Creating dynamics shifting boundaries building and expanding networks conserving resources developing and optimizing planning tools as well as implementing use additive processes. All these processes are discussed in order to clarify the necessary collaboration between various actors in the construction industry. Groundbreaking solutions clearly explain the role applied sciences play in the active collaboration between university and industry as well as the interdisciplinary integration of disciplines and experts. This publication presents interdisciplinary collaborative projects such as the Seaweed Facade which resulted in the realization of a building with a bioreactor facade at the International Building Exhibition in Hamburg in 2012 or the Printed Envelope the result of a collaborative research project in which free forms for the facade design were generated from 3D computer generated processes

### **Der Offenbacher Ansatz**

Thilo Schwer, Kai Vöckler, 2021-01-12 Die Theorie der Produktsprache stellte einen Paradigmenwechsel in der Designtheorie dar. An der Hochschule für Gestaltung HfG Offenbach in den 1970er und 1980er Jahren entwickelt erweiterte sie das funktionalistische Verständnis von Produkten hinsichtlich ihrer Zeichenhaftigkeit und Bedeutungsdimension. Dieser Band macht wichtige historische Dokumente aus dieser Zeit wieder zugänglich und kontextualisiert sie mit Interviews und Stellungnahmen von Zeitzeugen. Die Aktualität der Produktsprache auch als wesentlicher Bestandteil der Lehre im Design wird von Expertinnen und Experten aus Theorie und Praxis diskutiert. Als Ausblick werden aktuelle Forschungsfragen im Zusammenhang mit einer Weiterentwicklung der Theorie der Produktsprache formuliert.

Design als Wissenskultur Claudia Mareis, 2014-03-15

Design gilt zunehmend als autonome Wissenskultur. Diese Sichtweise folgt einerseits epistemologischen Prämissen, andererseits befürdert sie strategische Interessen hinsichtlich der disziplinären Autonomie des Feldes. Dabei werden die demarkierten Grenzen zwischen Design Kunst und Wissenschaft in Frage gestellt und unter dem Leitmotiv eines Design

**The Aesthetics of Imagination in Design** Mads Nygaard Folkmann, 2013-04-12 A theoretically informed investigation that relates the philosophies of aesthetics and imagination to understanding design practice In The Aesthetics of Imagination in Design Mads Folkmann investigates design in both material and immaterial terms Design objects Folkmann argues will always be dual phenomena material and immaterial sensual and conceptual actual and possible Drawing on formal theories of aesthetics and the phenomenology of imagination he seeks to answer fundamental questions about what design is and how it works that are often ignored in academic research Folkmann considers three conditions in design the possible the aesthetic and the imagination Imagination is a central formative power behind the creation and the life of design objects aesthetics describes the sensual conceptual and contextual codes through which design objects communicate the concept of the possible the enabling of new uses conceptions and perceptions lies behind imagination and aesthetics The possible Folkmann argues is contained as a structure of meaning within the objects of design which act as part of our interface with

It looks at three approaches to constructive design research: Lab, Field and Showroom. The book shows how theory, research, practice and the social environment create commonalities between these approaches. It illustrates how one can successfully integrate design and research based on work carried out in industrial design and interaction design. The book begins with an overview of the rise of constructive design research as well as constructive research programs and methodologies. It then describes the logic of studying design in the laboratory, design ethnography and field work and the origins of the Showroom and its foundation on art and design rather than on science or the social sciences. It also discusses the theoretical background of constructive design research along with modeling and prototyping of design items. Finally it considers recent work in Lab that focuses on action and the body instead of thinking and knowing. Many kinds of designers and people interested in design will find this book extremely helpful. Gathers design research experts from traditional lab science, social science, art, industrial design, UX and HCI to lend tested practices and how they can be used in a variety of design projects. Provides a multidisciplinary story of the whole design process with proven and teachable techniques that can solve both academic and practical problems. Presents key examples illustrating how research is applied and vignettes summarizing the key how-to details of specific projects

**Organization and Newness** Michael A. Peters, Susanne Maria Weber, 2019-01-14 Organization and Newness Discourses and Ecologies of Innovation in the Creative University offers a view from a perspective of organizational education on the new which analyzes the production of the new within organizations in relation to the inherent learning processes. Fundamental for this perspective is the question about the changeability of organizations especially when these are not viewed only as instrumentally established regulatory structures but rather as social constructs. The contributions of this volume contour the complexity of newness in organization and form a bridge from critical analysis of imperative discourse of newness to programmatic pleas of an organizational pedagogy which is normative in nature for a reconfiguration of organizational and societal relationships. The issue at hand shows how tightly

the question about newness is constitutively woven into the self conception of organizational education and pedagogy

Praxis des Designmanagements Tom Sommerlatte,2009      *Ornament and Figure in Graeco-Roman Art* Nikolaus Dietrich,Michael Squire,2018-03-19 How does decoration work What are the relations between figurative and ornamental modes And how do such modern western distinctions relate to other critical traditions While these questions have been much debated among art historians our book offers an ancient visual cultural perspective On the one hand we argue Greek and Roman materials have proved instrumental in shaping modern assumptions On the other hand those ideologies are fundamentally removed from ancient ideas an ancient perspective can therefore shed light on larger aesthetic debates about what images are or indeed what they should be This anthology of specially commissioned essays explores a variety of case studies both literary and art historical alike it discusses materials from across the ancient Mediterranean and from Geometric art all the way through to late antiquity the book also tackles questions of figure and ornament in relation to different media including painting free standing statues relief sculpture mosaics and architecture A particular feature of the volume lies in bringing together different national academic traditions building a bridge between formalist approaches and broader cultural historical perspectives

Denkhaltungen im Design Britta Stammeier,2018-04-11 Britta Stammeier stellt sich der Frage welchen Einfluss verschiedene Denkhaltungen auf das Design haben und wie diese sich auf die Produktgestaltung auswirken Dabei spielt eine ganzheitliche Denkweise und die Abkehr vom linearen Wirtschaftssystem eine wesentliche Rolle Die Herangehensweise an eine ganzheitliche Gestaltung verdeutlicht die Autorin am Beispiel eines modularen Schuhkonzeptes welches es erm glicht verschiedene Aktivit ten im Outdoor Bereich mit nur einem Schuh optimal auszu ben Die zu entwickelnde Marke wird als fiktive Submarke in ein etabliertes Unternehmen eingegliedert Im linearen Wirtschaftssystem gehen wichtige Rohstoffe verloren und gleichzeitig steigt die Umweltbelastung Vor allem im Design besteht die M glichkeit neue Prozesse zu gestalten und andere Herangehensweisen an die Produktherstellung zu etablieren Ein Businessplan mit den dazugeh rigen Anforderungen erg nzt das Gesamtkonzept
