**Education and the Political** Tomasz Szukdlarek,2013-11-19 The essays in this collection address the relation between education and politics in new ways Rather than understanding education simply as the object of political decision making or as preparation for politics the authors of this volume see education as implicated in social conflicts and in the political processes that produce and change social structures Education then is a practice that reconfigures the relations between subjectivities and the political The collection focuses on several critical cases and theoretical debates where the relation between education and politics demands new articulations It explores the potential of theoretical languages proposed by Ranci re Laclau Derrida Mouffe Bakhtin and other thinkers whose work has not yet been fully recognized in its pedagogical meaning **Complexity Theory and the Philosophy of Education** Mark Mason,2009-02-23 A collection of scholarly essays

Complexity Theory and the Philosophy of Education provides an accessible theoretical introduction to the topic of complexity theory while considering its broader implications for educational change. Explains the contributions of complexity theory to philosophy of education curriculum and educational research. Brings together new research by an international team of contributors. Debates issues ranging from the culture of curriculum to the implications of work of key philosophers such as Foucault and John Dewey for educational change. Demonstrates how social scientists and social and education policy makers are drawing on complexity theory to answer questions such as why is it that education decision makers are so resistant to change how does change in education happen and what does it take to make these changes sustainable. Considers changes in use of complexity theory developed principally in the fields of physics biology chemistry and economics and now being applied more broadly to the social sciences and to the study of education. Neuroscience and Education Clarence

Joldersma, 2016-03-02 This volume makes a philosophical contribution to the application of neuroscience in education. It frames neuroscience research in novel ways around educational conceptualizing and practices while also taking a critical look at conceptual problems in neuroeducation and at the economic reasons driving the mind brain education movement. It offers alternative approaches for situating neuroscience in educational research and practice including non reductionist models drawing from Dewey and phenomenological philosophers such as Martin Heidegger and Merleau Ponty. The volume gathers together an international bevy of leading philosophers of education who are in a unique position to contribute conceptually rich and theoretically framed insight on these new developments. The essays form an emerging dialogue to be used within philosophy of education as well as neuroeducation educational psychology teacher education and curriculum studies. Habermas and Social Research Mark Murphy, 2016-11-25 One of the greatest contributors to the field of

Sociology Jürgen Habermas has had a wide ranging and significant impact on understandings of social change and social conflict. He has inspired researchers in a range of disciplines with his multidimensional social theory however an overview of his theory in applied settings is long overdue. This collection brings together in one convenient volume a set of researchers who place Jürgen Habermas key concepts such as colonisation deliberation and communication at the centre of their research methodologies. Full of insight and innovation this book is an essential read for those who want to harness the potential of Habermas core concepts in their own work thereby helping to bridge the gap between theory and method in social research. Structured around three core themes Habermas and Social Research provides a range of research case studies looking at system colonization the politics of deliberation and communicative interactions. Issues as diverse as social movements the digital public sphere patient involvement migration and preschool education are all covered in the book intertwined with a set of innovative approaches to theory application in social research. Designed to help researchers harness the potential of Habermas core concepts as methodological tools this timely volume will prove highly useful for graduate and upper level undergraduates within the fields of theory and method research design public policy education policy urban and

Educational leadership has a rich history of epistemological debate From the Theory Movement of the 1950 1960s through to Greenfield s critique of logical empiricism in the 1970s the emergence of Bates and Foster s Critical Theory of educational administration in the 1980s and Evers and Lakomski s naturalistic coherentism from 1990 to the present time debates about ways of knowing doing and being in the social world have been central to advancing scholarship However since the publication of Evers and Lakomski s work questions of the epistemological preliminaries of research have become somewhat marginalised This is not to suggest that such discussions are not taking place but rather that they have been sporadic and piecemeal In *New Directions in Educational Leadership Theory* the contributors sketch possible alternatives for advancing scholarship in educational leadership The coherence of this volume comes not from the adoption of a single theoretical lens but rather from its engagement with epistemology ontology and methodology The choice of the plural alternatives is deliberate and its use is to evoke the message that there is more than one way to advance knowledge The approaches adopted across this collection offer fruitful directions for the field and hopefully will stimulate substantive dialogue and debate in the interest of advancing knowledge This book was originally published as a special issue of *Educational Philosophy and Theory*

*Methods in Philosophy of Education* Frieda Heyting, Dieter Lenzen, John White, 2002-11-01 This important new book presents a dual strand argument Firstly it gives a comprehensive account of methods in philosophy of education with leading international figures in the field of writing from a variety of methodological and epistemological perspectives Secondly it examines their application in the real world of education using the topical area of children s rights as a basis for investigation It will therefore be of interest to philosophers and educationalists alike

