Design In The Terrain Of Water:

Design in the Terrain of Water Anuradha Mathur, Dilip da Cunha, 2014 Design in the Terrain of Water makes room for water as a ground in design water that is everywhere before it is somewhere water that is in rain before it is in rivers soaks before it flows spreads before it gathers blurs before it clarifies water that is ephemeral transient uncertain interstitial chaotic omnipresent This is water to which people are increasingly turning to find innovative solutions to water scarcity pollution aquifer depletion and other problems that are assuming center stage in local and global politics dynamics and fears It is also water that is celebrated and ritualized in ordinary and everyday practices across many cultures The book brings together the work of eminent professionals designers artists scientists and theorists who respond to the challenges that this water poses its visualization its infrastructure its politics and its science At a moment when design disciplines are beginning to embrace measures such as flexibility agility and resilience this book makes an important and timely contribution These are measures that we associate more closely with water and watery imagination than the terra firma that grounds aspirations of prediction and control that have proved elusive perhaps even detrimental The book asks if in this time of uncertainty and ambiguity brought on by increasing openness of economies cultures and ecologies we need to re invent our relationship with water Should we look to the past present and future and ask if in seeing water somewhere rather than everywhere we miss opportunities practices and lessons that could inform and transform the design project What role has representation and visualization played in confining water to a place on land Can we look at projects in history and projects emerging today cities infrastructures buildings landscapes artworks with a cultivated eye for waters everywhere What is it to see water as not within adjoining serving or threatening settlement but the ground of settlement Design in the Terrain of Water is a collection of visual and textual essays that present a way a direction and perhaps even a paradigm shift in how professionals imagine build and advocate in a terrain of water

Pendleton-Jullian, John Seely Brown, 2018-12-04 Tools for navigating today s hyper connected rapidly changing and radically contingent white water world Design Unbound presents a new tool set for having agency in the twenty first century in what the authors characterize as a white water world rapidly changing hyperconnected and radically contingent These are the tools of a new kind of practice that is the offspring of complexity science which gives us a new lens through which to view the world as entangled and emerging and architecture which is about designing contexts In such a practice design unbound from its material thingness is set free to design contexts as complex systems In a world where causality is systemic entangled in flux and often elusive we cannot design for absolute outcomes Instead we need to design for emergence Design Unbound not only makes this case through theory but also presents a set of tools to do so With case studies that range from a new kind of university to organizational and even societal transformation Design Unbound draws from a vast array of domains architecture science and technology philosophy cinema music literature and poetry even the military It is presented in five books bound as two volumes Different books within the larger system of books will
