Design Quality In New Housing Learning From The Netherlands:

Design Quality in New Housing Matthew Cousins, 2009-06-02 This book addresses the need for an in depth study into design quality in new housing The wider implications of policy and design are examined through a series of case studies of new housing projects in the UK and the Netherlands Dutch interdisciplinary design and modern methods of construction are widely considered to be of the highest quality from which much can be learned and understood This new guide offers architects the best practice for the design policy and construction of new homes The author considers proposals for the Thames Gateway and government incentives to create better quality housing including the 60 000 house and design reviews The wider implications of skills and training of architects planners design professionals and those parties involved in housing are also addressed

Multi-Unit Housing in Urban Cities Katy Chey, 2017-11-06 This book investigates the development of multi unit housing typologies that were predominant in a particular city from the 1800s to present day It emphasises the importance of understanding the direct connection between housing and dwelling in the context of a city and the manner in which the city is an instructional indication of how a housing typology is embodied The case studies presented offer an insight into why a certain housing type flourished in a specific city and the variety span across cities in the world where distinct housing types have prevailed It also pursues how housing types developed evolved and helped define the city looks into how dwellers inhabited their dwellings and analyses how the housing typologies correlates in a contemporary context The typologies studied are back to backs in Birmingham tenements in London Haussmann Apartment in Paris tenements in New York tong lau in Hong Kong perimeter block linear block and block edge in Berlin perimeter block and solitaire in Amsterdam space enclosing structure in Beijing micro house in Tokyo and high rise in Toronto

Design for Adaptability in Mass Housing Guopeng Li, 2020-11-05 Before discussing the research itself in greater depth it is beneficial at this stage to introduce the background to the research To do so the chapter is divided into four parts The first part of the chapter summarises terminologies associated with adaptability and goes on to define and elaborate on the meaning of adaptability in this research study The second part of this chapter defines mass housing the development of mass housing and its problems are also illustrated In the third part as the key solution for addressing housing occupants requirements and accommodating changes the importance of adaptability in improving overall housing quality particularly from a social financial and environmental point of view is outlined The sustainability of adaptability is also discussed Even though studies of adaptability have been developed structurally functionally technically and financially adaptability still occupies a marginal position due to the production of mass housing The final part of the chapter rethinks the notion of adaptability for mass housing Factors of mass housing related to social financial technical and design issues and which address adaptability are explored Lastly it is revealed that the design aspect of adaptability is chosen as the research focus in this research study

The British National Bibliography Arthur James Wells, 2009 *Design Governance* Matthew Carmona, Claudio De Magalhaes, Lucy

Natarajan,2016-12-19 Design Governance focuses on how we design the built environment where most of us live work and play and the role of government in that process To do so it draws on the experience of the Commission for Architecture and the Built Environment CABE a decade long globally unique experiment in the governance of design This book theorises design governance as an arm and aspiration of the state tells the story of CABE warts and all and what came before and after unpacks CABE s informal toolbox its methods and processes of design governance and reflects on the effectiveness and legitimacy of design as a tool of modern day government The result is a new set of concepts through which to understand the governance of design as a distinct and important sub field of urban design **CORP 2011 Proceedings/Tagungsband**

Manfred Schrenk,Vasily V. Popovich,Peter Zeile, **Art Index** Alice Maria Dougan,Margaret Furlong,2000 Architecture In Use DJM van der Voordt,HBR van Wegen,2007-06-01 This unique book discusses programming design and building evaluation providing a joined up approach to building design By linking the functional and architectonic qualities of a building the authors show the practical implications of the utility value of buildings Starting by looking at how the relationship between form and function has been dealt with by different approaches to architecture from a historical perspective it goes on to discuss how the desired functional quality and utility value of a building can be expressed in a brief and given a physical form by the architect Finally it advises on how to carry out post occupancy evaluation and provides the architect with methods and techniques for testing whether the intended utility value of a building has been achieved

Improvement of Buildings' Structural Quality by New Technologies Christian Schauer,ENG. Federico Mazzolani,Gerald Huber,Gianfranco de Matteis,Heiko Trumpf,Heli Koukkari,Jean-Pierre Jaspart,Luis Bragança,2005-01-20 Launched in May 2000 the aims of the COST C12 cooperative action were to develop combine and disseminate new technical engineering technologies to improve the quality of urban buildingsto propose new technical solutions to architects and plannersto reduce the disturbance caused by construction in urban areas and improve urban quality of life This **Bringing Communities Together** Bev France,Vicki Compton,2012-07-30 Over recent years connective partnerships between educational communities and sectors outside of education have become increasingly popular One significant reason behind this popularity has the expansion of information and communication technologies which have increased access and provided mechanisms for ongoing connections to be made between differing worlds But successful connections that cross cultural boundaries are not easy to establish and even harder to maintain in ways that are mutually beneficial This book focuses on science and technology connective ventures and the complexity inherent in bringing such worlds together The authors have been in the business of developing such connections and this book brings them together to describe how and why making connections can support the science technology education sector the technology science communities and the wider sociocultural life we all inhabit A range of illustrative examples of connections in action provide an empirical basis from which to explore and gain insight into the issues for and potential of such connective ventures alongside a rich mix of critical

commentary arguments cautions and challenges Five key principles have been distilled from the collective experience and wisdom of the authors serving to capture that which underpins effective and efficient connective initiatives Each principle is accompanied by a set of questions that reflect the issues raised and successes illustrated throughout the book It is hoped these principles and questions will serve to guide people interested in developing funding and or participating in future connective initiatives in the fields of science and technology

Ways to Study and Research Urban, Architectural and Technical Design T.M. de Jong,D.J.M. van der Voordt,2002 How can we develop a scientific basis for architectural urban and technical design When can a design be labelled as scientific output comparable with a scientific report What are the similarities and dis similarities between design and empirical research and between design research typological research design study and study by design Is there a need for a particular methodology for design driven study and research With these questions in mind more than forty members of the Faculty of Architecture of the Delft University of Technology have described their ways of study and research Each chapter shows the objectives the methodology and its implementation in search for a deeper knowledge of design processes and an optimal quality of the design itself The authors among them architects urban planners social scientists lawyers technicians and information scientists have widely differing backgrounds Nevertheless they share a great deal The central focus is a better understanding of design processes design tools and the effects of design interventions on issues such as utility aesthetics meaning sustainability and feasibility
