3D Printing for Product Designers Jennifer Loy, James Novak, Olaf Diegel, 2023-03-17 3D Printing for Product Designers closes the gap between the rhetoric of 3D printing in manufacturing and the reality for product designers It provides practical strategies to support the adoption and integration of 3D printing into professional practice 3D printing has evolved over the last decade into a practical proposition for manufacturing opening up innovative opportunities for product designers From its foundations in rapid prototyping additive manufacturing has developed into a range of technologies suitable for end use products This book shows you how to evaluate and sensitively understand people process and products and demonstrates how solutions for working with additive manufacturing can be developed in context It includes a practical step by step plan for product designers and CEOs aimed at supporting the successful implementation of 3D printing by stakeholders at all levels of a manufacturing facility tailored to their stage of technology integration and business readiness It features a wide range of real world examples of practice illustrated in full colour across industries such as healthcare construction and film aligning with the strategic approach outlined in the book The book can be followed chronologically to guide you to transform your process for a company to meet the unique needs of a specific client or to be used as a starting point for the product design entrepreneur Written by experienced industry professionals and academics this is a fundamental reference for product designers industrial designers design engineers CEOs consultants and makers

Mobilities Design Ole B. Jensen, Ditte Bendix Lanng, 2016-10-04 Contemporary society is marked and defined by the ways in which mobile goods bodies vehicles objects and data are organized moved and staged Against the background of the mobilities turn this book articulates a new and emerging research field namely that of mobilities design The book revolves around the following research question How are design decisions and interventions staging mobilities It builds upon the Staging Mobilities model Jensen 2013 in an exploratory inquiry into the problems and potentials of the design of mobilities The exchange value between mobilities and design research is twofold To mobilities research this means getting closer to the material and to engage in the creative exploratory and experimental approaches of the design world which offer new potential for innovative research Design research on the other hand might enter into a fruitful relationship with mobilities research offering a relational and mobile design thinking and a valuable basis for design reflections around the ubiquitous structures spaces and systems of mobilities

Design Ecologies Lisa Tilder, Beth Blotstein, 2012-03-20 Contemporary architects are under increasing pressure to offer a sustainable future But with all the focus on green building there has been little investigation into the meaningful connections between architectural design ecological systems and environmentalism A new generation of architects landscape architects designers and engineers aims to recalibrate what humans do in the world according to how the world works as a biophysical system

Design in this sense is a larger concept having to do as much with politics and ethics as with aesthetics and technology This recasting of the green movement for the twenty first century transforms design into a positive agent balancing societal values with environmental needs Design Ecologies is a ground breaking collection of never before published essays and case studies by today s most innovative designers and critics Their design strategies social material and biological run the gamut from the intuitive to the highly technological One essay likens window unit air conditioners in New York City to weeds in order to spearhead the development of potential design solutions Latz Partner s Landscape Park integrates vegetation and industry in an urban park built amongst the monumental ruins of a former steelworks in Duisburg Nord Germany The engineering firm Arup presents its thirty three square mile masterplan for Dongtan Eco City an energy independent city that China hopes will house half a million people by 2050 An essay by designer Bruce Mau leads off a stellar list of emerging designers including Jane Amidon Blaine Brownell David Gissen Gross Max Robert Sumrell and Kazys Varnelis Stephen Kieran and James Timberlake R Sie n Studio 804 and WORKac

Sustainability and Privilege Gabriel Arboleda, 2022-05-13 Social design the practice of designing for poverty relief is one of the most popular fields in contemporary architecture Its advocates focusing on the architect's creativity and good intentions are overwhelmingly laudatory while its detractors

concerned with the experience of its beneficiaries have dismissed it as an expression of cultural imperialism Placed midway between innocuous celebration and radical critique Sustainability and Privilege highlights the lessons that can be learned from social design's current limitations and proposes a feasible way to improve this practice In this broad ranging account enlivened by fieldwork and case studies Gabriel Arboleda contends that social design's invocation of sustainability often serves to marginalize and displace vulnerable populations through projects that involve experimentation of faulty alternative technologies or that result in so called green gentrification or that impose untoward economic and other burdens Arboleda is fiercely critical of the way social design has been carried out in impoverished regions of the world most notably in Africa and Latin America In addressing the challenges posed by issues of privilege in social design's use of sustainability the book proposes a new interdisciplinary approach called ethnoarchitecture arguing for a simpler open ended and stakeholder driven process that eliminates the casual imposition of the architect's ideas on vulnerable populations foregrounding the people's voices experience and input in social design practice

Designing to Heal Jenny Donovan, 2013-04-22 *Designing to Heal* explores what happens to communities that have suffered disasters either natural or man made and what planners and urban designers can do to give the affected communities the best possible chance of recovery It examines the relationship that people have with their surroundings and the profound disruption to people's lives that can occur when that relationship is violently changed when the familiar settings for their lives are destroyed and family friends and neighbours are displaced incapacitated or killed The book offers a model of the healing process outlining the emotional journey that people go on as they struggle to rebuild their lives It outlines the characteristics of the built environment that may facilitate people to travel as smoothly as possible down this road to recovery and suggests elements of the design process that can help achieve this goal *Designing to Heal* highlights the importance of thinking about urban design as a way of nurturing hope and creating the optimal conditions to achieve social objectives
