Design And The Elastic Mind:

Design and the Elastic Mind Paola Antonelli, Museum of Modern Art (New York, N.Y.), 2008 In the past few decades individuals have experienced dramatic changes in some of the most established dimensions of human life time space matter and individuality Minds today must be able to synthesize such transformations whether they are working across several time zones travelling between satellite maps and nanoscale images drowning in information or acting fast in order to preserve some slow downtime Design and the Elastic Mind focuses on designers ability to grasp momentous advances in technology science and social mores and convert them into useful objects and systems The projects included range from nanodevices to vehicles appliances to interfaces and building facades pragmatic solutions for everyday use to provocative ideas meant to influence our future choices Designed by award winning book designer Irma Boom this volume also features essays by Paola Antonelli design critic and historian Hugh Aldersey Williams visualization design expert Peter Hall and nanophysicist Ted Sargent that further explore the promising relationship between design and science **The Design Book** Jennifer

Design Grace Lees-Maffei, 2013-09-12 How do we learn about the objects that surround us As well as gathering sensory information by viewing and using objects we also learn about objects through the written and spoken word from shop labels to friends recommendations and from magazines to patents But even as design commentators have become increasingly preoccupied with issues of mediation the intersection of design and language remains under explored Writing Design provides a unique examination of what is at stake when we convert the material properties of designed goods into verbal or textual description Issues discussed include the role of text in informing design consumption designing with and through

language and the challenges and opportunities raised by design without language Bringing together a wide range of scholars and practitioners Writing Design reveals the difficulties ethics and politics of writing about design

Which Proximity in Design Education? Rita Assoreira Almendra, 2025-01-30 This book explores various pedagogical viewpoints and dialectical positions within the field of design education and the concept of proximity it has established with industries and manufacturing Which Proximity in Design Education frames a wide range of approaches in design studios on undergraduate graduate and postgraduate levels and their capacity to render meaningful and novel attitudes and actions beyond the classroom The urgent call for resilience in the way we lead our lives has brought our global boundaries and social tensions to the forefront of the conversation and there is a generation of students fully aware of our collective responsibility in this decisive decade As such educators need to rapidly adapt to new tools and ways of teaching design whilst also being challenged on how to educate the designer for the pressing tasks of the near future It presents optimistic solutions for how education can support renovated mindsets and efforts towards common goals This book contains distinct visions of the world and its problems relating to proximity in design education As such the chapters present diversified solutions to these issues which will be of interest to teachers and researchers working in design education

Thinking: Objects: Contemporary Approaches to Product Design Tim Parsons, 2017-12-14 Thinking Objects Contemporary Approaches to Product Design discusses influences on modern product design such as globalization technology the media and the need for a sustainable future and demonstrates how readers can incorporate these influences into their own work The book also discusses how readers can learn to read the signals an object sends interpret meaning and discover historical context Thinking Objects provides an essential reference tool that will enable you to find your own style and succeed in the industry

Critical Design in Context Matt Malpass, 2017-02-23 Critical Design is becoming an increasingly influential discipline affecting policy and practice in a range of fields Matt Malpass's book is the first to introduce critical design as a field providing a history of the discipline outlining its key influences theories and approaches and explaining how critical design can work in practice through a range of contemporary examples Critical Design moves away from traditional approaches that limit design's role to the production of profitable objects focusing instead on a practice that is interrogative discursive and experimental Using a wide range of examples from contemporary practice and drawing on interviews with key practitioners Matt Malpass provides an introduction to critical design practice and a manifesto for how a radical and unorthodox practice might provide design answers in an age of austerity and ecological crisis

Curating Design Donna Loveday, 2022-08-11 Illustrated with contemporary case studies Curating Design provides a history of and introduction to design curatorial practice both within and outside the museum Donna Loveday begins by tracing the history of the collecting

and display of designed objects in museums and exhibitions from the 19th century cabinet of curiosities to the present day design museum She then explores the changing role of the curator since the 1980s with curators becoming much more than just keepers of a collection with a remit to create narrative and experiential exhibitions as well as develop the museum's role as a space of learning for its visitors Curating as a practice now describes the production of a number of cultural and creative outputs ranging from exhibitions to art festivals shopping environments to health centres conferences to film programming as well as museums and galleries Loveday explores how design has come to the fore in curatorial practice with new design museums opening around the world as well as blockbusting exhibitions of fashion and popular culture Interviews with leading practitioners from international design and arts museums provide a spotlight on contemporary challenges and best practice in design curatorship

