Design Through Dialogue A Guide For Architects And Clients:

Design through Dialogue Karen A. Franck, Teresa von Sommaruga Howard, 2010-02-15 Completed projects receive more public attention than the process of their creation and so the myth that architects design buildings alone lives on. In fact, architects work with a great many others and the relationships that develop particularly with clients have a significant impact on design. *Design through Dialogue* explores the relationship between client and architect through the lens of four overlapping activities that occur during any project: relating, talking, exploring, and transforming. Cases of design and collaboration range from smaller scale retail, residential, and educational projects in the US, Sweden, the UK, and the Pacific Rim to large institutions including Seattle's Central Library, the National Museum of the American Indian in Washington DC, the Supreme Court in Jerusalem, and the Museum of New Zealand. Material is taken from interviews with clients and architects and research in psychotherapy, group dynamics, and design studies. Throughout the book, aspects of process are linked to design outcomes to illustrate how architects and clients collaborate creatively. *Design Through Dialogue* Karen A. Franck, Teresa Von Sommaruga Howard, 2010

The Designer's Field Guide to Collaboration Caryn Brause, 2016-11-18 The Designer's Field Guide to Collaboration provides practitioners and students with the tools necessary to collaborate effectively with a wide variety of partners in an increasingly socially complex and technology-driven design environment. Beautifully illustrated with color images, the book draws on the expertise of top professionals in the allied fields of architecture, landscape architecture, engineering, and construction management and brings to bear research from diverse disciplines such as software development, organizational behavior, and outdoor leadership training. Chapters examine emerging and best practices for effective team building, structuring workflows, enhancing communication, managing conflict, and developing collective vision, all to ensure the highest standards of design excellence. Case studies detail and reflect on the collaborative processes used to create award-winning projects by Studio Gang, Perkins+Will, Tod Williams Billie Tsien Architects, Partners, Gensler, CDR Studio, Mahlum Architects, In-Site Architecture, and Thornton Tomasetti's Core Studio. The book also provides pragmatic ideas and formal exercises for brainstorming, productively evaluating ideas, communicating effectively, and offering feedback. By emphasizing the productive influence and creative possibilities of collaboration within the changing landscape of architectural production, the book proposes how these practices can be taught in architecture school and expanded in practice. In a changing world that presents increasingly complex challenges, optimizing these collaborative skills will prove not only necessary but crucial to the process of creating advanced architecture. *Handbook of Research on Ergonomics and Product Design* Hernández Arellano, Juan Luis, Maldonado Macías, Aide Aracely, Castillo Martínez, Juan Alberto, Peinado Coronado, Porfirio, 2018-04-06 Product design is an important field where ergonomics and human factors should be applied. To achieve this goal, effective strategies for process improvement must be researched and implemented. The Handbook of Research on Ergonomics and Product Design is a critical scholarly resource that provides new

theories methodologies and applications of ergonomics and product design and redesign Featuring a broad range of topics such as additive manufacturing product analysis and sustainable packing development this book is geared towards academicians practitioners and researchers seeking current research on new theories methods and applications related to ergonomics and product design *Making Places for People* Christie Johnson Coffin, Jenny Young, 2017-02-10 Honorable Mention at the 2019 ERDA Great Places Awards *Making Places for People* explores twelve social questions in environmental design Authors Christie Johnson Coffin and Jenny Young bring perspectives from practice and teaching to challenge assumptions about how places meet human needs The book reveals deeper complexities in addressing basic questions such as What is the story of this place What logic orders it How big is it How sustainable is it Providing an overview of a growing body of knowledge about people and places *Making Places for People* stimulates curiosity and further discussion The authors argue that critical understanding of the relationships between people and their built environments can inspire designs that better contribute to health human performance and social equity bringing meaning and delight to people's lives

InterVIEWS Federica Goffi, 2019-12-05 With the continued growth of PhD programs in architecture and the simultaneous broadening of approaches *InterVIEWS Insights and Introspection on Doctoral Research in Architecture* begins a timely survey into contemporary research at academic institutions internationally in the context of the expanding landscape of architectural inquiry The eighteen interviews with scholars who direct or contributed to doctoral research programs in areas of architecture history and theory theory and criticism design research urban studies cross disciplinary research and practice based research expose a plurality of positions articulating a range of research tactics Renowned scholars narrated the stories the experiences and the research that shaped and are shaping doctoral education worldwide providing an invaluable knowledge resource from which readers may find inspiration for their work *InterVIEWS* acknowledges the diversity in approaches to research to evidence meaningful differences and the range of contributions in academic institutions The relevance of this self reflection becomes apparent in the exposition of vibrant and at times divergent viewpoints that offer a thought provoking opportunity to consider the openness and breadth of a field that is unrelenting in redefining its boundaries along with the probing questions

Designing Inclusive Systems Patrick Langdon, John Clarkson, Peter Robinson, Jonathan Lazar, Ann Heylighen, 2012-03-09 The Cambridge Workshops on Universal Access and Assistive Technology CWUAAT are a series of workshops held at a Cambridge University College every two years The workshop theme Designing inclusion for real world applications refers to the emerging potential and relevance of the latest generations of inclusive design thinking tools techniques and data to mainstream project applications such as healthcare and the design of working environments Inclusive Design Research involves developing tools and guidance enabling product designers to design for the widest possible population for a given range of capabilities There are five main themes Designing for the Real World Measuring Demand And Capabilities Designing Cognitive Interaction with Emerging Technologies Design

for Inclusion Designing Inclusive Architecture In the tradition of CWUAAT we have solicited and accepted contributions over a wide range of topics both within individual themes and also across the workshop s scope We ultimately hope to generate more inter disciplinary dialogues based on focused usage cases that can provide the discipline necessary to drive further novel research leading to better designs The aim is to impact industry and end users as well governance and public design thereby effectively reducing exclusion and difficulty in peoples daily lives and society

Mobilising Design Justin Spinney,Suzanne Reimer,Philip Pinch,2017-02-24 This book brings together research working at the boundary between design knowledges and mobilities offering a novel collection for both theorists and practitioners Drawing upon detailed case studies it demonstrates the diverse roles of design in shaping mobility at different spaces and scales across cities within different types of buildings and infrastructures and through commuting work and leisure activities A range of international scholars illustrate the designed mobilities of car parks traffic lights street benches pedestrian wayfinding systems and accessible design in the urban environment they examine spaces within hospitals airports and train stations and investigate design practices for bicycles future urban vehicles and MotoGP motorcycle racing Other contributions explore overlooked mobile artefacts such as television and video game remote controls 3D printing and the types of packaging which enable objects themselves to move around This book demonstrates how the tools assumptions and processes of design shape spaces of mobility and also illuminates how shifts in the fluidity and circulation of people practices and materials in turn reconfigure practices of design Mobilising Design develops multi disciplinary understandings of design drawing upon diverse literatures including design history product design architecture and cultural geography By highlighting often invisible artefacts and associated knowledges and controversies the book foregrounds the taken for granted ways in which everyday mobility is designed It will be of interest to scholars in geography sociology economic history architecture design and urban theory
