The Descent of Man Charles Darwin, 2004-06-29 Applying his controversial theory of evolution to the origins of the human species Charles Darwin's *The Descent of Man* was the culmination of his life's work In *The Origin of Species* Charles Darwin refused to discuss human evolution believing the subject too surrounded with prejudices He had been reworking his notes since the 1830s but only with trepidation did he finally publish *The Descent of Man* in 1871 The book notoriously put apes in our family tree and made the races one family diversified by sexual selection Darwin's provocative theory that female choice among competing males leads to diverging racial characteristics Named by Sigmund Freud as one of the ten most significant books ever written Darwin's *Descent of Man* continues to shape the way we think about what it is that makes us uniquely human In their introduction James Moore and Adrian Desmond acclaimed biographers of Charles Darwin call for a radical re assessment of the book arguing that its core ideas on race were fired by Darwin's hatred of slavery The text is the second and definitive edition and this volume also contains suggestions for further reading a chronology and biographical sketches of prominent individuals mentioned For more than seventy years Penguin has been the leading publisher of classic literature in the English speaking world With more than 1 700 titles Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors as well as up to date translations by award winning translators

*The Descent of Man and Selection in Relation to Sex* Charles Darwin, 1896 *The Descent of Man and Selection in Relation to Sex* Charles Darwin, Charles Darwin's Works *The Descent of Man and Selection in Relation to Sex* New edition revised and augmented Complete in one volume New York D Appleton and Co 1896 **Descent of Man and Selection in Relation to Sex** Charles Darwin, 2004 Excerpt from *The Descent of Man and Selection in Relation to Sex* The nature of the following work will be best understood by a brief account of how it came to be written During many years I collected notes on the origin or descent of man without any intention of publishing on the subject but rather with the determination not to publish as I thought that I should thus only add to the prejudices against my views It seemed to me sufficient to indicate in the first edition of my *Origin of Species* that by this work light would be thrown on the origin of man and his history and this implies that man must be included with other organic beings in any general conclusion respecting his manner of appearance on this earth Now the case wears a wholly different aspect When a naturalist like Carl Vogt ventures to say in his address as President of the National Institution of Geneva *personne en Europe au moins n ose plus soutenir la creation ind pendante et de toutes pieces des esp ees* it is manifest that at least a large number of naturalists must admit that species are the modified descendants of other species and this especially holds good with the younger and rising naturalists The greater number accept the agency of natural selection though some urge whether with justice the future must decide that I have greatly overrated its importance Of the older and honoured chiefs in natural science many unfortunately are still

*The Speciation of Modern Homo Sapiens* T. J. Crow,2004-01-08 This is the first volume to address directly the question of the speciation of modern Homo sapiens The subject raises profound questions about the nature of the species our defining characteristic it is suggested it is language and the brain changes and their genetic basis that make us distinct The British Academy and the Academy of Medical Sciences have brought together experts from palaeontology archaeology linguistics psychology genetics and evolutionary theory to present evidence and theories at the cutting edge of our understanding of these issues Palaeontological and genetic work suggests that the transition from a precursor hominid species to modern man took place between 100 000 and 150 000 years ago Some contributors discuss what is most characteristic of the species focussing on language and its possible basis in brain lateralization This work is placed in the context of speciation theory which has remained a subject of considerable debate since the evolutionary synthesis of Mendelian genetics and Darwinian theory The timing of specific transitions in hominid evolution is discussed as also is the question of the neural basis of language Other contributors address the possible genetic nature of the transition with reference to changes on the X and Y chromosomes that may account for sex differences in lateralization and verbal ability These differences are discussed in terms of the theory of sexual selection and with reference to the mechanisms of speciation These essays will be vital reading for anyone interested in the nature and origins of the species and specifically human abilities

*Evolution From Molecules to Men* D. S. Bendall,1983 Giving a broad view of biological evolution the topics discussed here range from the history of the development of evolutionary thought through current problems in molecular evolution and the evolution of whole organisms to evolution of behaviour sociobiology and man's place in evolution

*Christianity and Agnosticism* Henry Wace,1889

*FishBase 2000* R. Froese,Daniel Pauly,2000 An information system with key data on the biology of all fishes Covers more than 25 000 species of fish

*The Darwin Effect* Dr. Jerry Bergman,2014-08-01 Dr Miklos Nyiszli an imprisoned doctor in the Auschwitz camp wrote that Nazi doctors hoped studying twins would solve the problem of faster reproduction of superior races Nazis hoped to have each German mother

bear as many twins as possible What Darwin influenced went far beyond the Nazi death camps Shocking political social and scientific legacies of Darwin and his family Disturbing disclosure of how over 45 million Christians were killed in the 20th century because of their faith Revealing and layman friendly presentation This book is the result of 30 years of research and study carefully documenting the common destructive threads that tie some of history s most murderous dictators uncaring capitalists and aggressive social activists to the flawed concepts of Charles Darwin in an effort to change the world and how they succeeded The extermination of races considered lower than others the profound lack of empathy for less advanced cultures the corrupted atheistic justifications for taking the lives of millions all done to advance the agendas of social Darwinism at work in the world today More than mere theoretical discussions we have seen the horrifying evidence of the practical results when applying these destructive and misleading concepts to society in the last 100 years *The Art of Evolution* Barbara Jean Larson,Fae Brauer,2009 A timely and stimulating collection of essays about the impact of Darwin s ideas on visual culture **The Evolution of Man** Ernst Haeckel,1910 **The Westminster review [afterw.] The London and Westminster review [afterw.] The Westminster review [afterw.] The Westminster and foreign quarterly review [afterw.] The Westminster review [ed. by sir J. Bowring and other].** sir John Bowring,1872 **The Westminster Review** ,1872 **The Evolution of Man** Ernst Heinrich Philipp August Haeckel,1910 [The Evolution of Man](#) Ernst Haeckel,2020-07-28 Reproduction of the original The Evolution of Man by Ernst Haeckel [A History of European Thought in the Nineteenth Century: Philosophical thought, 2 v](#) John Theodore Merz,1912 *Looking for a Few Good Males* Erika L. Milam,2010-01-29 Approaching the topic from both biological and animal studies perspectives Milam not only presents a broad history of sexual selection from Darwin to sociobiology but also analyzes the animal human continuum from the perspectives of sex evolution and behavior She asks how social and cultural assumptions influence human animal research and wonders about the implications of gender on scientific outcomes *Imagining the Darwinian Revolution* Ian Hesketh,2022-06-14 This volume considers the relationship between the development of evolution and its historical representations by focusing on the so called Darwinian Revolution The very idea of the Darwinian Revolution is a historical construct devised to help explain the changing scientific and cultural landscape that was ushered in by Charles Darwin s singular contribution to natural science And yet since at least the 1980s science historians have moved away from traditional great man narratives to focus on the collective role that previously neglected figures have played in formative debates of evolutionary theory Darwin they argue was not the driving force behind the popularization of evolution in the nineteenth century This volume moves the conversation forward by bringing Darwin back into the frame recognizing that while he was not the only important evolutionist his name and image came to signify evolution itself both in the popular imagination as well as in the work and writings of other evolutionists Together contributors explore how the history of evolution has been interpreted deployed and exploited to fashion the science behind our changing understandings of

evolution from the nineteenth century to the present
