Design Emotion Moves Pieter Desmet:

Design and Emotion Moves Pieter M.A. Desmet, Jeroen van Erp, MariAnne Karlsson, 2020-11-09 Design Emotion Moves is an edited collection of papers presented at the 5th international Design and Emotion Conference in Gothenburg Sweden In spite of the wide variety of angles and approaches all authors share the basic proposition that in order to understand users or consumers and their behaviour one must understand the affective responses that are involved in the processes of buying using and owning products The book should appeal to anyone interested in understanding emotions involved in human product relationships and in techniques that can help utilising these insights in design practice Emotion Measurement

Herbert L. Meiselman, 2021-04-09 Emotion Measurement Second Edition highlights key elements of emotions that should be considered in the measurement of emotions in both academic and commercial environments This edition begins with an updated review of basic studies of emotion including the theory physiology and psychology of emotions as these are the foundational studies which food scientists as well as product developers and marketing professionals need to be aware of The second section highlights methods for studying emotions and reviews the different approaches to emotion measurement questionnaire self report behavioral and physiological This section explores the merits of intrinsic versus extrinsic measures of emotion Some new measurement approaches have emerged since the first edition of this book The book then presents practical applications with chapters on emotion research in food and beverage as well as in a range of products and clinical settings The experience in testing product emotions has increased since the first edition when product emotion research was newer Finally Emotion Measurement Second Edition provides coverage of cross cultural research on emotions This is critical because much of the newer commercial research is aimed at markets around the world requiring methods that work in many cultures And the universality of emotions has been a topic of research for decades Taking both an academic and applied approach Emotion Measurement Second Edition will be an invaluable reference for those conducting basic academic research on emotions and for sensory and consumer scientists and the product developers and marketing professionals they work alongside Reviews both the academic and the applied strands of emotion measurement research Focuses on cross cultural studies of emotions which is currently lacking from most of the literature in the field Highlights methods for studying emotions in both basic and applied studies **Experience Design** Peter Benz, 2014-12-18

How can we design better experiences Experience Design brings together leading international scholars to provide a cross section of critical thinking and professional practice within this emerging field Contributors writing from theoretical empirical and applied design perspectives address the meaning of experience draw on case studies to explore ways in which specific experiences can be designed examine which methodologies and practices are employed in this process and consider how experience design interrelates with other academic and professional disciplines Chapters are grouped into thematic sections addressing positions objectives and environments and interactions and performances with individual case studies addressing a wide

range of experiences including urban spaces the hospital patient museum visitors mobile phone users and music festival and restaurant goers

Moving Objects Damon Taylor, 2020-09-17 Moving Objects deals with emotive design designed objects that demand to be engaged with rather than simply used If postmodernism depended upon ironic distance and Critical Design is all about questions then emotive design runs hotter than this confronting how designers are using feelings in what they make Damon Taylor's original study considers these emotionally laden highly authored works often produced in limited editions and sold like art objects such as a chair made from cuddly toys a leather sofa that resembles a cow and a jewellery box fashioned from human hair Tracing the phenomenon back to the Dutch inflection that began with Droog designers like Jurgen Bey and Hella Jongerius Taylor conducts an analysis of the development of Design Art and looks for its origins in the uncanny explorations of surrealism Offering a critique of Speculative Design and an examination of the work of designers such as Mathias Bengtsson whose work involves growing furniture inside computers Taylor asks what happens when the tangible melts into the datascape and design becomes a question of mobilities In this way Moving Objects examines contemporary issues of how we live with artefacts and what design can do

Funology M.A. Blythe, K. Overbeeke, A.F. Monk, P.C. Wright, 2006-03-28 This book reflects the

move in Human Computer Interaction studies from standard usability concerns towards a wider set of problems to do with fun enjoyment aesthetics and the experience of use Traditionally HCI has been concerned with work and task based applications but as digital technologies proliferate in the home fun becomes an important issue There is an established body of knowledge and a range of techniques and methods for making products and interfaces usable but far less is known about how to make them enjoyable Perhaps in the future there will be a body of knowledge and a set of techniques for assessing the pleasure of interaction that will be as thorough as those that currently assess usability This book is a first step towards that It brings together a range of researchers from academia and industry to provide answers Contributors include Alan Dix Jacob Nielsen and Mary Beth Rosson as well as a number of other researchers from academia and industry

Funology 2 Mark Blythe, Andrew Monk, 2018-07-20 How should we understand and design for fun as a User Experience This new edition of a classic book is for students designers and researchers who want to deepen their understanding of fun in the context of HCI The 2003 edition was the first book to do this and has been influential in broadening the field It is the most downloaded book in the Springer HCI Series This edition adds 14 new chapters that go well beyond the topics considered in 2003 New chapter topics include online dating interactive rides wellbeing somaesthetics design fiction critical design and participatory design methods The first edition chapters are also reprinted with new notes by their authors setting the context in which the 2003 chapter was written and explaining the developments since then Taken with the new chapters this adds up to a total of 35 theoretical and practical chapters written by the most influential thinkers from academia and industry in this field
