The overall perspective is from an elevated angle, looking down at the street grid.

Design for Diversity Emily Talen, 2008 *Civitas by Design* Howard Gillette, Jr., 2011-06-06 Since the end of the nineteenth century city planners have aspired not only to improve the physical living conditions of urban residents but also to strengthen civic ties through better design of built environments From Ebenezer Howard and his vision for garden cities to today's New Urbanists these visionaries have sought to deepen civitas or the shared community of citizens In *Civitas by Design* historian Howard Gillette Jr takes a critical look at this planning tradition examining a wide range of environmental interventions and their consequences over the course of the twentieth century As American reform efforts moved from progressive idealism through the era of government urban renewal programs to the rise of faith in markets planners attempted to cultivate community in places such as Forest Hills Gardens in Queens New York Celebration Florida and the post Katrina Gulf Coast Key figures including critics Lewis Mumford and Oscar Newman entrepreneur James Rouse and housing reformer Catherine Bauer introduced concepts such as neighborhood units pedestrian shopping malls and planned communities that were implemented on a national scale Many of the buildings landscapes and infrastructures that planners envisioned still remain but frequently these physical designs have proven insufficient to sustain the ideals they represented Will contemporary urbanists efforts to join social justice with environmentalism generate better results Gillette places the work of reformers and designers in the context of their times providing a careful analysis of the major ideas and trends in urban planning for current and future policy makers

The Death and Life of Main Street Miles Orvell,2012-10-01 For more than a century the term Main Street has conjured up nostalgic images of American small town life Representations exist all around us from fiction and film to the architecture of shopping malls and Disneyland All the while the nation has become increasingly diverse exposing tensions within this ideal In The Death and Life of Main Street Miles Orvell wrestles with the mythic allure of the small town in all its forms illustrating how Americans continue to reinscribe these images on real places in order to forge consensus about inclusion and civic identity especially in times of crisis Orvell underscores the fact that Main Street was never what it seemed it has always been much more complex than it appears as he shows in his discussions of figures like Sinclair Lewis Willa Cather Frank Capra Thornton Wilder Margaret Bourke White and Walker Evans He argues that translating the overly tidy cultural metaphor into real spaces as has been done in recent decades especially in the new urbanist planned communities of Elizabeth Plater Zyberk and Andres Duany actually diminishes the communitarian ideals at the center of this nostalgic construct Orvell investigates the way these tensions play out in a variety of cultural realms and explores the rise of literary and artistic traditions that deliberately challenge the tropes and assumptions of small town ideology and life

The Urban Wisdom of Jane Jacobs Jane Jacobs,Sonia Hirt,Diane L. Zahm,2012 Here for the first time is a thoroughly interdisciplinary and international examination of Jane Jacobs s legacy Divided into four parts I Jacobs Urban Philosopher II Jacobs Urban Economist II Jacobs Urban Sociologist and IV Jacobs Urban Designer the book evaluates the impact of Jacobs s writings and activism on the city the professions dedicated to city building and more generally on human thought Together the editors and contributors highlight the notion that Jacobs s influence goes beyond planning to philosophy economics sociology and design They set out to answer such questions as What explains Jacobs s lasting appeal and is it justified Where was she right and where was she wrong What were the most important themes she addressed And although Jacobs was best known for her work on cities is it correct to say that she was a much broader thinker a philosopher and that the key to her lasting legacy is precisely her exceptional breadth of thought

Functionalism Revisited Jon Lang, Walter Moleski, 2016-12-05 A range of current approaches to architecture are neglected in our contemporary writings on design philosophies This book argues that the model of function and the concept of a functional building that we have inherited from the twentieth century Modernists is limited in scope and detracts from a full understanding of the purposes served by the built environment It simply does not cover the range of functions that buildings can afford nor is it tied in a conceptually clear manner to our contemporary concepts of architectural theory Based on Abraham Maslow's theory of human motivations and following on from Lang's widely used text *Creating Architectural Theory The Role of the Behavioral Sciences in Environmental Design* Lang and Moleski here propose a new model of functionalism that responds to numerous observations on the inadequacy of current ways of thinking about functionalism in architecture and urban design Copiously illustrated the book puts forward this model and then goes on to discuss in detail each function of buildings and urban environments
