped component that drives a conveyor system and is driven by an external power source. So the polyurethane drive wheel and the drive roller are similar, but the polyurethane drive wheel has a thick wire and thin drive roller.

1.2 Paragraph 2

I am a draughtsman that has been given a task where I have to analyse the given scenario of breaking down the jaws of life and improving the polyurethane drive wheel and conduct research for possible solutions. I will then develop a solution using my skill with freehand to develop a solution for the cast iron model. I will then analyse the possible solutions and choose one that best suits the given scenario by selecting the best freehand solution. I will then use my chosen solution and create detailed layout drawings of the given diagrams of the cast iron model. Finally, I will create a presentation of the chosen solution