Art, Artists and Pedagogy

Christopher Naughton, Gert Biesta, David Cole, 2017-10-16 This volume has been brought together to generate new ideas and provoke discussion about what constitutes arts education in the twenty first century both within the institution and beyond Art Artists and Pedagogy is intended for educators who teach the arts from early childhood to tertiary level artists working in the community or those studying arts in education from undergraduate to Masters or PhD level From the outset this book is not only about arts in practice but also about what distinguishes the arts in education Exploring two different philosophies of education the book asks what the purpose of the arts is in education in the twenty first century With specific reference to the work of Gert Biesta questions are asked as to the relation of the arts to the world and what kind of society we may wish to envisage The second philosophical set of ideas comes from Deleuze and Guattari looking in more depth at how we configure art the artist and the role played by the state and global capital in deciding on what art education has become This book provides educators with new ways to engage with arts focusing specifically on art music dance drama and film studies At a

time when many teachers are looking for a means to re assert the role of the arts in education this text provides many answers with reference to case studies and in depth arguments from some of the world s leading academics in the arts philosophy and education

Philosophical Frameworks and Design Processes Doctor Gjoko Muratovski, Craig Vogel, 2019-05-22

Just as the term design has been going through change growth and expansion of meaning and interpretation in practice and education the same can be said for design research The traditional boundaries of design are dissolving and connections are being established with other fields at an exponential rate Based on the proceedings from the IASDR 2017 Conference Re Research is an edited collection that showcases a curated selection of 83 papers just over half of the works presented at the conference With topics ranging from the introduction of design in the primary education sector to designing information for Artificial Intelligence systems this book collection demonstrates the diverse perspectives of design and design research Divided into seven thematic volumes this collection maps out where the field of design research is now

Two Blind Spots in Design Thinking Estelle Berger

From the 1980s design thinking has emerged in companies as a method for practical and creative problem solving based on designers way of thinking integrated into a rational and iterative model to accompany the process In companies design thinking helped valuing creative teamwork though not necessarily professional designers expertise By pointing out two blind spots in design thinking models as currently understood and implemented this paper aims at shedding light on two rarely described traits of designers self The first relies in problem framing a breaking point that deeply escapes determinism The second blind spot questions the post project process We thus seek to portray designers singularity in order to stimulate critical reflection and encourage the opening up to design culture Companies and organizations willing to make the most of designers expertise would gain acknowledging their critical heteronomy to foster innovation based on strong and disruptive visions beyond an out of date problem solving approach to design

Creating Different Modes of Existence Toward an Ontological Ethics of Design Jamie Brassett

This paper will address some design concerns relating to philosopher tienne Souriau s work *Les diff rents modes d existence* 2009 This has important bearings upon design because first this philosophical attitude thinks of designing not as an act of forming objects with identity and meaning but rather as a process of delivering things that allow for a multiplicity of creative remodulation of our very existences Secondly Souriau unpicks the concept of a being existing as a unified identity and redefines existence as a creative act of nonstop production of a variety of modes of existence In doing this he not only moves ontological considerations to the fore of philosophical discussions away from epistemological ones but does so in such a way as to align with attitudes to ethics that relate it to ontology notably the work of Spinoza This places Souriau in a philosophical lineage that leads back for example to Nietzsche and Whitehead and forward from his era to Deleuze and Guattari In thinking both ontology and ethics together this paper will introduce a different approach to the ethics of design

Investigating Ideation Flexibility through Incremental to Radical Heuristics Ian Baker Daniel Sevier Seda McKilligan Kathryn W Jablowski Shanna R

Daly Eli M Silk The concept of design thinking has received increasing attention during recent years particularly from managers around the world However despite being the subject of a vast number of articles and books stating its importance the effectiveness of this approach is unclear as the claims about the concept are not grounded on empirical studies or evaluations In this study we investigated the perceptions of six design thinking methods of 21 managers in the agriculture industry as they explored employee and business related problems and solutions using these tools in a 6 hour workshop The results from pre and post survey responses suggest that the managers agreed on the value design thinking could bring to their own domains and were able to articulate on how they can use them in solving problems We conclude by proposing directions for research to further explore adaptation of design thinking for the management practice context

