Descartes Pas Dit R Pertoire Dapologie:

Cartesian Questions III Jean-Luc Marion, 2025-08-05 In this masterful work Jean Luc Marion shows how some of Descartes most decisive points remain masked by the various Cartesianisms that historiography and convenient simplifications alike have constructed The book s first half shows how Descartes lines up against Cartesianism setting forth several closely argued attempts to free up the positive status of skepticism in the Cartesian corpus the non substantial and non reflexive character of the ego cogito the complex elaboration of the idea of the infinite and the role of esteem as a mode of the cogitatio Marion then offers a second set of studies examining the work of Montaigne Hobbes and Spinoza and seeking to reconstitute some of the ways in which Cartesianism and non Cartesianism become opposed to Descartes Arising at the pivot point between these two paths of inquiry is a chapter dedicated to Descartes and phenomenology with particular focus on how Descartes can be understood to have practiced in his own way and by anticipation a genuine phenomenological reduction The final volume in Jean Luc Marion s erudite trilogy of Cartesian Questions this authoritative book demonstrates that rather than belonging strictly to the past Descartes continues to speak to our future

Theories of Colour from Democritus to Descartes Véronique Decaix, Katerina Ierodiakonou, 2024-10-25 Theories of Colour from Democritus to Descartes investigates issues of the ontological status and perception of colours such as What is the nature of colours Do they exist independently of the subjects who perceive them And if so how are they generated and how do they differ from one another These are some of the questions raised by philosophers but what has been lacking is an account of the various theories about colours through different periods of the history of philosophy Exploring philosophical debates on the nature and perception of colours from a historical perspective this book presents how different theories from Antiquity through the Middle Ages to the early modern era explain the nature of colours their generation and the way they are perceived Twelve eminent historians of philosophy analyse the theories of colours prevailing at critical points in the history of Western philosophy from its beginnings with Democritus to Descartes and the early modern period This book will appeal to students and scholars working on the history of philosophy ancient medieval Arabic and Latin and early modern as well as those interested in contemporary philosophy philosophy of the mind philosophy of perception phenomenology metaphysics and neurosciences A broader audience may also include researchers in psychology cultural history and the history of art

Space, Imagination and the Cosmos from Antiquity to the Early Modern Period

Frederik A. Bakker, Delphine Bellis, Carla Rita Palmerino, 2019-02-05. This volume provides a much needed historically accurate narrative of the development of theories of space up to the beginning of the eighteenth century. It studies conceptions of space that were implicitly or explicitly entailed by ancient, medieval and early modern representations of the cosmos. The authors reassess Alexandre Koyré's groundbreaking work *From the Closed World to the Infinite Universe* (1957) and they trace the permanence of arguments to be found throughout the Middle Ages and beyond. By adopting a long timescale this book sheds new light on the continuity between various cosmological representations and their impact on the ontology and epistemology of space. Readers may explore the work of a variety of authors including Aristotle, Epicurus, Henry of Ghent, John Duns Scotus, John Wyclif, Peter Auriol, Nicholas Bonet, Francisco Suárez, Francesco Patrizi, Giordano Bruno, Libert Froidmont, Marin Mersenne, Pierre Gassendi, Gottfried Wilhelm Leibniz and Samuel Clarke. We see how reflections on space, imagination and the cosmos were the product of a plurality of philosophical traditions that found themselves confronted with and enriched by various scientific and theological challenges which induced multiple conceptual adaptations and innovations.

This volume is a useful resource for historians of philosophy, those with an interest in the history of science and particularly those seeking to understand the historical background of the philosophy of space.

Descartes y Spinoza

Jean-Paul Margot, 2022-10-18. Spinoza quiere acabar con el misterio que rodea la razón o que le subyace misterio que hace afirmar a Descartes en la Meditación tercera es propio de la naturaleza del infinito que mi naturaleza que es finita y limitada no pueda comprenderlo. Es a este racionalismo con sus limitadas capacidades de entender que Spinoza opone un entendimiento capaz de llegar al conocimiento de la unidad que la mente tiene con toda la Naturaleza ya que a diferencia de Descartes en cuanto a su naturaleza el entendimiento es el mismo en el hombre que en Dios. He aquí el lugar de una divergencia fundamental entre Spinoza y Descartes. Las preocupaciones de Spinoza son desde luego diferentes a las de Descartes: tienen que ver con el hecho de que mientras Descartes teme que el mundo que lo rodea sea un verdadero caos vacío de la estructura coherente que se esperaba encontrar ahí, Spinoza está atento ante todo al desorden en sí mismo y que traduce su alejamiento del orden racional de la naturaleza. Los siete estudios de este libro se desplazan en el espacio técnico y práctico de esta divergencia.

Les classiques à l'épreuve Delphine Antoine-Mahut, Samuel Lézé, Collectif, 2018. Au cœur de la pensée philosophique une tension essentielle des textes critiqués dans une conjoncture donnée et incarnés dans des hommes singuliers conquiert progressivement une forme d'intemporalité. Ils deviennent classiques. L'objectif de ce volume collectif réunissant une vingtaine d'études de cas est de soumettre ces classiques à une double preuve : d'une part l'étude des réceptions et les diations.

intellectuelles montre que le travail de l historien de la philosophie ne se résume pas celui d un antiquaire D autre part la mise au jour des mancances d activations et d actualisations intellectuelles des classiques atteste de ce que la pensée philosophique ne saurait se réduire un inventaire d arguments d contextualisation Il s agit en somme de proposer une approche anthropologique de la pensée philosophique
