Shaping the World as a Home Erik Evens, 2024-09-03 The first book on the precisely detailed sumptuous architecture of one of the finest firms working in traditional styles in California. Evens has long been considered one of the country's leading contemporary architects who aspires to create the complete living environment in the same vein as Gil Schafer, Bobby McAlpine, Ray Booth, and Stanley Dixon. His inspiration is drawn from classical traditions and informed by contemporary indoor/outdoor life; in this case, the indoor/outdoor life of California. Evens explains the core design values that bring unique and compelling force to his work: crafting architecture that speaks to people. Evens's projects are stylistically diverse, from a Spanish Colonial Revival estate in Malibu overlooking the Pacific to an American farmhouse-inspired residence in the golden hills of Southern California to a gracious ranch house embedded within the old oak trees studding the coastal landscape of Montecito. Natural materials such as wood, stone, and brick form the foundations, walls, and ceilings of these subtly luxurious spaces, while nature itself plays a considered role that is at once complementary and intricately conjoined with the work.

American Arcadia Peter J. Holliday, 2016-05-03 A vivid and engaging exploration of California's debt to the ancient world. Discussing the influence of the classics on America is nothing new; indeed, classical antiquity could be considered second only to Christianity as a force in modeling America's national identity. What has never been explored until now is how, from the beginning, Californians in particular chose to visually and culturally craft their new world using the rhetoric of classical antiquity. Through a lively exploration of material culture, literature, and architecture, *American Arcadia* offers a tour through California's development as a Mediterranean haven from the late nineteenth century to the present. In its earliest days, California was touted as the last opportunity for alienated Yankees to establish the refined gentleman farmer culture envisioned by Jefferson and build new cities free of the filth and corruption of those they left back East. Through architecture and landscape design, Californians fashioned an Arcadian setting evocative of ancient Greece and Rome. Later, as Arcadia gave way to urban sprawl, entire city plans were drafted to conjure classical antiquity: self-styled villas dotted the hills, and utopian communities began to shape the state's social atmosphere. Art historian Peter J. Holliday traces the classical influence primarily through the evidence of material culture, yet the book emphasizes the stories and people famous and forgotten behind the works, such as Florence Yoch, the renowned landscape designer and set designer for *Gone with the Wind*, and Sister Aimee Semple McPherson, the most publicized Christian evangelist of her day whose sermons filled the Pantheon-like Angelus Temple. Telling stories from the creation of the famed

aqueducts that turned the semi arid landscape to a cornucopia of almonds alfalfa and oranges to the birth of the body sculpting movement American Arcadia offers readers a new way of seeing our past and ourselves