Design Research and Innovation Model Using Layered Clusters of Displaced Prototypes Juan de la Rosa Stan Ruecker The ability of design to recognize the wicked problems inside complex systems and find possible ways to modify them has led other disciplines to try to understand the design process and apply it to many areas of knowledge not traditionally associated with design In addition design s creative solutions and ability to innovate have made designers a valuable resource in the contemporary economy Nevertheless there is still an unnecessarily constraining polemic about the meaning and model of the process of academic research in the field of design the ways in which design research should be conducted and the specific knowledge that is produced with the design research process This paper tries to broaden the discourse by describing the prototype as a basic element of the process of design since it is connected to a specific type of knowledge and based on the working skills of the designer it also proposes a model of the use of prototypes as a research tool based on four different theoretical concepts whose importance in the field of design has been strongly established by different academic communities around the world These are embodied knowledge displacement complexity and that we learn about the world through transforming it Pursuing these models we develop a process to intentionally produce designerly knowledge of complex dynamic systems using layered clusters of displaced prototypes

Solution Generation Design Profiles Reflection on Reflection in Action Shoshi Bar Eli Solution generation design behavior in general and reflection in action in particular can serve to differentiate designers recognizing their personal reflecting when designing In psychology reflection is found a more robust tool to enhance task performance after feedback from a personal device that generates the process itself while interacting with visual representation Differences among students interior design processes appear in their solution generation design behavior A think aloud experiment identified solution generation behavior profiles Qualitative and quantitative methodologies showed how design characteristics unite forming patterns of design behavior A comprehensive picture of designers differences emerged The research aimed to identify individual design students solution generation profiles based on design characteristics to show how reflection in action appearing in the profiles can serve to predict how novice designers learn and act when solving a design problem to enhance the uniqueness of reflection in action for designers

as distinct from reflection in other fields Four distinct solution generation profiles emerged each showing a different type of reflective acts Identifying reflection in action type can robustly predict how designers develop design solutions and help develop pedagogical concepts strategies and tools Let s Get Divorced Pragmatic and Critical Constructive Design Research Jodi Forlizzi Ilpo Koskinen Paul Hekkert John Zimmerman Over the last two decades constructive design research CDR also known as Research through Design has become an accepted mode of scholarly inquiry within the design research community CDR is a broad term encompassing almost any kind of research that uses design action as a mode of inquiry It has been described as having three distinct genres lab field and showroom The lab and field genres typically take a pragmatic stance making things as a way of investigating what preferred futures might be In contrast research done following the showroom approach more commonly known as critical design CD speculative design or design fictions offers a polemic and sometimes also a critique of the current state embodied in an artifact Recently we have observed a growing conflict within the design research community between pragmatic and critical researchers To help reduce this conflict we call for a divorce between CD and pragmatic CDR We clarify how CDR and CD exist along a continuum We conclude with suggestions for the design research community about how each unique research approach can be used singly or in combination and how they can push the boundaries of academic design research in new collaboration with different disciplines Critical and Speculative Design Practice and Semiotics Meaning Crafting for Futures Ready Brands Malex Salamanques This article concerns the use of critical design practices within the context of commercial semiotics arguing that incorporating practices from a critical design approach is valuable for client brands but also an important means with which to incite brands to consider more deeply their role in shaping the future As an alternative to the oppositional approach frequently taken by critical design practitioners working through design practices collaboratively alongside client brands creates potential for the radical changes sought by many of the movement s vanguard A case study of recent work with a corporate client demonstrates the practical effects of using critical design practice within a commercial setting proving the complementarity between critical design practice and commercial semiotics where the confluence of the thinking brought new value to improve product design for example and points to the value of using current leading edge thinking within the design community Beyond Forecasting A Design Inspired Foresight Approach for Preferable Futures Jorn Buhring Ilpo Koskinen This paper engages with the literature to present different perspectives between forecasting and foresight in strategic design while drawing insights derived from futures studies that can be applied in form of a design inspired foresight approach for designers and interdisciplinary innovation teams increasingly called upon to help envisage preferable futures Demonstrating this process in applied research relevant examples are drawn from a 2016 Financial Services industry futures study to the year 2030 While the financial services industry exemplifies an ideal case for design inspired foresight the aims of this paper are primarily to establish the peculiarities between traditional forecasting applications and a design inspired foresight visioning approach as

strategic design activities for selecting preferable futures Underlining the contribution of this paper is the value of design futures thinking as a creative and divergent thought process which has the potential to respond to the much broader organizational reforms needed to sustain in today's rapidly evolving business environment

