Beethoven's Dedications Artur Pereira, 2020-12-30 The dedication of a piece of music is a feature generally overlooked but it can reveal a great deal about the work the composer the society and the music world in which the composer lived This book explores the musical biographical and sociological aspects of the practice of dedicating new compositions in the late 18th and early 19th centuries and makes a significant contribution towards a better understanding of the impact these tributes had on Beethoven's life and work and their function within the context of the musical cultural and economic environments in which they appeared As the first of its kind this study demonstrates that as a result of their different functions published dedications and handwritten inscriptions are distinct from one another and for that reason they have been classified in different categories This book therefore challenges the idea of what exactly can be termed as a dedication a concept which extends far beyond the dedication of musical works

A Clarinet Almanac John Macfarlane, 2023-04-28 More than 60 years experience in playing the clarinet has led to a very personal and idiosyncratic review of the repertoire From the point of view of being both a player and a programmer the author has endeavoured to find works for unusual combinations involving the clarinet This book includes a few orchestral solos and several vocal works both chamber and operatic but it is focussed on chamber music and includes gems from the repertoire for the standard wind quintet The clarinet features as a solo instrument in duos with a surprisingly large variety of instruments and in mixed trios quartets and so on to larger ensembles During the course of one year the reader will be exposed to 366 works probably some unfamiliar by 245 different composers The author hopes it will
