Analysis of Engineering Design Studies for Demilitarization of Assembled Chemical Weapons at Pueblo Chemical Depot National Research Council, Division on Engineering and Physical Sciences, Board on Army Science and Technology, Committee on Review and Evaluation of Alternative Technologies for Demilitarization of Assembled Chemical Weapons: Phase II, 2001-10-27 The Program Manager for Assembled Chemical Weapons Assessment PMACWA of the Department of Defense DOD requested the National Research Council NRC to assess the engineering design studies EDSs developed by Parsons Honeywell and General Atomics for a chemical demilitarization facility to completely dispose of the assembled chemical weapons at the Pueblo Chemical Depot in Pueblo Colorado To accomplish the task the NRC formed the Committee on Review and Evaluation of Alternative Technologies for Demilitarization of Assembled Chemical Weapons Phase II ACW II Committee This report presents the

results of the committee's scientific and technical assessment which will assist the Office of the Secretary of Defense in selecting the technology package for destroying the chemical munitions at Pueblo. The committee evaluated the engineering design packages proposed by the technology providers and the associated experimental studies that were performed to validate unproven unit operations. A significant part of the testing program involved expanding the technology base for the hydrolysis of energetic materials associated with assembled weapons. This process was a concern expressed by the Committee on Review and Evaluation of Alternative Technologies for Demilitarization of Assembled Chemical Weapons (ACWI Committee) in its original report in 1999 (NRC 1999). The present study took place as the experimental studies were in progress. In some cases, tests for some of the supporting unit operations were not completed in time for the committee to incorporate results into its evaluation. In those cases, the committee identified and discussed potential problem areas in these operations. Based on its expertise and its aggressive data gathering activities, the committee was able to conduct a comprehensive review of the test data that had been completed for the overall system design. This report summarizes the study.

**Designing Knowledge** Bonne Zabolotney, 2024-01-11. By positioning designers and their practices at the center of design studies, *Designing Knowledge* merges theory and practice to highlight how knowledge creation can contribute to an expanded and more inclusive design practice. Bringing together a rich variety of perspectives, methods, and approaches, and by exploring and critiquing current issues in design studies, this book encourages designers to reflect on their work in a new light. Design studies practice is a material and tangible focus on knowledge production and mobilization in the field of design. Throughout 15 chapters featuring a wide range of case studies, design practitioners and theorists address how they produce and mobilize knowledge about design through their practice. Chapters explore how to dismantle the colonial structures of modernist design and depart from the privileged spaces of art historical concepts in design history. They address tensions between traditional Indigenous design and contemporary design practice, discuss how to authentically integrate personhood into practice, and explore topics such as designing wellbeing, developing communities of care, informed accountability, and principles of the ecocene. They also analyze languages and typographic representations and investigate the nature of the graphic and typographic translation of literary texts, focusing on the writing of Argentinian writer Jorge Luis Borges as a case study. This book elevates the voices of designers and their work and offers insights to professional designers as well as students on how

to use these contributions when working on future projects By highlighting the awareness of designers throughout their practice this book will inspire others to reflect on their work and share their own knowledge for the benefit of the field of design
