Design For Pediatric And Neonatal Critical Care:

Design for Pediatric and Neonatal Critical Care Mardelle McCuskey Shepley, 2014-02-03 *Design for Pediatric and Neonatal Critical Care* provides an overview of the design and research issues associated with the development of environments for pediatric and neonatal intensive care. This is the first and only book dedicated to this topic and was created to support individuals interested in developing and studying critical care environments for children and their families. In addition to a detailed analysis of the literature from research and practice, the author provides a summary of the historical development of critical care for infants and children and information regarding the role of PICUs and NICUs in the critical care system. A discussion of current codes and future trends is also provided. *Design for Pediatric and Neonatal Critical Care* includes essays from prominent voices in the field ranging from inspired young architects and researchers to world renowned healthcare design and research icons. Illustrations of work that has been identified as exemplary or representative of recent directions are included, which will help those planning new or remodeled projects to identify and examine precedents. This book is intended to help designers and researchers enhance healing environments for young patients in critical care settings and provide information in support of the families and staff who provide care for these children and infants. **Avery &**

MacDonald's Neonatology James Boardman, Alan Groves, Jayashree Ramasethu, 2021-05-18 For more than 45 years *Avery & MacDonald's Neonatology* has been the premier text on the pathophysiology and management of both preterm and full term neonates, trusted by neonatologists, neonatology fellows, pediatricians, neonatal nurse practitioners, and ob/gyn practitioners worldwide. Continuing the tradition of excellence established by Drs. Gordon B. Avery and Mhairi G. MacDonald, this fully revised eighth edition features three new lead editors, numerous new chapters, reorganized and updated content, and an increased focus on global neonatology. **Architecture and Health** Dina Battisto, Jacob J. Wilhelm, 2019-10-17 *Architecture and Health* recognizes the built environment and health as inextricable, encouraging a new mind set for the profession. Over 40 international award-winning projects are included to explore innovative design principles linked to health outcomes. The book is organized into three interdependent health domains: individual, community, and global, in which each case study proposes context-specific architectural responses. Case studies include children's hospitals, rehabilitation facilities, elderly housing, mental health facilities, cancer support centers, clinics, healthy communities, healthcare campuses, wellness centers, healing gardens, commercial offices, infrastructure for developing countries, sustainable design, and more. Representing the United States, Africa, Asia, Europe, and Australia, each author brings a new perspective to health and its related architectural response. This book brings a timely focus to a subject matter commonly constricted by normative building practices and transforms the dialogue into one of creativity and innovation. With over 200 color images, this book is an essential read for architects, designers, and students to explore and analyze designed environments that promote health and well-being.