**Handbook of Cultural Politics and Education**, 2010-01-01 In academia the effects of the cultural turn have been felt deeply In everyday life tenets from cultural politics have influenced how people behave or regard their options for action such as the reconfiguration of social movements protests and praxis in general Many authors writing in this field are known for their scholarship and social activism both of which are arguably guided by principles of cultural politics about the nature of representation and the deployment of power in political discourses The *Handbook of Cultural Politics and Education* is less an attempt to standardize contemporary educational scholarship and more a collection that engages the problems and promises of recent themes in social and cultural thought which require our attention and demand a response In other words it opens doors to questions rather than convenient answers to difficult educational dilemmas The *Handbook* is part of the appraisal of an opening created by interdisciplinary writings on such themes as representation civil society cultural struggle subjectivity and media within the context of education Indeed cultural politics troubles traditional frameworks in search of critical explanations concerning education s place within society The contributions in the collection support this endeavor

*Leaders in Philosophy of Education* Leonard J. Waks, 2014-11-26 In the late 1950s plans were initiated to bring a higher level of

professionalism to the training of educational professionals New projects included introducing contemporary scholarship from the humanities and social sciences into colleges of education to revitalize the education knowledge base In North America and the United Kingdom analytical philosophers were recruited to inaugurate a new philosophy of education Analytical philosophy of education soon spread throughout the English speaking world By the 1980s this analytical impulse had largely subsided Philosophers trained in analytical philosophy and their students turned to more ambitious normative pursuits related to problems of social justice and democracy Meanwhile feminist philosophers opened up new issues regarding the education of women and the nature of teaching and knowing and a new wave of pragmatist philosophers turned to issues of educational policy By the 1990s Anglo American philosophers of education welcomed a dialogue with counterparts in Western Europe and the field responded to established trends in European philosophy ranging from critical theory and phenomenology to post structuralism New leaders emerged in philosophy of education representing all of these various strands This volume documents the emergence of contemporary philosophy of education as seen by those spearheading these trends      *Education Governance and Social Theory* Andrew Wilkins, Antonio Olmedo, 2018-10-04 The study of education governance is a significant area of research in the twenty first century concerned with the changing organisation of education systems relations and processes against the background of wider political and economic developments occurring nationally and globally In *Education Governance and Social Theory* these important issues are critically examined through a range of innovative theoretical perspectives and methodological approaches to assist in guiding those interested in better understanding and engaging with education governance as an object of critical inquiry and a tool or method of research With contributions from an international line up of academics the book judiciously combines theory and methodologies with case study material taken from diverse geo political settings to help frame and enrich our understanding of education governance This is a theoretically and empirically rich resource for those who wish to research education governance and its multifarious operations conditions and effects but are not sure how to do so It will therefore appeal to readers who have a strong interest in the practical application of social theory to making sense of the complex changes underway in education across the globe      *Complexity Theory and the Politics of Education* , 2010-01-01 Complexity theory has become a major influence in discussions about the theory and practice of education This book focuses on a question which so far has received relatively little attention in such discussions which is the question of the politics of complexity The chapters in this book engage with this question in a range of different ways Whereas some contributions make a case for the promotion of complexity in education others focus more explicitly on questions concerning the reduction of complexity in and through education The chapters do so using theoretical historical and empirical arguments paying attention to a range of different educational settings including early childhood education school education post compulsory education lifelong learning and work based education and focusing on different aspects of these practices such as curriculum

pedagogy assessment architecture and management Taken together the chapters not only reveal the potential of complexity for engaging with questions about the politics of education in new and different ways They also provide examples of a more reflexive engagement with the politics of complexity in education itself Philosophy and Education as Action Yusef Waghid, Nuraan Davids, 2017-03-08 Nuraan Davids and Yusef Waghid teach philosophy of education to students who are completing a post graduate certificate in education PGCE in order to qualify as teachers They make the argument that philosophy and education are intertwined as action concepts with the potential to affect teacher education practices Philosophy and Education as Action Implications for Teacher Education endeavors to clarify pertinent philosophical concepts in education and look at how these concepts impact teaching learning and management as classroom practices Through the philosophical concepts of epist m knowledge phronesis practical reasoning praxis productive action paideia education parhessia free speech techn craft or art dialogos deliberative engagement philia love and friendship kosmopolitis cosmopolitanism and dinamis potentiality students can come to speech through a philosophical discourse situated in educational studies **The Political Economy of Global Citizenship Education** Vanessa De Oliveira Andreotti, 2016-03-16 This edited collection offers analyses of global citizenship education within and across different national contexts This book illustrates the contingency of definitions the complexities of juxtaposing demands and priorities in different educational contexts and the difficulties and tensions of asking a question that is arguably one of the most pressing of our time how should we live together in interdependent ecologies in a finite planet In the discipline of education where market imperatives and the dictatorship of effective replicable results have laid siege to independent debates this book aims to emphasize the importance of raising our intellectual game as educators to interrupt new and old problematic patterns of engagements representations uncomplicated solutions and conceptual straightjackets Contributors to this volume address the tensions between homogenizing universalisms and parochial specifisms ethnocentrisms and relativisms deficit theorizations and romanticizations of difference fantasies of supremacy and paralyses in guilt the global and the local The chapters take different approaches to map the origins meanings workings ethics politics and implications of initiatives approaches and conceptual frameworks related to the ideas of globalization citizenship and education in different sites of knowledge production This book was originally published as a special issue of *Globalisation Societies and Education* **A History of Western Philosophy of Education in the Contemporary Landscape** Anna Pagès, 2021-01-28 This volume traces the history of Western philosophy of education in the contemporary landscape 1914 2020 The volume covers the Cuban Revolution in 1959 the events of May 1968 in Paris the Zapatista Revolution in 1994 and the Arab Spring revolutions from 2010 to 2012 It also covers the two World Wars the Cold War the fall of the Berlin Wall and the triumph of science and technology until the hegemony of post liberal societies The philosophical problems covered include justice freedom critical thought equity philosophy for children decolonialism liberal education feminism and plurality These problems are discussed

