Design, 1993 *Design Management* Brigitte Borja de Mozota, 2003-08 Providing a synthesis of practical blueprint and theoretical field guide to managing design this comprehensive reference shows how the various disciplines of design product packaging graphic and environmental create value and contribute to company performance **Design, miroir du siècle** Jocelyn de Noblet, 1993-01-01 Importante r trospective consacr e l histoire du design industriel depuis 150 ans Outre les 29 essais th matiques crits par des sp cialistes le d veloppement du design est saisi travers un parcours chronologique associant les inventions aux grands v nements qui leur sont contemporains L ouvrage propose aussi une analyse de 76 objets qui ont particuli rement marqu notre soci t moderne comme la machine crire la 2 CV et le micro ordinateur **Managing New Product Innovation** B. Jerrard, R. Newport, . Trueman, 2003-09-02 New product design and development is often the result of personal vision Harnessing this often requires a special receptiveness and enthusiasm at all levels of an organization which serves to unlock potential and can turn the entire organizational pyramid upside down It is particularly important to understand and develop those aspects of design which can be constructively employed by designers in a strategic alliance with management and research The papers in this volume result from the conference of the Design Society held at the University of Central England in September 1998 They show how design led product development has worked in a range of industries from engineering through to design and management consultancy Not only practitioners but also students of industrial design and management should find this a valuable contribution to the subject *Visual Identities* Jean-Marie Floch, 2001-01-01 The six essays of Visual Identities are an important contribution to the growing field of industrial semiotics Floch s major strength is his analysis of signs in a way which is both industrially relevant and textually precise Until recently there have been two quite different and distinct ways of understanding commerical signs such as logos and advertisements Industry based work has tended to look at questions of marketing and has often been reduced to the mass psychology of appeal and audience research whereas the textual analysis of commerical signs has tended to come from limited positions of identity politics and criticism Marxism feminism etc Floch manages to find a way between and also outside these traditions In doing so he has produced a book which will interest industrial practitioners in advertising marketing and design as well as students and academics in semiotics **The Colours of Our Memories** Michel Pastoureau, 2020-09-08 What remains of the colours of our childhood What are our memories of a blue rabbit a red dress a yellow bike and were they really those colours What colours do we associate with our student years our first loves our adult lives How does colour leave its mark on memory In an attempt to answer these and other questions Michel Pastoureau presents us with a journal about colours that covers half a century Drawing on personal recollections he retraces the recent history of colours through an exploration of fashion and clothing everyday objects and practices emblems and flags sport literature museums and art This text playful poetic nostalgic records the life of both the author and his contemporaries We live in a world increasingly bursting with colour in

which colour remains a focus for memory a source of delight and most of all an invitation to dream *The Design Encyclopedia* Mel Byars, 2004 Design has an increasingly high profile figures like Philippe Starck are as venerated and well known as more traditional artists But where the literature on fine art is vast design is still comparatively ill served This encyclopedia provides an account of the still largely unknown story of design **Nothing in Itself** Herbert Blau, 1999 What Herbert Blau suggests in *Nothing in Itself* is that fashion itself today has been anticipating and redefining in the dazzle on the runway or even in ready to wear the terms in which it is critiqued while sometimes giving the impression that it is inseparable from critique in short there is little to be said of fashion that is not somehow visible in fashion though even in the mainstream we may call it antifashion Which is all the more reason to look at the clothes The book does so copiously with a fastidious eye to style as if nothing could be said of a garment no appropriate fabric of thought without the felt sensation

scholars speculated that the ancient Greeks couldn't see green and how the color was denigrated by Kandinsky and the Bauhaus. More broadly, Green demonstrates that the history of the color is to a large degree one of dramatic reversal long absent, ignored or rejected. Green today has become a ubiquitous and soothing presence as the symbol of environmental causes and the mission to save the planet. With its striking design and compelling text, Green will delight anyone who is interested in history, culture, art, fashion or media. **Design**, 1994 *Science, Technology and Innovation Culture*

Marianne Chouteau, Joelle Forest, Céline Nguyen, 2018-10-09 We are facing unprecedented challenges today. For many of us, innovation would be our last hope. But how can it be done? Is it enough to bet on the scientific culture? How can technical culture contribute to innovation? How is technical culture situated with regards to what we name collectively the culture of innovation? It is these questions that this book intends to address. Market Mediations B. Heilbrunn, 2015-05-11

Market Mediations offers a fresh way to look at consumption practices, design and branding issues through analysis based on the French and European intellectual tradition. To account for this vast system of objects and brands, the book draws on the generative trajectory of meaning stemming from the structural semiotics of Greimas. **Black** Michel

Pastoureau, 2023-06-13 The story of the color black in art, fashion and culture from the beginning of history to the twenty-first century. Black, favorite color of priests and penitents, artists and ascetics, fashion designers and fascists, has always stood for powerfully opposed ideas: authority and humility, sin and holiness, rebellion and conformity, wealth and poverty, good and bad. In this beautiful and richly illustrated book, the acclaimed author of *Blue* now tells the fascinating social history of the color black in Europe. In the beginning was black. Michel Pastoureau tells us. The archetypal color of darkness and death, black was associated in the early Christian period with hell and the devil, but also with monastic virtue. In the medieval era, black became the habit of courtiers and a hallmark of royal luxury. Black took on new meanings for early modern Europeans as they began to print words and images in black and white and to absorb Isaac Newton's announcement that black was no color after all. During the romantic period, black was melancholy's friend, while in the twentieth century, black and white came to dominate art, print, photography and film, and was finally restored to the status of a true color. For Pastoureau, the history of any color must be a social history first, because it is societies that give colors everything, from their changing names to their changing meanings, and black is exemplary in this regard. In dyes, fabrics and clothing, and in painting and other art works, black has always been a forceful and ambivalent shaper of social, symbolic and ideological meaning in European societies. With its striking design and compelling text, *Black* will delight anyone who is interested in the history of fashion, art, media or design. *Design & Applied Arts Index*, 1996 **De l'éducation technologique à la culture technique** Yves

Pastoureau, 2023-04-25 From the acclaimed author of *Blue*, a beautifully illustrated history of yellow from antiquity to the

present In this richly illustrated book Michel Pastoureau a renowned authority on the history of color and the author of celebrated volumes on blue black green and red now traces the visual social and cultural history of yellow Focusing on European societies with comparisons from East Asia India Africa and South America Yellow tells the intriguing story of the color s evolving place in art religion fashion literature and science In Europe today yellow is a discreet color little present in everyday life and rarely carrying great symbolism This has not always been the case In antiquity yellow was almost sacred a symbol of light warmth and prosperity It became highly ambivalent in medieval Europe greenish yellow came to signify demonic sulfur and bile the color of forgers lawless knights Judas and Lucifer while warm yellow recalled honey and gold serving as a sign of pleasure and abundance In Asia yellow has generally had a positive meaning In ancient China yellow clothing was reserved for the emperor while in India the color is associated with happiness Above all yellow is the color of Buddhism whose temple doors are marked with it Throughout Pastoureau illuminates the history of yellow with a wealth of captivating images With its striking design and compelling text Yellow is a feast for the eye and mind