Developing DIVE a Design Led Futures Technique for SMEs Ricardo Mejia Sarmiento Gert Pasman Erik Jan Hultink Pieter Jan Stappers Futures techniques have long been used in large enterprises as designerly means to explore the future and guide innovation In the automotive industry for instance the development of concept cars is a technique which has repeatedly proven its value However while big companies have broadly embraced futures techniques small and medium sized enterprises SMEs have lagged behind in applying them largely because they are too resource intensive and poorly suited to the SMEs needs and idiosyncrasies To address this issue we developed DIVE Design Innovation Vision and Exploration a design led futures technique for SMEs Its development began with an inquiry into concept cars in the automotive industry and concept products and services in other industries We then combined the insights derived from these design practices with elements of the existing techniques of critical design and design fiction into the creation of DIVE's preliminary first version which was then applied and evaluated in two iterations with SMEs resulting in DIVE's alpha version After both iterations in context it seems that DIVE suits the SMEs because of its compact and inexpensive activities which emphasize making and storytelling Although the results of these activities might be less flashy than concept cars these simple prototypes and videos help SMEs internalize and share a clear image of a preferable future commonly known as vision

Developing DIVE thus helped us explore how design can support SMEs in envisioning the future in the context of innovation

Mapping for Mindsets of Possibility During Home Downsizing Lisa Otto How can design orient people to an expanded sense of future possibility Design researchers are beginning to recognize design's potential role not solely in producing products services and strategies but instead in shifting mindsets and behaviors This shift requires a different view of the design practice from engaging users to gather insights to be implemented to that process as the actual material of the design

Borrowing from the framework of practice oriented design a first step in these processes is expanding participants understanding of future possibilities In opening future possibilities one recognizes an expanded range of futures and ideally engages in dialog with other people and their range of possibilities This paper introduces mapping activities that are intended to reframe participants perception of possible futures This study conducted pilot workshops with participants who were downsizing their home and struggling with decisions about their things and spaces This paper argues that working with people already engaged in life transitions such as downsizing presents a rich opportunity for these futuring methods as they are already beginning to grapple with designing for possible futures These methods provide a stake in the ground for future exploration of potential methods to engender mindsets of possibility and engage in trialing methods like living labs

Storytelling Technique for Building Use Case Scenarios for Design Development Sukwoo Jang Ki young Nam Numerous studies have dealt with what kind of value narrative can have for creating a more

effective design process However there is lack of consideration of storytelling techniques on a stage by stage level where each stage of storytelling technique can draw attention to detailed content for creating use case scenarios for design development This research aims to identify the potential implications for design development by using storytelling techniques For the empirical research two types of workshops were conducted in order to select the most appropriate storytelling technique for building use case scenarios and to determine the relationship between the two methods Afterwards co occurrence analysis was conducted to examine how each step of storytelling technique can help designers develop an enriched content of use case scenario Subsequently the major findings of this research are further discussed dealing with how each of the storytelling technique steps can help designers to incorporate important issues when building use case scenarios for design development These issues are alternative and competitor s solution which can aid designers to create better design features status quo bias of user which can help the designer investigate the occurring reason of the issue and finally social political values of user which have the potential of guiding designers to create strengthened user experience The results of this research help designers and design researchers concentrate on crucial factors such as the alternative or competitor s solution the status quo bias of user and social political values of the user when dealing with issues of building use case scenarios