in relation to the key philosophers and pedagogues of the period including Jacques Derrida Paulo Freire Simone De Beauvoir Judith Butler R S Peters bell hooks Martha Nussbaum Matthew Lipman Giorgio Agamben Maxine Greene and Simone Weil among others About A History of Western Philosophy of Education An essential resource for researchers scholars and students of education this five volume set that traces the development of philosophy of education through Western culture and history Focusing on philosophers who have theorized education and its implementation the series constitutes a fresh dynamic and developing view of educational philosophy It expands our educational possibilities by reinvigorating philosophy s vibrant critical tradition connecting old and new perspectives and identifying the continuity of critique and reconstruction It also includes a timeline showing major historical events including educational initiatives and the publication of noteworthy philosophical works

**Levinas and Education** Denise Egea-Kuehne, 2008-04-02 This first book length collection on Levinas and education gathers new texts written especially for this volume by an international group of scholars well known for their work in philosophy educational theory and on Levinas It provides an introduction to some of Levinas s major themes of ethics justice hope hospitality forgiveness and more as its contributing authors address some fundamental educational issues such as what it means to be a teacher what it means to learn from a teacher the role of language in the curriculum literature ethics and education moral education and human relations in schools ethics of responsibility and philosophical pedagogical discourse educational hospitality and interculturalism unconditional responsibility and education educating for participatory democratic citizenship the pedagogy of peace logic rationality and ethics connecting teaching to spirituality Levinas always insisted that his aim was not to provide a program and accordingly it is not the intent of the authors to look in Levinas s texts for a set of guidelines rules or precepts to be applied to education Rather this study invites educators and researchers in philosophy and philosophy of education to a thoughtful and critical reading of Levinas and to engage with his unique style of analysis and questioning as they uncover with these authors the necessity and the possibility of thinking education anew in terms of ethics justice responsibility hope and faith

Education in an Age of Nihilism Nigel Blake, Paul Smeyers, Richard Smith, Paul Standish, 2012-12-06 This book addresses concerns about educational and moral standards in a world increasingly characterised by nihilism On the one hand there is widespread anxiety that standards are falling on the other new machinery of accountability and inspection to show that they are not The authors in this book state that we cannot avoid nihilism if we are simply laissez faire about values neither can we reduce them to standards of performance nor must we return to traditional values They state that we need to create a new set of values based on a critical assessment of contemporary practice in the light of a number of philosophical texts that address the question of nihilism including the work of Nietzsche

**Rethinking Inclusive Education: The Philosophers of Difference in Practice** Julie Allan, 2007-11-07 With Warnock the so called architect of inclusion now pronouncing this her big mistake and calling for a return to special schooling inclusion appears to be under threat as never before This book takes key ideas of the philosophers of difference

Deleuze Foucault and Derrida and puts them to work on inclusion The book offers new challenges for those involved with education to invent new ways of tackling the problem of inclusion      **Educational Enactments in a Globalised World**  
,2009-01-01 Acrylic oil glue stick and layered canvas 1830 x 2075 Collection of the artist What does it mean to learn and educate in these social and historical times This edited collection engages an international group of education thinkers in a series of ongoing intercultural conversations that speak to the challenges and possibilities of engaging with education difference and diversity in a globalised world Shifting across a range of geographical theoretical institutional and disciplinary contexts the contributors identify in their own empirical and theoretical research work examples of localised solutions to the problems of diversity for the practice of education These educational enactments illustrate the interactions of localised and global level discourses within contexts of educational policy and practice and allow an exploration of how abstract notions of education are applied through education as a practice and or subjective experience Mindful of the structural limitations imposed by the regime of globalisation the book explores the challenges and the agentive possibilities of working across cultural and material boundaries and provides multiple venues in which to transcend the limitations of addressing educational issues through a single lens Engaging with both the challenges and the complexities of intercultural conversations in relation to issues of diversity and difference the book s contributors recognise that their role as educators compels them to engage with the dilemmas as well as the productive possibilities of what it means to learn and to educate within such interesting times Cover image Kiss I Kiss at the Gate by Linda James 1991 Acrylic oil glue stick and layered canvas 1830 x 2075 Collection of the artist
