Designing and Analyzing Language Tests

This hands-on introduction to designing and analyzing language tests gives you a sound and accessible introduction to language testing theory and practice. It includes a step-by-step presentation of using Excel for analyzing language test data, a glossary of key terms, an overview of important related topics, and referencing to language testing and measurement literature.

Part 1 offers a solid grounding in language assessment theory, followed by practical guidance and procedures for developing and administering language tests. The key areas of test design, task specification, reliability, scoring, rubrics and rating procedures, test validity, and test administration procedures are all covered in depth.

Part 2 introduces the use of Excel for statistical analysis procedures and provides practice with the program, explaining the role of descriptive statistics and core concepts such as correlation. It demonstrates how to identify which test questions need improvement, and how to calculate test reliability or dependability.

The CD-ROM features:

- A set of 12 Excel worksheets for hands-on practice
- A set of 10 video tutorials demonstrating and narrating the procedures to accompany each Excel worksheet
- Completed worksheets for you to check your answers.

Nathan T. Carr is an Associate Professor at California State University. He teaches an introductory course on language testing and supplementary classes in research methods, curriculum development, and teaching methodology. His research interests include web-based language testing, the effects of task characteristics on the measurement properties of test items, the development of common specifications for proficiency testing in multiple languages, test validation, and the role of rating scales in writing assessment.