Group Storymaking Understanding an Unfamiliar Target Group through Participatory Storytelling
Hankyung Kim Soonju Lee Youn kyung Lim Based on a sound research plan qualitative user data help designers understand needs behaviors and frustrations of a target user group However when a design team attempts to design for unfamiliar target groups it is extremely difficult to accurately observe and understand them by simply using traditional research methods such as interviews and observation As a result the quality of user research data can be called into a question which leads to unsatisfying design solutions Inspired by a fiction writer s technique of generating stories together with readers we present the new method Group Storymaking that supports designers to quickly gain broad and clear understanding of an unfamiliar target group throughout a story making activity with actual users We envision Group Storymaking as a new user study method that designers can easily implement to learn about an unfamiliar target involving actual users in a research process with less time and cost commitment

Animation as a Creative Tool Insights into the Complex Ian Balmain Hewitt David A Parkinson Kevin H Hilton A Design for Service DfS approach has been linked with impacts that significantly alter touchpoints services and organizational culture However there is no model with which to assess the extent to which these impacts can be considered transformational In the absence of such a model the authors have reviewed literature on subjects including the transformational potential of design characteristics of transformational design transformational change and organizational change From this review six indicators of transformational change in design projects have been identified evidence of nontraditional transformative design objects evidence of a new perspective evidence of a community of advocates evidence of design capability evidence of new power dynamics and evidence of new organizational standards These indicators along with

an assessment scale have been used to successfully review the findings from a doctoral study exploring the impact of the DFS approach in Voluntary Community Sector VCS organizations This paper presents this model as a first step to establishing a method to helpfully gauge the extent of transformational impact in design projects

Critical design in Japan Ory Bartal,2020-04-17 This book tells the story of critical avant garde design in Japan which emerged during the 1960s and continues to inspire designers today The practice communicates a form of visual and material protest drawing on the ideologies and critical theories of the 1960s and 1970s notably feminism body politics the politics of identity and ecological anti consumerist and anti institutional critiques as well as the concept of otherness It also presents an encounter between two seemingly contradictory concepts luxury and the avant garde The book challenges the definition of design as the production of unnecessary decorative and conceptual objects and the characterisation of Japanese design in particular as beautiful sublime or a product of Japanese culture In doing so it reveals the ways in which material and visual culture serve to voice protest and formulate a social critique

BOOK JACKET **Public Interest Design Education Guidebook** Lisa Abendroth, Bryan Bell, 2018-08-06 Public Interest Design Education Guidebook Curricula Strategies and SEED Academic Case Studies presents the pedagogical framework and collective curriculum necessary to teach public interest designers The second book in Routledge's Public Interest Design Guidebook series the editors and contributors feature a range of learning competencies supported by distinct teaching strategies where educational and community originated goals unite Written in a guidebook format that includes projects from across design disciplines this book describes the learning deemed most critical to pursuing an inclusive informed design practice that meets the diverse needs of both students and community partners Featured chapter themes include Fundamental Skills Intercultural Competencies Engaging the Field Experience Inclusive Iteration and Evaluating Student Learning The book consists of practice based and applied learning constructs that bridge community based research with engaged learning and design practice SEED Social Economic Environmental Design academic case studies introduce teaching strategies that reinforce project specific learning objectives where solving social economic and environmental

issues unites the efforts of communities student designers and educators This comprehensive publication also contains indices devoted to learning objectives cross referenced from within the book as well as considerations for educational program development in public interest design Whether you are a student of design an educator or a designer the breadth of projects and teaching strategies provided here will empower you to excel in your pursuit of public interest design The In-Discipline of Design Annie Gentes,2017-12-01 Design is a conceptive activity which is usually presented as a sensible sequential process and action This book claims that design cannot be reduced to the rational effective planning and organization that most models such as design thinking present The author suggests another type of rationality which is based on what the humanities call aesthetics writing composition and style a rationality based in imaginary elaboration and coherence The chapters therefore demonstrate that design practice is about creating not only functional tools but planes of reflections that challenge norms To support this claim this book analyzes research programs art works and design projects that produced new information and communication technologies ICT This is detailed using examples in each chapter From these examples two types of conclusions are derived a first level considers the lessons that we can draw from these examples in terms of design practice while the second level starts a theoretical discussion based on these analyses of use cases The goal is to develop an understanding of conception in its different forms This book brings the use of these neglected methods to the foreground as a way to explicate the design process Taking into consideration the humanities within design contributes to the discussion on pluridisciplinarity The book posits that design as a historical and situated activity is a truly multidisciplinary endeavor that bridges the gap between engineering sciences and the humanities
